Susan L. Madden

Patrick Bouvier Kennedy Michael S. Ryan, RRT- NPS ,2015 On August 9, 1963, the infant son of John and Jacqueline Kennedy, born premature at 34 weeks, died of a common lung ailment after 39 hours of life. This book tells, for the very first time, the entire story of those tense and desperate days from the viewpoint of Patrick's pediatrician and the team of doctors who tried to save him. It also chronicles the captivating history of newborn care and the way the death of the Kennedy baby, faced by his heartbroken parents with consummate courage and grace, triggered a worldwide medical response that ultimately led to major advances in newborn care that have saved the lives of millions of infants. The Babies Hospital of New York Michael Weiner, Stephen E. Novak, PhD, 2022-01-31 The Babies Hospital, now known as Morgan Stanley Children's Hospital, was founded in 1887 by Drs. Sarah and Julia McNutt in a brownstone on Fifty-Fifth Street and Lexington Avenue. The hospital is the first freestanding children's hospital in New York City and the fourth oldest in the United States. However, the hospital traces its roots to the establishment of the Vagelos College of Physicians and Surgeons of Columbia University, then King's College, more than 250 years ago. In 1929, the hospital relocated to a new 204-bed facility as part of the Columbia-Presbyterian Medical Center. The New York Times referred to the new Babies Hospital as the last word in hospital design and equipment. Under the leadership of Rustin McIntosh from 1931 to 1960, the hospital became a beacon for discovery and innovation, assembled a department of noted subspecialists, and was one of the first children's hospitals to develop programs in neonatology, surgery, radiology, neurology, hematology-oncology, and psychiatry. Michael Weiner, MD, Hettinger professor of pediatrics at Columbia University Irving Medical Center, is a vice chair of pediatrics, former director of the Division of Pediatric Oncology, and an author of *Living Cancer: Stories of an Oncologist, Father, Survivor and a Philanthropist*. Stephen E. Novak has been the head of Archives & Special Collections at Columbia's Augustus C. Long Health Sciences Library since 1997. The images in the book come from the rich photographic resources of the library.

The Essential Baby Care Guide Rebecca Chicot, Diana Hill, Robert Winston, 2015-09-10 Having a baby is a fantastic event but it can be intense and challenging. From the start, there are so many

vital things to understand and parents don't always know to whom or where to turn. With a panel of experts including Professor Robert Winston, The Royal College of Paediatrics and St John Ambulance offering up-to-date advice, this book gives well researched, medically backed-up information to help parents make the right decisions for themselves and for their baby. Looking at a range of subjects such as sleeping, feeding and first aid, each chapter is structured around common questions asked by parents. Amongst many others, the areas covered include: breastfeeding; how to maintain a bond between mother and baby if you choose to formula feed; moving to solids; health issues such as recognising a meningitis rash; when to go to hospital, immunisations and how they work; how to soothe your baby when crying; a guide to your baby's sleeping patterns; a guide to your baby's social, physical and cognitive development; and finally advice on safety and infant first aid. The Essential Baby Care Guide is the third in the series of reference books compiled by The Essential Parent Company and advised by Professor Robert Winston. With tips, lists of do's and don'ts and case studies, this book gives you everything you need to know to look after your new baby in the first twelve months.

SickKids David Wright, The Hospital for Sick Kids, 2017-01-06 Toronto's Hospital for Sick Children is the most famous medical institution in Canada. In addition to being the largest pediatric centre in North America, it has earned an international reputation for clinical care and research that has influenced generations of health care practitioners across the country and around the world. In a very real sense, hospital staff have touched the lives of tens of thousands of children and their families. SickKids has an equally remarkable history - from its humble origins in rented houses in Victorian Toronto, the Hospital would flourish to become an influential paediatric institution, pioneering Pasteurization, the Iron Lung for Polio, Pablum, the Mustard Procedure for 'Blue Babies', and the discovery of the gene for Cystic Fibrosis. It would also be the site of two of most famous medical controversies in modern Canadian history -- the suspected murder of two dozen babies in the early 1980s and, more recently, the whistle-blowing controversy involving the research scientist, Nancy Olivieri. David Wright's History of The Hospital for Sick Children chronicles this remarkable history of the SickKids, including its triumphs and tragedies, its discoveries and dead-ends. In doing so, Wright has crafted a compelling and accessible history of SickKids that anchors Toronto's children's hospital within the broader changes affecting Canadian society and medical practice over the last century.

