Doing Business on the Internet Fay Sudweeks,Celia T. Romm,2012-12-06 An objective look at what Internet commerce can offer both the consumer and the provider. It covers three main areas of concern to business today: how to join the Internet revolution, how to manage it, and how to benefit from it. The book is primarily of interest as background reading for researchers and advanced level students in the following areas: electronic commerce, business studies, computer-mediated communication, management of information systems, project management, and organisational change. However, it will also be of interest to corporate managers involved in developing their companies'Internet-based strategies, and to anyone interested in how to buy or sell on the Net.

The papers are organized in topical sections on privacy in e-voting, e-polls and e-surveys; security and privacy in new computing paradigms; privacy in online social networks; e-government and e-participation; legal issues. The book also contains the extended abstracts describing progress within European research and development projects on security and privacy in the cloud; secure architectures and applications; enabling citizen-to-government communication.

Revisiting the Codex Buranus Tristan E. Franklinos,Henry Hope,2020 Enables the less well-known aspects of the Codex Buranus to receive greater scrutiny, and bring new perspectives to bear on the more thoroughly explored parts of the manuscript. Making accessible existing discourse and encouraging fresh debates on the codex, the essays advocate fresh modes of engagement with its contents, contexts, and composition.

Acupuncture Therapy for Neurological Diseases Ying Xia,Xiaoding Cao,Gen-Cheng Wu,Jieshi Cheng,2010-09-08 Acupuncture therapy has been practiced in China and other Asian countries for more than two thousand years. Modern clinical research has confirmed the impressive therapeutic effect of acupuncture on numerous human ailments, such as controlling pain, nausea, and vomiting. However, the biological mechanisms of acupuncture are still under debate. In Traditional Chinese Medicine (TCM), the mechanism of acupuncture therapy is explained by a meridian model. According to this model, acupuncture is believed to treat the diseased organs by modulating two conditions known as Yin and Yang, which represent all the opposite principles that people find in the universe, both inside and outside the human body. Yin and Yang complement each other, and are subjected to changes between each other. The balance of Yin and Yang is thought to be maintained by Qi, an energy substance flowing constantly through the meridian, a network connecting all the organs of the body. The illness, according to this theory, is the temporary dominance of one principle over the other, owing to the blockade of the Qi from flowing through the meridian under certain circumstance. The axiom of "No stagnation, No pain" in TCM summarizes this concept. Thus, the goal of acupuncture treatment is to restore the balance of Yin and Yang conditions in the diseased organ(s). This theory has been considered to be useful to guide this ancient therapy, such as carrying out diagnosis, deciding on the principle, and selecting the acupoints.

Community, Economy and COVID-19 Clifford J. Shultz, II,Don R. Rahtz,M. Joseph Sirgy,2022-08-23 This volume explores the impact of the COVID-19 pandemic on the health, safety, and socioeconomic well-being of community residents of selected countries around the world. It is built on an overarching framework of studying community well-being, applied here to the analyses of one of the most significant crises of our time. Most important are the lessons learned from the experiences in these countries – including insights and recommendations on how to mitigate future pandemics. Building on years of research, each chapter is written by an accomplished scholar with interests and expertise on various assessments of community well-being development in the country of study. The authors share cases and analyses, and highlight failures and successes; they offer sound policy recommendations on how to restore the health, safety, and multidimensional wellness of community residents, and how to decrease the likelihood and impact of future crises. Some of the policy recommendations in this multi-country compendium can be used to assist crisis prevention and recovery, beyond pandemics. The volume shows how the lessons learned and shared from community responses to the pandemic can provide critical and useful policy insights to shape best practices in mitigating other disasters like hurricanes, floods, earthquakes, tornadoes, wars, riots, acts of domestic and international terrorism, weapons of mass destruction and industrial accidents. This is a must-read for researchers across the social sciences, health sciences, and management studies, and for government and non-government professionals involved in community health and well-being.

Cyberbullying and Online Harms Helen Cowie,Carrie-Anne Myers,2023-05-02 Cyberbullying and Online Harms identifies online harms and their impact on young people, from communities to campuses, exploring current and future interventions to reduce and prevent online harassment and aggression. This important resource brings together eminent international researchers whose work shines a light on social issues such as bullying/cyberbullying, racism, homophobia, hate crime, and social exclusion. The text collates into one volume current knowledge and evidence of cyberbullying and its effect on young people, facilitating action to protect victims, challenge perpetrators and develop policies and practices to change cultures that are discriminatory and divisive. It also provides a space where those who have suffered online harms and who have often been silenced in the past may have a voice in telling their experiences and recounting interventions and policies that helped

them to create safer spaces in which to live in their community, study in their educational institutions and socialise with their peer group. This is essential reading for researchers, academics, undergraduates and postgraduates in sociology, psychology, criminology, media and communication studies, as well as practitioners and policymakers in psychology, education, sociology, criminology, psychiatry, counselling and psychotherapy, and anyone concerned with the issue of bullying, cyberbullying and online harms among young people in higher education.

English Language as Hydra Vaughan Rapatahana,Pauline Bunce,2012-06-22 In far too many places, the worldwide trade in English-language teaching, testing and publishing has become a self-perpetuating, self-congratulating, neocolonial monster ... a veritable multi-headed Hydra. Too often the English language industry aggressively promotes itself as some sort of "uplifting", "essential", "proper" or even "better" means of communication than any other language. Unfortunately, its relentless global outreach is taking place at the direct expense, and the active denigration, of local and regional languages – not to mention individual identities. English Language as Hydra brings together the voices of linguists, literary figures and teaching professionals in a wide-ranging exposé of this monstrous Hydra in action on four continents. It provides a showcase of the diverse and powerful impacts that this ever-evolving, gluttonous beast has had on so many non-English language cultures - as well as the surreptitious, drug-like ways in which it can infiltrate individual psyches.

