Tourism and Regional Development Maria Giaoutzi, 2017-05-15 Tourist visits used to be a less common activity in the past. However, more people than ever now make leisure trips, making this an era of mass tourism. This drastic change in spatial behaviour is not only caused by economic prosperity, but the scale of this phenomenon means that it is able to generate economic growth, making tourism a key factor in regional development policy. One of the main challenges of current regional policy is to market the attractiveness of an area, thereby increasing tourist visits and subsequent revenue. In particular, regions are attempting this through the use of Information and Communication Technologies (ICT), which offer information on interesting places, and efficient methods for organizing and booking trips. This book examines the interconnections between tourism, ICT and regional development. Bringing together a range of European case studies illustrating various ICT and policy innovations, it not only critiques current activity by regions in terms of tourism development, but also considers how this sector is likely to continue to grow.

Echoing Voices in Italian Literature Teresa Franco, Cecilia Piantanida, 2019-01-08 This collection of essays explores the reception of classics and translation from modern languages as two different, yet synergic, ways of engaging with literary canons and established traditions in 20th-century Italy. These two areas complement each other and equally contribute to shape several kinds of identities: authorial, literary, national and cultural. Foregrounding the transnational aspects of key concepts such as poetics, literary voice, canon and tradition, the book is intended for scholars and students of Italian literature and culture, classical reception and translation studies. With its two shifting focuses, on forms of classical tradition and forms of literary translation, the volume brings to the fore new configurations of 20th-century literature, culture and thought.

The AWRD data archive includes an extensive collection of datasets covering the African continent, including: surface waterbodies, watersheds, aquatic species, rivers, political boundaries, population density, soils, satellite imagery and many other physiographic and climatological data. This technical paper is the second of two publications about the AWRD, and it includes a technical manual for spatial analysts and a workbook for university students and teachers. The first part of this technical paper is available separately (ISBN 9789251057407).

E-commerce con PayPal Massimiliano Bigatti, 2010-10-19T00:00:00+02:00 PayPal è un servizio web che offre a utenti e titolari di negozi e-commerce una soluzione rapida e sicura per gestire pagamenti e transazioni commerciali, con pochi clic e senza condividere dati finanziari. Oggi PayPal è per i pagamenti online quello che è Google per le ricerche e Amazon per la vendita di libri: si tratta di una delle grandi web-company di successo. Nel mondo sono milioni gli utenti che adottano PayPal come modalità privilegiata, o esclusiva, di pagamento in Rete. Questa vasta utenza fidelizzata e affezionata è uno dei motivi che spinge chi fa business online a passare a PayPal. Questo libro, partendo dalla spiegazione del funzionamento e dei motivi del successo di PayPal, si rivolge a chi, gestore di negozi di e-commerce o sviluppatore, vuole implementare una soluzione di pagamento su base PayPal. Si parte illustrando lo sviluppo di soluzioni standard, per poi introdurre l'uso delle API e l'implementazione di soluzioni sempre più complesse. Note, suggerimenti e appendici permettono di approfondire e affrontare le problematiche più comuni, come quelle connesse ai pagamenti multipli o ricorrenti, ai rimborsi e alla reportistica. A corollario di tutto l'esperienza PayPal in merito allo sviluppo di carrelli e modalità di pagamento funzionali all'incremento del business.

HTML, CSS, Bootstrap, Php, Javascript and MySql Olga Maria Stefania Cucaro, 2022-02-08 This book aims to initiate those who want to independently create a website, to the world of domains and programming linked to the web. The author conceived this work as a scientific work intended for educational and study use for all those who approach the study of client-side and server-side programming. In the first place the difference between the various domains existing on the network will be explained and at a later time we will try to explain the CSS and HTML and then enter the PHP programming (server side) and JavaScript (client side) with the creation of databases via phpMyAdmin. All this will be explained through an example website created specifically using a free Bootstrap for

simplicity and basic convenience and programming a control panel with login connected to the site via database for inserting images directly from the web by uploading them to the database created with connected phpMyAdmin to the site. Obviously, after entering the world of databases and programming, you can apply this knowledge to any other need for iteration by the user required by the site project. The aim of this study is not to create simple web pages that today can be done easily with WordPress or other easy-to-use software, but for purely educational purposes to explain the use of databases and server and client-side programming to make a dynamic otherwise static site. In summary, this work can be useful for those who want to approach the fascinating world of website programming from the beginning.
