JEmbedAll manual Dan-Marius Sabau,2017-01-29

JEmbedAll is a Joomla component and plugin the you can purchase from <http://www.goldengravel.eu>, something you can add to your website and start embedding videos, images and more other features to your site. The role of the component is mainly to configure the data you are embedding using the plugin, but it also offer support for downloading files and generating ebooks. The package it's easy to configure and to work with. Some features have to be configured (there is a configuration section just for that in the backend) in order to be embedded and used properly in the frontend, other features are integrated and you just used them as they are. Even so, you may set some details right using the CSS attached to the predefined or user-defined strings used for embed code on your Joomla site. Purchase it and download the package for your Joomla version, then install it in order to have a powerful tool to embed videos (from YouTube, Google, Vimeo, Metacafe, Veoh, Dailymotion, RedTube and others), documents, images and Google forms used for quiz. You can also embed Facebook pages, plugins, images and videos, Community Builder advanced searches, Prezi and Scribd documents. Starting with the 1.3 version you can configure and embed any number of conditional forms and you can configure the Open Graph protocol and Twitter cards data, with all the data and thumbnails ready for Facebook and all the sites. The online manual and the generated ebook based on it are very detailed about each feature, but you can always ask questions when you

don't understand something or they are not clear enough. The only condition to embed the videos and files is that they have to be online: upload your videos on YouTube or Vimeo (for example) and upload your files (the documents can be Portable Document Format - PDFs, Word docs, Power Point, SpreadSheets and any other documents recognized by Google Docs) on your server or Google servers and embed them into your sites. The path of the document does not have to be some on docs.google.com (but that works fine), it works as well they are on any other website but you have to enter the full path of the file. You can define, configure and embed any number of jQuery images sliders into your site. You can define and use any number of Popups on your Joomla site. You can embed Google maps and direction into your site. You can define and configure file packages (they can contain any number of files) the visitors can download for free or for money (Paypal payment included!). You can define, configure and embed Community Builder advanced searches (this component works with any CB version!). Since JEmbedAll version 1.3 the search results can open in the same window, in a different window or in a modal window. Beyond that, you can give every user several powerful tools: they can save the search forms and search results, they can embed that saved search results as users lists, they can use CB privacy - a tool that restricts access to some fields, or even the users, on searches. You can embed Facebook pages, posts, videos and images (depending on the Facebook privacy - in many cases all this have to be public for everyone to see),

but you can also embed some plugins (Facebook activity, comments, facepile, likebox and recommendations). Starting with the 1.5 version you can generate and download e-books based on your website content. The Paypal payment was modified and extended: you can create shopping carts for files you want sell and the generated e-books.

Recent Advances in Stem Cells Essam M. Abdelalim, 2016-09-14 This volume explores recent advances in the use of pluripotent stem cells (PSCs) and adult stem cells (ASCs) in basic and clinical applications. The chapters discuss use of PSCs for drug screening, genome editing, modeling of kidney, motor neuron diseases, and diabetes as well as their application in cancer; ASCs are discussed in the contexts of banking of umbilical cord stem cells, use of multipotential stromal cells (MSCs) for bone repair, cellular interactions during fracture repair stages, and therapeutic applications of neural crest stem cells and lung stem cells. The text is organized by sections dealing with PSCs and ASCs specifically, presenting the reader with a comprehensive examination of both these forms of stem cells. Expertly authored and drawing from a wealth of international perspectives, Recent

Advances in Stem Cells: From Basic Research to Clinical Applications presents a succinct yet detailed review of cutting-edge research in this rapidly expanding field. This installment of Springer's Stem Cell Biology and Regenerative Medicine series is essential reading for academics, researchers, and clinicians in the fields of cell biology, genetics, nephrology, osteology, oncology, and pulmonology.

Progress in Artificial Intelligence Fernando Moura Pires, Salvador Abreu, 2003-11-06 When we set about organizing EPIA 2003 in Porto during the APPIA meeting at the previous edition of the conference, EPIA 2001, it was decided that it would be organized by Fernando Moura Pires (Fajp e) and myself. We chose Beja as the venue to host the conference, as it provided a good support infrastructure and Fernando had a good working relationship with several people at the Beja Polytechnic Institute. Shortly thereafter, Fernando came to know that he was ailing from a

disease that wastotakehislifeinMay2003.
 Aswithmanyotherprojectsinwhichhegot involved,
 Fernando clung to the organization of this
 conference with dedication and perseverance, even
 while knowing that he might not see the results of
 his work. EPIA 2003 is a tribute to his work.
 Taking up on the successful experience gained from
 EPIA 2001, we decided to structure EPIA 2003 as a
 set of?ve distinct workshops, roughly re?ecting
 the panorama of AI research in Portugal. Special
 thanks are due to the organizers of each workshop,
 for the quality and timeliness of the work they
 carried out. The conference was all the more
 interesting because of the eight invited p-
 sentations and tutorials, by Alexander Bockmayr,
 Amb?lcar Cardoso, Dario F- reano, HaroldBoley,
 PedroDomingos, PieterAdriaans,
 VeronicaDahlandVitor Santos Costa. There are short
 one-page abstracts included in these proceedings
 for some of these presentations.

Case-Based Reasoning Research and Development

Klaus-Dieter Althoff, Ralph Bergmann, L. Karl Branting, 2003-07-31 The biennial International Conference on Case-Based Reasoning (ICCBR) - ries, which began in Sesimbra, Portugal, in 1995, was intended to provide an international forum for the best fundamental and applied research in case-based reasoning (CBR). It was hoped that such a forum would encourage the growth and rigor of the field and overcome the previous tendency toward isolated national CBR communities. The foresight of the original ICCBR organizers has been rewarded by the growth of a vigorous and cosmopolitan CBR community. CBR is now widely recognized as a powerful and important computational technique for a wide range of practical applications. By promoting an exchange of ideas among CBR researchers from across the globe, the ICCBR series has facilitated the broader acceptance and use of CBR. ICCBR-99 has continued this tradition

by attracting high-quality research and applications papers from around the world. Researchers from 21 countries submitted 80 papers to ICCBR-99. From these submissions, 17 papers were selected for long oral presentation, 7 were accepted for short oral presentation, and 19 papers were accepted as posters. This volume sets forth these 43 papers, which contain both mature work and innovative new ideas.