Polymers and Composites Richard Arthur Pethrick,2007 This book aims to present the progress in the science of polymers and monomer, synthesis, study of properties and application of polymers, polymer mixtures, composites and filled polymers. This book collects original articles and reviews important for both pure and applied chemistry. The application of polymers in medicine, composites and nanocomposites, reduction of polymer material combustibility, kinetics and the mechanism of various reactions are of special attention. Both synthetic and natural polymers are discussed. Some part of the collection, related to chemistry and physics of polymers, is devoted to oligomers and low-molecular compounds. This book brings together new and exciting research in this field.

Scenarios and Responses to Future Deep Oil Spills Steven A. Murawski,Cameron H. Ainsworth,Sherryl Gilbert,David J. Hollander,Claire B. Paris,Michael Schlüter,Dana L. Wetzel,2019-07-04 It has often been said that generals prepare for the next war by re-fighting the last. The Deepwater Horizon (DWH) oil spill was unlike any previous – an underwater well blowout 1,500 meters deep. Much has been learned in the wake of DWH and these lessons should in turn be applied to both similar oil spill scenarios and those arising from "frontier" explorations by the marine oil industry. The next deep oil well blowout may be at 3,000 meters or even deeper. This volume summarizes regional (Gulf of Mexico) and global megatrends in marine oil exploration and production. Research in a number of key areas including the behavior of oil and gas under extreme pressure, impacts on biological resources of the deep sea, and the fate of oil and gas released in spills is synthesized. A number of deep oil spills are simulated with detailed computer models, and the likely effects of the spills and potential mitigation measures used to combat them are compared. Recommended changes in policies governing marine oil exploration and development are proposed, as well as additional research to close critical and emerging knowledge gaps. This volume synthesizes state-of-the-art research in deep oil spill behavior and response. It is thus relevant for government and industry oil spill responders, policy formulators and implementers, and academics and students desiring an in-depth and balanced overview of key issues and uncertainties surrounding the quest for deep oil and potential impacts on the environment.

Internet and Network Economics Xiaotie Deng,2005-12-05 This book constitutes the refereed proceedings of the First International Workshop on Internet and Network Economics, WINE 2005, held in Hong Kong, China in December 2005. The 108 revised full papers presented together with 2 invited talks were carefully reviewed and selected from 372 submissions. There are 31 papers in the main program and 77 papers presented in 16 special tracks covering the areas of internet and algorithmic economics, e-commerce protocols, security, collaboration, reputation and social networks, algorithmic mechanism, financial computing, auction algorithms, online algorithms, collective rationality, pricing policies, web mining strategies, network economics, coalition strategies, internet protocols, price sequence, and equilibrium.

Computers and Games for Mental Health and Well-Being Yasser Khazaal,Jérôme Favrod,Anna Sort,François Borgeat,Stéphane Bouchard,2018-07-12 Recent years have seen important developments in the computer and game industry, including the emergence of the concept of serious games. It is hypothesized that tools such as games, virtual reality, or applications for smartphones may foster learning, enhance motivation, promote behavioral change, support psychotherapy, favor empowerment, and improve some cognitive functions. Computers and games may create supports for training or help people with cognitive, emotional, or behavioral change. Games take various formats, from board games to informatics to games with interactive rules of play. Similarly, computer tools may vary widely in format, from self-help or assisted computerized training to virtual reality or applications for smartphones. Some tools that may be helpful for mental health were specifically designed for that goal, whereas others were not. Gamification of computer-related products and games with a numeric format tend to reduce the gap between games and computers tools and increase the conceptual synergy in such fields. Games and computer design share an opportunity for creativity and innovation to help create, specifically design, and assess preventive or therapeutic tools. Computers and games share a design conception that allows innovative approaches to overcome barriers of the real world by creating their own rules. Yet, despite the potential interest in such tools to improve treatment of mental disorders and to help prevent them, the field remains understudied and information is under-disseminated in clinical practice. Some studies have shown, however, that there is potential interest and acceptability of tools that support various vehicles, rationales, objectives, and formats. These tools include traditional games (e.g., chess games), popular electronic games, board games, computer-based interventions specifically designed for psychotherapy or cognitive training, virtual reality, apps for smartphones, and so forth. Computers and games may offer a true opportunity to develop, assess, and disseminate new prevention and treatment tools for mental health and well-being. Currently, there is a strong need for state-of-the-art information to answer questions such as the following: Why develop such tools for mental health and well-being? What are the potential additions to traditional treatments? What are the best strategies or formats to improve the possible impact of these tools? Are such tools useful as a first treatment step? What is the potential of a hybrid model of care that combines traditional approaches with games and/or computers as tools? What games and applications have already been designed and studied? What is the evidence from previous studies? How can such tools be successfully designed for mental health and well-being? What is rewarding or attractive for patients in using such treatments? What are the worldwide developments in the field? Are some protocols under development? What are the barriers and challenges related to such developments? How can these tools be assessed, and how can the way that they work, and for whom, be measured? Are the potential benefits of such products specific, or can these additions be attributed to nonspecific factors? What are the users' views on such tools? What are the possible links between such tools and

social networks? Is there a gap between evidence-based results and market development? Are there any quality challenges? What future developments and studies are needed in the field?
