## **Elsevier's Dictionary of Trees M.M.**

Grandtner, 2005-04-08 This dictionary will present all currently accepted generic, specific, sub-specific and variety names of trees, excluding fossil and more recently extinct taxa, hybrids and cultivars. Only the indigenous trees of a continent, those wild species that were natural elements of the spontaneous forest vegetation before the arrival of Europeans or other colonizers, are included. Each generic entry includes the family to which it is assigned, the synonyms of the Latin name, and the English, French, Spanish, trade and other names. For the English and French names the standard name is listed first, followed by other available names with, in parentheses, the countries where they are used. Where appropriate, names in additional languages are also included. Each infrageneric (species, subspecies, variety) entry includes, in addition, the distribution, height, type of foliage, ecological characteristics and main uses of the tree when available. In this volume only taxa indigenous on the North American continent are included, considered in a geographical, not in a political sense. This means from Alaska and Greenland to Panama, including Caribbean, but excluding Hawaii.

*Our 100 Years* Dianne Dodd, 2020-04-21 This engaging study of a still active women's organization is more than a centennial history to make its members proud. It also provides a lively exploration of a unique organization founded by early women leaders in higher education who offered friendship, community engagement, and

lifelong learning. With a leadership of exceptional women, the organization played a largely overlooked role in the women's movement by supporting education and the arts, encouraging young women to pursue higher education and scholarships, and through its advocacy initiatives helped to build the Canadian nation.
