Write Your Book in a Flash Dan Janal,2018-04-18 Write your business book without wasting time or money—a “superb” guide for executives, entrepreneurs, and thought leaders (Henry DeVries, author of *Persuade with a Story*). *Write Your Book in a Flash* shows how to get focused fast, so you can write your book without tearing your hair out. As with any enterprise, writing a book requires a clear system—or nothing gets finished. Unlike books that show you why you should write a book, this

book actually shows you how to write a book! You'll discover: How to write a simple outline that makes the writing process faster and easier How to get stunning testimonials to help sell your book How to find and manage beta readers who will share honest feedback before the book is published How to research interesting ideas, stories, and facts so you never run out of ideas or information How to overcome "The Imposter Syndrome" and other limiting beliefs that stifle nearly every would-be author Clear examples that show you what to do (and what not to do) Empowering exercises that show you how to write better and faster Simple how-to steps anyone can follow to write a book Business leaders who write books get more clients at higher fees, have more impact, develop more credibility, and have more influence where it matters most: in front of clients, customers, and prospects. This is the perfect book to read if you are a thought leader, entrepreneur or business executive who wants to write a business book to build your personal brand, open doors to new opportunities, and leave a legacy of wisdom to future generations.

Status and New Capabilities of Computer Program
HEC-6: "Scour and Deposition in Rivers and
Reservoirs" Robert C. MacArthur, 1990 Last year the Hydrologic Engineering Center (HEC) and the Waterways

Experiment Station incorporated the results from more than ten years of research and development into a new version of computer program HEC-6: 'Scour and Deposition in Rivers and Reservoirs' (HEC, 1977). Because of the extensive modifications made to HEC-6, an entirely new User's Manual was also prepared. HEC released a Beta Test Version of the program in the fall of 1989, for field testing. Public release of the new version of HEC-6 is scheduled for September 1990. This paper describes the present status of the program as of April 1990, the expanded capabilities, and the improved documentation to be included in the forthcoming release of computer program HEC-6. E.W. Scripps and the Business of Newspapers Gerald J. Baldasty, 1999 Scripps's innovations included the creation of a telegraphic news service and an illustrated news features syndicate and the application of modern business practices to his chain of more than forty newspapers. His newspapers, aimed at working-class readers, were intended to be advocates for the common people and crusaded for lower streetcar fares, free textbooks for

public school children, municipal ownership of utilities, pure food legislation, and many other causes.

Cincinnati Radio Michael A. Martini,2011 Like radio listeners in many other cities its size, Greater Cincinnatians have kept their ears tuned to their local radio stations for music, news, and entertainment for nearly a century. However, unlike those cities, Cincinnati enjoyed several unique broadcast stories ranging from some of the earliest forays into radio dramatics to the country's first 500,000-watt superpower radio station. The listeners were treated to several up-and-coming celebrities like Doris Day, Rosemary Clooney, Andy Williams, and Fats Waller; the rise of three major communications corporations; and ultimately, an amazing array of nationally broadcast network shows and talents that, for a brief period, placed the city's broadcasters behind only New York and Chicago in terms of importance. With rare and often unpublished images, Cincinnati Radio attempts to capture the first 50 years of that golden era of Cincinnati radio broadcasting in both word and picture.

Maps with the News Mark Monmonier,2018-12-01

Maps with the News is a lively assessment of the role of cartography in American journalism. Tracing the use of maps in American news reporting from the eighteenth

century to the 1980s, Mark Monmonier explores why and how journalistic maps have achieved such importance. A most welcome and thorough investigation of a neglected aspect of both the history of cartography and modern cartographic practice.—Mapline A well-written, scholarly treatment of journalistic cartography. . . . It is well researched, thoroughly indexed and referenced . . . amply illustrated.—Judith A. Tyner, *Imago Mundi* There is little doubt that *Maps with the News* should be part of the training and on the desks of all those concerned with producing maps for mass consumption, and also on the bookshelves of all journalists, graphic artists, historians of cartography, and geographic educators.—W. G. V. Balchin, *Geographical Journal* A definitive work on journalistic cartography.—Virginia Chipperfield, *Society of University Cartographers Bulletin*

Comics through Time [4 volumes] M. Keith Booker, 2014-10-28 Focusing especially on American comic books and graphic novels from the 1930s to the present, this massive four-volume work provides a colorful yet authoritative source on the entire history of the comics medium. Comics and graphic novels have recently become big business, serving as the inspiration for blockbuster Hollywood movies such as the Iron Man series of films and the hit television drama *The Walking Dead*. But comics have been popular throughout the 20th century despite the significant effects of the restrictions of the Comics Code in place from the 1950s through 1970s, which prohibited the depiction of zombies and use of the word horror, among many other rules. *Comics through Time: A History of Icons, Idols, and Ideas* provides students and general readers a one-stop resource for researching topics, genres, works, and artists of comic books, comic strips, and graphic novels. The comprehensive and broad coverage of this set

is organized chronologically by volume. Volume 1 covers 1960 and earlier; Volume 2 covers 1960–1980; Volume 3 covers 1980–1995; and Volume 4 covers 1995 to the present. The chronological divisions give readers a sense of the evolution of comics within the larger contexts of American culture and history. The alphabetically arranged entries in each volume address topics such as comics publishing, characters, imprints, genres, themes, titles, artists, writers, and more. While special attention is paid to American comics, the entries also include coverage of British, Japanese, and European comics that have influenced illustrated storytelling of the United States or are of special interest to American readers.
