Biomarkers and Immunotherapy of Hepatic-Biliary-Pancreatic Cancers Yunfei Xu,Hongda Liu,Xuexong Gu,Zheng Gong,2024-02-29 Hepatic-biliary-pancreatic cancers, mainly including hepatocellular carcinoma, cholangiocarcinoma, gallbladder cancer, are highly aggressive malignancies with few treatment options and poor prognoses. Effects of the traditional systemic treatments such as chemotherapy and radiotherapy, are quite limited to hepatic-biliary-pancreatic cancers. For the patients who suffer from hepatic-biliary-pancreatic cancer and lose the opportunity of radical surgery, few targeted drugs are available. Even for the drugs in clinical trial, potential drug targets and prognostic biomarkers for hepatic-biliary-pancreatic cancer are less studied compared to other common cancers such as lung cancer. Prognostic biomarker study is the initiation to explore new drug targets and revelation of the underlying mechanisms of tumor progression.

Scapa 1919 Innes McCartney,2019-05-30 The German High Seas Fleet was one of the most powerful naval forces in the world, and had fought the pride of the Royal Navy to a stalemate at the battle of Jutland in 1916. After the armistice was signed, ending fighting in World War I, it surrendered to the British and was interned in Scapa Flow pending the outcome of the Treaty of Versailles. In June 1919, the entire fleet attempted to sink itself in the Flow to prevent it being broken up as war prizes. Of the 74 ships present, 52 sunk and 22 were prevented from doing so by circumstance and British intervention. Marine archaeologist and historian Dr Innes McCartney reveals for the first time what became of the warships that were scuttled, examining the circumstances behind the loss of each ship and reconciling what was known at the time to what the archaeology is telling us today. This fascinating study reveals a fleet lost for nearly a century beneath the waves.

Jutland 1916 Innes McCartney,2018-04-26 The Battle of Jutland was the largest naval battle and the only full-scale clash of battleships in the First World War. For years the myriad factors contributing to the loss of many of the ships remained a mystery, subject only to speculation and theory. In

this book, marine archaeologist and historian Dr Innes McCartney reveals for the first time what became of the warships that vanished on the night of 31st May 1916, examining the circumstances behind the loss of each ship and reconciling what was known in 1916 to what the archaeology is revealing today. The knowledge of what was present was transformed in 2015 by a ground-breaking survey using the modern technology of multi-beam. This greatly assisted in unravelling the details behind several Jutland enigmas, not least the devastating explosions which claimed five major British warships, the details of the wrecks of the 13 destroyers lost in the battle and the German warships scuttled during the night phase. This is the first book to identify the locations of many of the wrecks, and – scandalously – how more than half of these sites have been illegally plundered for salvage, despite their status as war graves. An essential and revelatory read for anyone interested in naval history and marine archaeology.

Towards Cyberpsychology Giuseppe Riva (Ph.D.),Carlo Galimberti,2001 Drawing on research in the social sciences, communications, and other fields, this book wants to analyze how the online environment is influencing the experience of psychology. However, understanding how the Internet is changing our everyday experience presents a substantial challenge for the psychologists. Now, research in this area is still sparse and limited in both the number and scope of studies: actual research, especially studies with strict methodologies, is only just beginning. The contributions in this book are among the first scientific attempts to take a serious look at various aspects of Internet-related psychology. However, we need not start from scratch. Psychology has a broad knowledge about the factors that affect human behaviour in other setting. So, the papers collected for this book are descriptive and practical-oriented in nature.
