Cleaning Up Alana Erickson Coble,2020-11-25 Over the course of the 20th century, American domestic service changed from an occupation with a hierarchical, top-down structure to one in which relationships were more negotiated. Many forces shaped this transformation: shifts in women's role in society, both at home and in the work force; changes in immigration laws and immigrant populations; and the politicization of the occupation. Moreover, domestic workers themselves took advantage of the resulting circumstances to demand better treatment and a say in their working conditions.

The book firstly explains the substantial character of intelligence, the development law of intelligence, and the relationship between intelligence development and creativity cultivation. Secondly, it discusses the structure of mathematical thinking of children and adolescents from 0 to 18 years old, and the methods of developing students' thinking ability and the quality of intelligence through arithmetic learning.
