*The Pro Football Hall of Fame 50th Anniversary Book* John Thorn,Joe Horrigan,2012-07-31 There is no question that football is indeed America's most popular sport, and the Pro Football Hall of Fame's 50th Anniversary book totally captures our passion for the game. Having opened its doors in Canton, Ohio on September 7, 1963, the Hall will be celebrating its 50th anniversary year from 2012 to 2013, commencing with the Pro Football Hall of Fame Enshrinement Festival, a ten-day period in early August which culminates in the annual Hall of Fame Game. The Pro Football Hall of Fame Enshrinement Festival draws close to a million fans each year. The book has been crafted by Joe Horrigan, the Hall's VP of Communications/Exhibits, along with John Thorn, creator of Total Football, and the end result is a beautifully bound keepsake for any serious football fan. The 50th Anniversary Book features essays by football writers, broadcasters, and celebrated players. Every living Hall of Famer will contribute a commentary on some aspect of the game and its history; each deceased member will be represented in a sidebar or pullout quote. In addition, the book features rarely seen photos and artifacts of some of the Hall's greatest treasures.

**Legalize Blockchain** Thomas G. Duenser,2023-03-23 In the last decades, digitalization has been enormously pushing innovation with a stunning impact on economy and society. In this book, the author illustrates that blockchain is one strong driver of the future digital economy, enabling a higher level of efficiency, trust, and legal security. As regulation can decide how a jurisdiction can participate in this development, the author discusses the current and future regulatory challenges and explains, why applying financial market laws for all Token Economy is not appropriate and would hinder its development. Consequently, he argues for a new regulatory fundament for Token Economy - as the Principality of Liechtenstein has introduced in 2020 - and explains the political regulatory decisions of

the so-called »Blockchain-Act«. The author pleads also in favour of establishing a new regulatory framework for Token Financial Markets and drafts its cornerstones. In addition to that, he describes the need for an innovation process for the legal framework and emphasizes the importance of the innovation culture of governments and authorities to keep pace with the technological developments and ensure future prosperity.
