Apollo 20. The Disclosure Luca Scantamburlo,2010 Since April 2007, a whistleblower by the name of retiredafb has been shocking the general public with its disclosure: footages and comments posted on YouTube and Revver.com. He claims to be William Rutledge, and the Apollo 20 Commander for the USAF (August 1976). Luca Scantamburlo - ex journalist - has interviewed him and another YouTube user (moonwalker1966delta) who claims to be a former NASA astronaut, and the Apollo 19 Commander (February 1976). Did these presumed secret joint US/USSR space missions take place indeed? The targets would have been some lunar anomalies, on the far side of the Moon. The opinion of the Author is this amazing story contains some kernels of truth, behind the controversial strategy of disclosure (video fakes and misleading data are present). In the book there are the reasons for his opinion, the chronology of his research (with his Web articles already published), the interviews with the two alleged Commanders, and some revelations never published before.

A Guide to Aerial Photo Interpretation Jack Hagerty,2019-03-14 This book is all about Photo Interpretation (PI). However, it's not about the esthetic qualities of photographs, nice as they may be. PI is a quantitative analysis of a photo where you measure things and do some calculations to derive all kinds of valuable information, stuff you probably didn't realize you can get off of even the simplest photos. Before getting into the calculations there's a brief review of the history of taking photos from above followed by a much more complete history of cameras designed for model rockets. If you're not up-to-date on your trigonometry basics, there's a helpful primer at the end in Appendix A. Finally, Ted Mahler tells a story of how hard it is to actually take a photo of a specific target from a model rocket as a report on his Target Photography Fun Event at NARAM 36.

A Place for T Robert H. Lengel, 2023-01-30 Dr. Lengel offers a thought provoking twist on Aesop's Hare-Tortoise fable reframing it as a Human Race pitting our Hare-brained heads against our Tortoise-inspired hearts. As we run faster and faster in our Hare-like pursuits of wealth, power and status, we are leaving no place for the slow and steady Tortoise to speak for our humanity. As a result, the author poses the possibility we are creating a world with our intellects and technology that we can't relate to emotionally and spiritually. We might be outrunning our humanity and setting the stage for the Hare to win this human race by default. Our inability to engage each other in civil and respectful conversations, the hate and violence infecting our culture and leadership failures in organizations might be evidence this sinister end is fast approaching. This book is a hard hitting and at times poetic invitation to step back from our busy lives, sit with the author on his front porch, and question our lives and work. It is an inspirational reminder of Mahatma Gandhi's warning that "there is more to life than simply increasing its speed." In a conversational format, Dr. Lengel guides us down a hopeful path forward – a path illuminated by what he calls divergent thinking. His words are a 'siren call' to wake up and realize we can't afford Hare- brained progress at the cost of our souls. We need A Place for T in our lives 'now', to account for the unaccountable while we still have time!
