*The Chicago "L"* Greg Borzo, 2007 Offers a history of the world famous Chicago L, the elevated railroad that has operated since 1892 and has been ridden by more than ten billion people.

*Chicago's Lost "L"s* David Sadowski, 2021-07-12 Chicago's system of elevated railways, known locally as the L, has run continuously since 1892 and, like the city, has never stood still. It helped neighborhoods grow, brought their increasingly diverse populations together, and gave the famous Loop its name. But today's system has changed radically over the years. *Chicago's Lost Ls* tells the story of former lines such as Garfield Park, Humboldt Park, Kenwood, Stockyards, Normal Park, Westchester, and Niles Center. It was once possible to take high-speed trains on the L directly to Aurora, Elgin, and Milwaukee, Wisconsin. The L started out as four different companies, two starting out using steam engines instead of electricity. Eventually, all four came together via the Union Loop. The L is more than a way of getting around. Its trains are a place where people meet and interact. Some say the best way to experience the city is via the L, with its second-story view. *Chicago's Lost Ls* is virtually a secret history of Chicago, and this is your ticket.

*CTA at 45* George Krambles, Arthur H. Peterson, 1993 This book is a book for historians, transit professionals, urban planners, & rail & bus buffs. It shares valuable insights for political & financial decision makers who manage urban transportation. It is a case study of how transit meets the dynamics of a changing urban life. In Chicago, public ownership was adopted in 1947 when Chicago Transit Authority, using revenue bond money, bought out the bus, streetcar & rapid transit companies. Initially CTA was funded entirely from fares. CTA's pioneering Skokie Swift in 1964 was an innovative example of using then meager public funds for a demonstration project. It was successful. Not only did it foreshadow today's light rail transit systems, it also showed a new way to fund beneficial public transit projects. In the 1970s, public money began to support transit operations area-wide. This was not enough. Age-old problems continued. In 1993, public transit nationwide faces major crises. The challenge of public transit--successes & disappointments--is recounted in this 144-page illustrated book by George Krambles & Art Peterson. Together they bring a wealth of experience to the

reader. Krambles has served in public transit since 1936 & Peterson since 1970.

*Chicago* Michael F. Williams, Richard Cahan, Bruce Moffat, 2007-01-01 For close to 150 years, photographers have documented the construction of Chicago's public transportation system. They photographed the building of the city's famous 'L' lines and subway tunnels. And they photographed the streetcars that glided through city streets. For the first time, these photos in the Chicago Transit Authority archive are available in *Chicago: City on the Move*. The book shows Chicago in a new light. It presents a history of the city through mass transportation. But this is not a book of nostalgia. Although the photos are decades old, the subject is very much alive. Take a trip on the Blue Geese, the Green Hornets and the Old Reds. This is your chance to see Chicago as it was and better understand Chicago as it is. This is a book for people who love transportation, who love photography and who love the city on the move. Two-hundred and fifty pictures in duotone.

**Building Chicago's Subways** David Sadowski, 2018-10-01 Take a trip underground and see how Chicago's I Will spirit overcame challenges and persevered to help with the successful building of the subways that move millions today! While the elevated Chicago Loop is justly famous as a symbol of the city, the fascinating history of its subways is less well known. The City of Chicago broke ground on what would become the Initial System of Subways during the Great Depression and finished 20 years later. This gigantic construction project, a part of the New Deal, overcame many obstacles while tunneling through Chicago's soft blue clay, under congested downtown streets, and even beneath the mighty Chicago River. Chicago's first rapid transit subway opened in 1943 after decades of wrangling over routes, financing, and logistics. It grew to encompass the State Street, Dearborn-Milwaukee, and West Side Subways, with the latter modernizing the old Garfield Park L into the median of Chicago's first expressway. Building Chicago's subways was national news and a matter of considerable civic pride - making it a Second City no more!
