Practical Research Paul D. Leedy, Jeanne Ellis Ormrod, 2013-07-30 For undergraduate or graduate courses that include planning, conducting, and evaluating research. A do-it-yourself, understand-it-yourself manual designed to help students understand the fundamental structure of research and the methodical process that leads to valid, reliable results. Written in uncommonly engaging and elegant prose, this text guides the reader, step-by-step, from the selection of a problem, through the process of conducting authentic research, to the preparation of a completed report, with practical suggestions based on a solid theoretical framework and sound pedagogy. Suitable as the core text in any introductory research course or even for self-instruction, this text will show students two things: 1) that quality research demands planning and design; and, 2) how their own research projects can be executed effectively and professionally.

Carmen Herrera Dana Miller, Serge Lemoine, Gerardo Mosquera, Edward J. Sullivan, Mónica Espinel, 2016-01-01 L'artiste native de Cuba Carmen Herrera (née en 1915) peint depuis plus de sept décennies, mais ce n'est que ces dernières années que la reconnaissance pour son travail a projeté l'artiste vers la notoriété internationale. Ce beau volume offre le premier examen soutenu d'elle, depuis le début de sa carrière en 1948 jusqu'en 1978, et s'étend sur les mondes de l'art de La Havane, de Paris et de New York. Les essais considèrent les premières études de l'artiste à Cuba, son implication dans le Salon des Réalités Nouvelles dans le Paris d'après-guerre et sa sortie révolutionnaire de New York. Puis l'ouvrage situe son travail dans le contexte d'un art d'avant-garde latino-américain plus large. Un essai de Dana Miller considère le travail de New York d'Herrera depuis les années 1950 jusque dans les années 1970, lorsque Herrera arrivait et perfectionnait son style de signature. Des photographies familiales personnelles des archives de Herrera enrichissent le récit, et une chronologie traitant de l'intégralité de sa vie et de sa carrière présente des images documentaires supplémentaires. Plus de quatre-vingts œuvres sont illustrées sous forme de plaques de couleur. Ce livre est la représentation la plus étendue des travaux de Herrera à ce jour. (d'après l'éditeur).

Privacy on the Ground Kenneth A. Bamberger, Deirdre K. Mulligan, 2015-10-23
An examination of corporate privacy management in the United States, Germany, Spain, France, and the United Kingdom, identifying international best practices and making policy recommendations. Barely a week goes by without a new privacy revelation or scandal. Whether by hackers or spy agencies or social networks, violations of our personal information have shaken entire industries, corroded relations among nations, and bred distrust between democratic governments and their citizens. Polls reflect this concern, and show majorities for more, broader, and stricter regulation—to put more laws “on the books.” But there was scant evidence of how well tighter regulation actually worked “on the ground” in changing corporate (or government) behavior—until now. This intensive five-nation study goes inside corporations to examine how the people charged with protecting privacy actually do their work, and what kinds of regulation effectively shape their behavior. And the research yields a surprising result. The countries with more ambiguous regulation—Germany and the United States—had the strongest corporate privacy management practices, despite very different cultural and legal environments. The more rule-bound countries—like France and Spain—trended instead toward compliance processes, not embedded privacy practices. At a crucial time, when Big Data and the Internet of Things are snowballing, *Privacy on the Ground* helpfully searches out the best practices by corporations, provides guidance to policymakers, and offers important lessons for everyone concerned with privacy, now and in the future.

Clinical Pathways in Stroke Rehabilitation Thomas Platz, 2021-01-14 This open access book focuses on practical clinical problems that are frequently encountered in stroke rehabilitation. Consequences of diseases, e.g. impairments and activity limitations, are addressed in rehabilitation with the overall goal to reduce disability and promote participation. Based on the available best external evidence, clinical pathways are described for stroke rehabilitation bridging the gap between clinical evidence and clinical decision-making. The clinical pathways answer the questions which rehabilitation treatment options are beneficial to overcome specific impairment constellations and activity limitations and are well acceptable to stroke survivors, as well as when and in which settings to provide rehabilitation over the course of recovery post stroke. Each chapter starts with a description of the clinical problem encountered. This is followed by a systematic, but concise review of the evidence (RCTs, systematic reviews and meta-analyses) that is relevant for clinical decision-making, and comments on assessment, therapy (training, technology, medication), and the use of technical aids as appropriate. Based on these summaries, clinical algorithms / pathways are provided and the main clinical-decision situations are portrayed. The book is invaluable for all neurorehabilitation team members, clinicians, nurses, and therapists in neurology, physical medicine and rehabilitation, and related fields. It is a World Federation for NeuroRehabilitation (WFNR) educational initiative, bridging the gap between the rapidly expanding clinical research in stroke rehabilitation and clinical practice across societies and continents. It can be used for both clinical decision-making for individuals and as well as clinical background knowledge for stroke rehabilitation service development initiatives.