Dr. Spock's Baby and Child Care Benjamin Spock, Robert Needlman, 2011-04-26 The standard guide to baby and child care, from physical to moral development, includes new material on nontraditional family structures, ADHD, and children and the media.

is inventive, hysterical, and touching. Karen Rizzo wraps a timeless drama about the love between mothers and daughters in a fresh, snappy package for the social media age.” —CHRISTINA SCHWARZ, author of *The Edge of the Earth* and *Drowning Ruth*, an Oprah’s Book Club Selection

Before there were *Real Housewives* and *Tiger Moms*, there was Ruth Sternberg, the hugely popular First Mother of Mommy Blogging—or, as Ruth’s daughter, Abbie prefers to call her, the First Lady of Cyber Exploitation. Eighteen year-old Abbie has finally found her way out of the limelight, by moving a solid five hundred miles away from Ruth and her “maternal instincts.” But when she hears that her ailing, beloved grandmother is moving in with Ruth, she suspects that her mother has found a new blog subject to exploit. Abbie kidnaps Grandma to save her from the same fate, and thus begins an uproarious battle of wills. *Famous Baby* wisely and hilariously explores mother love, identity, and the hazards of parental over-sharing in the social media age. Karen Rizzo, who lives with her actor husband and two children in Los Angeles, California, is the author of *Things to Bring, S#!T to Do... and Other Inventories of Anxiety*, a memoir centered around her penchant for lists. Her writing has appeared in the *Los Angeles Times*, *Salon*, *Living Fit*, and women’s humor anthologies, and her plays have been staged at several theatres. *Famous Baby* is her first novel.

Celebrities Giving Back Kayleen Reusser, 2010-12-23

It takes someone with compassion to see a need. It takes someone with perseverance to achieve a goal. Dozens of Americans who hold prestigious positions—actors, athletes, politicians, business leaders—work tirelessly every day to improve the lives of people around the world. From Bono to Oprah Winfrey, Jimmy Carter to Tony Hawk, the stories in this book will amaze you. One of the richest men in the world left his company to develop programs to cure AIDS. A popular Latin American musician was so saddened by the sight of homeless children that she named her charity after them. Another woman made her dying sister a promise—and kept it—to educate women about breast cancer. These people were not content to allow suffering to happen. They have brought great changes to the world, and their good deeds have inspired others to take action. How can you become involved in your community and improve people’s lives? You are never too young—or too old—to make a difference.

Practical Decision Making in Health Care Ethics Raymond J. Devettere, 2009-12-04

For nearly fifteen years *Practical Decision Making in Health Care Ethics* has offered scholars and students a highly accessible and teachable alternative to the dominant principle-based theories in the field. Devettere’s approach is not based on an ethics of abstract obligations and duties, but, following Aristotle, on how to live a fulfilled and happy life—in short, an ethics of personal well-being grounded in prudence, the virtue of ethical decision making. This third edition is revised and updated and includes discussions of several landmark cases, including the tragic stories of Terri Schiavo and Jesse Gelsinger (the first death caused by genetic research). Devettere addresses new topics such as partial-birth abortion law, embryonic stem cell research, infant euthanasia in The Netherlands, recent Vatican statements on feeding tubes, organ donation after cardiac death, new developments in artificial hearts, clinical trials developed by pharmaceutical companies to market new drugs, ghostwritten scientific articles published in major medical journals, and controversial HIV/AIDS research in Africa. This edition also includes a new chapter on the latest social and political issues in American health care. Devettere’s engaging text relies on commonsense moral

concepts and avoids academic jargon. It includes a glossary of legal, medical, and ethical terms; an index of cases; and thoroughly updated bibliographic essays at the end of each chapter that offer resources for further reading. It is a true classic, brilliantly conceived and executed, and is now even more valuable to undergraduates and graduate students, medical students, health care professionals, hospital ethics committees and institutional review boards, and general readers interested in philosophy, medicine, and the rapidly changing field of health care ethics.

The Children's Hospital Chris Adrian, 2007-12-01 A surreal and magical novel of hope in the midst of apocalypse by the acclaimed author of *Gob's Grief*—"one of the most revelatory novels in recent memory" (San Francisco Chronicle). Chris Adrian's debut novel, *Gob's Grief*, was hailed as "a work unlike any that has come before it" (The Economist). Now, Adrian delivers a second work of visionary imagination in this magnificent tale of a children's hospital that survives, afloat, after the Earth is flooded beneath seven miles of water, and a young medical student who finds herself gifted with strange powers and a frightening destiny. Jemma Claflin is a third-year medical student at the unnamed hospital that is the only thing to survive after an apocalyptic storm. Inside the hospital, beds are filled with children with the most rare and complicated diseases. In this new-age Noah's Ark, there are two of each kind of sickness. As Jemma and her fellow doctors attempt to make sense of what has happened to the world, Jemma becomes a Moses figure, empowered with the mysterious ability to heal the sick by way of a green fire that shoots from her belly. Chris Adrian, a pediatrician and Harvard theologian, offers a work of stunning scope and mesmerizing detail that is "cleverly conceived and executed brilliantly" (San Francisco Chronicle).
