**The Hidden Records** Wayne Herschel, Birgitt Lederer, 2003 Identifies the origins of Leonardo Da Vinci's 'Vitruvian man' human blueprint code with Stonehenge and the pyramid sites around the world. The author proves that Stonehenge has the same cosmic solution and that the pyramid layouts of the Maya, the Incas, the Khmer and many others around the world, all repeat the same star map theme.

**Sexual Mutilations** George C. Denniston, Marilyn Fayre Milos, 2013-03-09 Sexual mutilation is a global problem that affects 15.3 million children and young adults annually. In terms of gender, 13.3 million boys and 2 million girls are involuntarily subjected to sexual mutilation every year. While it is tempting to quantify and compare the amount of tissue removed from either gender, no ethical justification can be made for removing any amount of flesh from the body of another person. The violation of human rights implicit in sexual mutilation is identical for any gender. The violation occurs with the first cut into another person's body. Although mutilation is a strong term, it precisely and accurately describes a condition denoting any disfigurement or injury by removal or destruction of any conspicuous or essential part of the body. While such terms as circumcision and genital cutting are less threatening to our sensitivities, they ultimately do a disservice by masking the fact of what is actually being done to babies and children. Although the courageous example of the survivors of sexual mutilation indicates that humans can certainly live and even reproduce without all of their external sexual organs, this biological phenomenon does not, however, justify subjecting a person to sexual mutilation. The remarkable resilience of the human body is a testament to the importance nature places on reproduction rather than a vindication for surgical practices that compromise this function.
