The Selected Letters of Ralph Ellison Ralph Ellison,2024-02-27 A NEW YORK TIMES NOTABLE BOOK • A radiant collection of letters from the renowned author of *Invisible Man* that traces the life and mind of a giant of American literature, with insights into the riddle of identity, the writer's craft, and the story of a changing nation over six decades These extensive and revealing letters span the life of Ralph Ellison and provide a remarkable window into the great writer's life and work, his friendships, rivalries, anxieties, and all the questions about identity, art, and the American soul that bedeviled and inspired him until his death. They include early notes to his mother, written as an impoverished college student; lively exchanges with the most distinguished American writers and thinkers of his time, from Romare Bearden to Saul Bellow; and letters to friends and family from his hometown of Oklahoma City, whose influence would always be paramount. These letters are beautifully rendered first-person accounts of Ellison's life and work and his observations of a changing world, showing his metamorphosis from a wide-eyed student into a towering public intellectual who confronted and articulated America's complexities.

Advances in Medicinal and Aromatic Plants

Amritesh C. Shukla,Sunita Facknath,Debashis Mandal,Bernadette Montanari,2024-07-05 This new two-volume book categorically provides detailed information on highly demanded and medicinally important plants and their natural habits and habitats, taxonomy, cultivation practices, essential oils, active ingredients, biomolecules, modes of action, drug development, and value additions for marketing purpose. Examples of such plants include *Achillea* spp. (yarrow), *Acorus calamus* (sweet flag), *Ocimum* spp. (basil), *Dioscorea* spp., *Eucalyptus* spp., *Commiphora* spp. (guggul), *Kaempferia galanga* (aromatic ginger), and *Lavandula* spp. (lavender). Many others are included in the volume as well. With contributions from international experts, these two volumes present chapters that detail the history of these major medicinal and aromatic plants and also report on systematic botany, advanced production

and propagation technologies, plant nutrition, moisture management, intercultivation, plant protection, postharvest technology, processing-value addition, and marketing trade. Further, the book presents promising low-cost and ecofriendly plant products and biomolecules, which are free from side-effects for use as pharmaceuticals and herbal drugs. The most ancient form of medical therapies involving herbs has been neglected for a few decades back and has regained enormous popularity because of the effectiveness and fewer hazardous properties of many medicinal and aromatic plants. Nature has all sorts of protective medicinal compounds within its huge bioresources, which are still being identified for beneficial health purposes. Herbs containing aromatic properties because of their essential oils also have medicinal uses apart from being used as dependable sources of natural fragrance for cosmetics, perfumery, and food industries competing with synthetic aroma chemicals. These volumes will be an excellent and comprehensive compendium for academicians and professionals working in plant resources. The compilation will also be valuable for students, researchers, medical practitioners, farmers, entrepreneurs, traders, industrialists, and NGOs who are involved in research and development and production and pharmaceuticals of medicinally important plants.

The Biologising of Childhood John R.

Morss, 2017-12-06 Originally published in 1990, this book looks at the history of developmental psychology in order to locate and evaluate the role played by biology in its most influential formulations. First Charles Darwin's own writings on child development are examined. It is shown that Darwin endorsed such ideas as the 'recapitulation' of evolutionary ancestry in the developing child, even though this is inconsistent with his natural selection theory. The first great developmentalists – Hall, Baldwin, Freud – adopted and applied these non-Darwinian evolutionist ideas. The next generation – Vygotsky, Piaget, Werner – applied similar ideas in a variety of ways. Alongside this evolutionism, but interconnected with it, sensationist/empiricist forms of epistemology were directing developmentalists (from Rousseau onwards) to see the child as having to work himself out of sense-bound experience – to develop further and further from the 'here-and-now'. Contemporary developmental theory retains these influences: biological approaches (ethological, psychobiological) remain pre-Darwinian in spirit; lifespan theories remain attached to biology; formal/cognitive approaches remain attached to sensationism. 'Social context' approaches are rather half-hearted, and it is only the social-constructionist orientation which seems to offer a real alternative to biology. Major conclusions are stated in chapter ten, which includes a re-

evaluation of Darwin's role.
