The I and Being Human Norman Holland,2017-07-05 The 'I' in the title pertains to the core of self that persists over time. These are challenges that elude people like social scientists, philosophers, or critics of literature and the arts, who would chronicle or explain humanity's doings. This informative, engaging, and joyous book by Norman N. Holland offers a usable model for the aesthetics, psychology, history, and science of the human subject.Holland begins by modeling the self

as a theme and variations, constant yet constantly changing. He shows how symbolization, perception, cognition, and memory all contribute to the sense of I, hence how any one I grows out of a specific history and culture but also out of experiences all humans share. Holland proposes a scientific psychology based on his model, fusing the experiments of academic psychology with the insights of psychoanalysis. He illustrates his theory by the lives of George Bernard Shaw, Scott Fitzgerald, and other writers, as well as Freud's patient Little Hans, in adulthood a famed stage director at the Metropolitan Opera. The I and Being Human attempts nothing less than to draw together aspects of the self, such as objectivity and subjectivity, that have eluded connection. In so doing, Norman Holland offers a rereading of psychoanalysis as a theory of the I.

The Fire Watchers John Crawley, 2017-07-14 I'm going to piss you off, hopefully, in a good way so you can use the energy creatively and help me fight the fire that has been growing ever so steadily in our nation. The title of this book, *The Fire Watchers* is a metaphor referencing the lack of continuum of care for our mentally ill and substance-addled folks, often one and the same person. Much of my focus is on the veterans returning from harms way in various parts of the world. They have a high rate of mental illness PTSD (Post- [delayed, sometimes for months or years] traumatic stress disorder} and other maladies like major depression, bi-polar affective disorder, and TBI (traumatic brain injuries). There are many effective treatments for these issues that are not being used as frequently or as effectively as they should. Why not? I will document and discuss major reasons why much of our treatment services delivery system is flawed and, in many places, broken. We need a major effort in this country to repair what's broken. I will take us through, step by step, ways in which we can all work together to provide an efficient, less costly, and model system that rivals any in the world.

Conscious Motherhood Katherine Dickson, 2005-03-17 Conscious Motherhood is a personal account of how having a child changes one woman's life. It is the story of one woman's experience of herself during these changes. This semi-autobiography traces the journey toward increasing psychological and emotional wholeness and the role of motherhood in this process. The birth of the child initiates a dichotomy between home life and work life and how the new mother deals with the conflict between continuing her career or full time motherhood. Immediately after the birth, she experiences her body as an instrument in the titanic force of life. In the early days at home with her baby, she feels she has left civilization and has descended psychologically to a place which is very close to both life and death. Without the structure that a career gives life, she experiences daily life against the patriarchal structures of family and marriage. A sense of emptiness within, loss of her center, and loss of control of her own life is felt. In her isolation she feels the presence of her mother and grandmother and seeks role models and mentors in her friends. Her mind is filled with images of women and mothers as well as images of daughters recapitulating their own mothers' experiences. She questions how she would like her experiences to be different from those of her mother and what utopian motherhood could be like, and how these expectations are shaped by one's early experience of home and domesticity. The sense of inner revolution and upheaval is paralleled by chaotic and violent events in society. The year is 1968; Martin Luther King and Robert Kennedy are assassinated, the women's movement begins, students riot, and many protest the Vietnam War. These events form the backdrop of a long journey, told in twelve chapters in the creative nonfiction genre. The point or purpose of the work is to both present a unique personal account of individual growth as well as to present those aspects of a major experience which are universal. What is valuable and interesting

about this journey is that this rite of passage is told from the woman's point of view and the woman's experience through the life-writing or memoir style.

Pedagogical Tact Max van Manen, 2016-07-11 Pedagogical Tact describes how teacher-student relations possess an improvisational and ethical character. The daily realities of educators, parents, and childcare specialists are pedagogically conditioned by sensitive insights, active thoughtfulness, and the creative ability to act caringly and appropriately in the immediacy of the moment. Internationally known educator Max van Manen shows through recognizable examples and evocative stories how good teaching is driven by the phenomenology of pedagogy. His book-refocuses educators and others away from an emphasis on instrumental skills and technocratic programs toward the need for pedagogical tact;-describes how pedagogical actions have latent effects that will influence children throughout their lives;-shows how our actions with young people have pedagogically ethical and moral significance;-gives educators back their original vocational motivation and inspiration.
