Time One Colin Gillespie,2013-03-18 The physicist and author of This Changes Everything presents an engaging inquiry into the origins of the universe and the beginning of time. In Time One, Colin Gillespie takes on the greatest scientific mystery of all time with the aid of a fictional detective. Approaching forty-seven classic philosophical problems as clues to the question of how the universe began, Gillespie connects the dots across centuries of philosophy, literature and religion—and leads readers to a single, elegant solution. Using the devices of storytelling to help readers understand the serious science being discussed—such as the theory of relativity, quantum mechanics and string theory—Gillespie reveals the very instant time begins and explains exactly how the universe is constructed. Time One tackles the most important issues in physics and cosmology and its answers are both fascinating and strikingly simple.

Cluck Susan Troller, Jane Hamilton, Michael Perry, Ben Logan, 2012-09-05 From barnyard to backyard, lowly hens have flown the country coop and joined the city chicken movement. A new generation of small-acreage farmers raising heritage breeds has inspired urbanites and suburbanites across America to install some poultry out back for eggs, meat, fertilizer, and cockeyed companionship. Whether the breed is Jersey Giant, Wyandotte, Buff Orpington, or Silver Frizzle Polish--chickens are now chic. This is not a how-to book on raising chickens but rather a wry, fascinating, sometimes startling appreciation of them, conveyed in compelling accounts by Susan Troller and striking prints and paintings by S.V. Medaris. A bonus: chicken stories from three of Wisconsin's most celebrated writers--Jane Hamilton (The Book of Ruth, A Map of the World), Michael Perry (Coop, Population 485), and Ben Logan (The Land Remembers)--round out the collection.