Make Every Man Want You Marie Forleo, 2008-05-04 Unleash Your Irresistibility! Make Every Man Want You gives every woman the tools she needs to unlock her inner magnet. --Kelly Ripa Let's make one thing clear: this book is like no other dating book you've read. There are no rules, no list of things to do to land a husband in thirty days, and no reason to blame yourself if "he's just not that into you." Please. Throw those books away. Instead, let's focus on you--and how you can make yourself more appealing to others in almost every situation--whether you have a man or not. Think of it as a crash course in desirability, a life-changing lesson in loving yourself inside and out. Once you embrace your unique qualities and dissolve your bad relationship habits, you'll be amazed to find how irresistible you are to others! This girl-friendly guide reveals: Five Truths Every Irresistible Woman Needs to Know: Live in the moment, Men do not want to be changed or improved Seven Habits of Highly Unattractive Women: Boring in bed, Being needy Eight Secrets of Attracting the Right Man for You: Get rid of your perfect man checklist, Have your own life

Google Earth Engine Applications Lalit Kumar, Onesimo Mutanga, 2019-04-23 In a rapidly changing world, there is an ever-increasing need to monitor the Earth's resources and manage it sustainably for future generations. Earth observation from satellites is critical to provide information required for informed and timely decision making in this regard. Satellite-based earth observation has advanced rapidly over the last 50 years, and there is a plethora of satellite sensors imaging the Earth at finer spatial and spectral resolutions as well as high temporal resolutions. The amount of data available for any single location on the Earth is now at the petabyte-scale. An ever-increasing capacity and computing power is needed to handle such large datasets. The Google Earth Engine (GEE) is a cloud-based computing platform that was established by Google to support such data processing. This facility allows for the storage, processing and analysis of spatial data using centralized high-power computing resources, allowing scientists, researchers, hobbyists and anyone else interested in such fields to mine this data and understand the changes occurring on the Earth's surface. This book presents research that applies the Google Earth Engine in mining, storing, retrieving and processing spatial data for a variety of applications that include vegetation monitoring, cropland mapping, ecosystem assessment, and gross primary productivity, among others. Datasets used range from coarse spatial resolution data, such as MODIS, to medium resolution datasets (Worldview -2), and the studies cover the entire globe at varying spatial and temporal scales.

Introduction to Information Retrieval Christopher D. Manning, Prabhakar Raghavan, Hinrich Schütze, 2008-07-07 Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and

effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

Storytelling as Narrative Practice ,2019-07-08 In Storytelling as Narrative Practice, the editors marshal a rich set of ethnographic case studies, drawn from a diverse range of global contexts, to show that storytelling is best understood contextually as a socially contingent practice.

Evaluation of the Department of Veterans Affairs Mental Health Services
National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care Services, Committee to Evaluate the Department of Veterans Affairs Mental Health Services, 2018-03-29 Approximately 4 million U.S. service members took part in the wars in Afghanistan and Iraq. Shortly after troops started returning from their deployments, some active-duty service members and veterans began experiencing mental health problems. Given the stressors associated with war, it is not surprising that some service members developed such mental health conditions as posttraumatic stress disorder, depression, and substance use disorder. Subsequent epidemiologic studies conducted on military and veteran populations that served in the operations in Afghanistan and Iraq provided scientific evidence that those who fought were in fact being diagnosed with mental illnesses and experiencing mental health-related outcomes—in particular, suicide—at a higher rate than the general population. This report provides a comprehensive assessment of the quality, capacity, and access to mental health care services for veterans who served in the Armed Forces in Operation Enduring Freedom/Operation Iraqi Freedom/Operation New Dawn. It includes an analysis of not only the quality and capacity of mental health care services within the Department of Veterans Affairs, but also barriers faced by patients in utilizing those services.

Apraxia Leslie J. Gonzalez Rothi, Kenneth M. Heilman, 2014-06-03 The purpose of this book is to provide the reader with a perspective on apraxia that considers a link between the pathology of apraxia and normal motor skill. In addition, it is the intention of the authors to provide information that is theoretically interesting as well as clinically applicable. The book is a collection of papers by various authors working in the area of apraxia, almost exclusively with limb apraxia specifically. Beginning with Hugo Liepman's work of the late 19th century, a cognitive neuropsychological model of limb apraxia is reviewed, the use of new technologies that are informative about the mechanisms of limb praxis are discussed, and issues related to research as well as clinical assessment/management of the disorder are provided. While acquired limb apraxia is the focus of the book, there are also chapters on handedness, developmental apraxia of speech, and disorders of handwriting.
