Segregation by Design Jessica Trounstein,2018-11-15 Segregation by Design draws on more than 100 years of quantitative and qualitative data from thousands of American cities to explore how local governments generate race and class segregation. Starting in the early twentieth century, cities have used their power of land use control to determine the location and availability of housing, amenities (such as parks), and negative land uses (such as garbage dumps). The result has been segregation - first within cities and more recently between them. Documenting changing patterns of segregation and their political mechanisms, Trounstein argues that city governments have pursued these policies to enhance the wealth and resources of white property owners at the expense of people of color and the poor. Contrary to leading theories of urban politics, local democracy has not functioned to represent all residents. The result is unequal access to fundamental local services - from schools, to safe neighborhoods, to clean water.

**Archaeology for the People** John Cherry,Felipe Rojas,2016-02-29 In 2014, the Joukowsky Institute for Archaeology and the Ancient World organized an international writing competition calling for accessible and engaging essays about any aspect of archaeology. Nearly 150 submissions from over two dozen countries were received. Archaeology for the People gathers the best of those entries. Their diverse topics—from the destruction of historic, urban gardens in contemporary Istanbul to the fall of the ancient Maya city— offer a taste of the global reach and relevance of archaeology. Their main common trait, however, is that they prove that archaeology can offer much more to a general audience than Indiana Jones or aliens building pyramids. All of the articles collected in this book combine sophisticated analysis of an exciting archeological problem with prose geared at a non-specialized audience. This book also offers a series of reflections on how and why to engage in dialogues about archaeology with people who are not specialists. These include a stunning photo-essay that captures the challenges of life at an archaeological site in northern Sudan, interviews with a number of leading archaeologists who have successfully written about archaeology for a broad public or who are actively engaged in practicing archaeology beyond academia, and a discussion of the experience of teaching a Massive Open Online Course (MOOC) about archaeology to over 40,000 students. This book should be of interest to anyone who has wondered how and why to write about archaeology for people other than archaeologists.

**Doing Fieldwork** Christopher Pole,Sam Hillyard,2015-10-26 This is not yet another step-by-step guide to research methods. Rather, Pole and Hillyard draw the reader into fieldwork as a form of living and lived research. They take key threads of research practices and processes and weave them into a holistic approach to fieldwork. Doing Fieldwork is a must read for new researchers planning a journey into the immersion of ‘being there’ that is field work. - Professor Garry Marvin, University of Roehampton Fieldwork is central to Sociology, but guides to it often treat the real questions invisibly or over-load the reader with micro-details. This refreshing, authoritative volume, written by two experienced, highly respected fieldworkers, provides a one-stop, engaging guide. The book: Clearly explains fieldwork methods Shows how to locate a field and map it Covers common problem areas and ethical considerations Provides a ready reckoner of time management issues Helps with analysis of findings. Doing Fieldwork is an invaluable teaching and research resource. It should be in every student’s backpack and part of every researcher’s tool kit. Professor Chris Pole is Deputy Vice-Chancellor at the University of Brighton. His long-standing research interests are in social research methodology, especially Ethnography and in the Sociology of Education and Childhood. Dr Sam Hillyard is a Reader in Sociology at Durham University. Her research interests are in qualitative research methods, interactionist social theory and rural studies.

*Anti-Diet* Christy Harrison,2019-12-24 Reclaim your time, money, health, and happiness from our toxic diet culture with groundbreaking strategies from a registered dietitian, journalist, and host of the Food Psych podcast. 68 percent of Americans have dieted at some point in their lives. But upwards of 90% of people who intentionally lose weight gain it back within five years. And as many as 66% of people who embark on weight-loss efforts end up gaining more weight than they lost. If dieting is so clearly ineffective, why are we so obsessed with it? The culprit is diet culture, a system of beliefs that equates thinness to health and moral virtue, promotes weight loss as a means of attaining higher status, and demonizes certain ways of eating while elevating others. It's sexist, racist, and classist, yet this way of thinking about food and bodies is so embedded in the fabric of our society that it can be hard to recognize. It masquerades as health, wellness, and fitness, and for some, it is all-consuming. In Anti-Diet, Christy Harrison takes on diet culture and the multi-billion-dollar industries that profit from it, exposing all the ways it robs people of their time, money, health, and happiness. It will turn what you think you know about health and wellness upside down, as Harrison explores the history of diet culture, how it's infiltrated the health and wellness world, how to recognize it in all its sneaky forms, and how letting go of efforts to lose weight or eat perfectly actually helps to improve people's health—no matter their size. Drawing on scientific research, personal experience, and stories from patients and colleagues, Anti-Diet provides a radical alternative to diet culture, and helps readers reclaim their bodies, minds, and lives so they can focus on the things that truly matter.

*Injury Impoverished* Nate Holdren,2020-04-09 Combining archival research, critical theory, and gender- and disability-analysis, Nate Holdren argues that Progressive Era reform to employee injury law created new employment discrimination against disabled people and a new injury culture that treated employees and their injuries instrumentally.
