Launch! Advertising and Promotion in Real Time Michael Solomon, 2009 Launch!
Advertising and Promotion is written for advertising and promotion courses taught to students in the business school and journalism & mass communication students. This textbook is the first of its kind to teach advertising concepts by reverse engineering a real advertising campaign from beginning to end. In April 2007, SS+K, an innovative New York City communications agency,

launched the first ever branding campaign for msnbc.com with the tag A Fuller Spectrum of News. Launch! follows that campaign from initial agency pitch through roll-out of print and media assets to post-campaign analysis. Throughout, it exposes readers to the theory and concepts of advertising and promotion, and the personalities and decisions that drove this campaign. The book takes a rare look behind the curtain - even letting you see some of the paths not chosen by the agency and client. Students get a realistic sense of how theory plays out in practice, and get a flavor for the exciting field of advertising and promotion. And, they consistently learn the perspectives of both the advertising agency (where many journalism and communications students will work) and the client (where many marketing majors will work). This is a unique book, with a unique perspective, by a unique author team, and you won't find this kind of insight in any other text on the market. We think you're going to love it! This textbook has been used in classes at: Ball State University, Emerson College, Florida Institute of Technology, Grand Valley State University, Johnson County Community College, Manchester Business School, McLennan Community College, Michigan State University, North Hennepin Community College, Pierce College, Rochester Institute of Technology, Saint Louis University, Salem State College, South Dakota State University, Texas State University, Texas Tech University, University of New Hampshire, University of North Carolina, University of Notre Dame, University of South Florida, Virginia Tech, Western Kentucky University.

Managed by the Markets Gerald F. Davis, 2009-03-26 The current economic crisis reveals just how central finance has become to American life. Problems with obscure securities created on Wall Street radiated outward to threaten the retirement security of pensioners in Florida and Arizona, the homes and college savings of families in Detroit and Southern California, and ultimately the global economy itself. The American government took on vast new debt to bail out the financial system, while the government-owned investment funds of Kuwait, Abu Dhabi, Malaysia, and China bought up much of what was left of Wall Street. How did we get into this mess, and what does it all mean? *Managed by the Markets* explains how finance replaced manufacturing at the center of the American economy and how its influence has seeped into daily life. From corporations operated to create shareholder value, to banks that became portals to financial markets, to governments seeking to regulate or profit from footloose capital, to households with savings, pensions, and mortgages that rise and fall with the market, life in post-industrial America is tied to finance to an unprecedented degree. *Managed by the Markets* provides a guide to how we got here and unpacks the consequences of linking the well-being of society too closely to financial markets.

Consumer Behavior and Marketing Strategy J. Paul Peter, Jerry Corrie Olson, 1996 This work shows how the various elements of consumer analysis fit together in an integrated framework, called the Wheel of Consumer Analysis.

Psychological, social and behavioural theories are shown as useful for understanding consumers and developing more effective marketing strategies. The aim is to enable students to develop skills in analyzing consumers from a marketing management perspective and in using this knowledge to develop and evaluate marketing strategies. The text identifies three groups of concepts - affect and cognition, behaviour and the environment - and shows how these they influence each other as well as marketing strategy. The focus of the text is managerial, with a distinctive emphasis on strategic issues and problems. Cases and questions are included in each chapter.
