Hunstead, 2017-09-01 Based on the enormously popular CPR Kids First Aid program, which has empowered thousands of families around Australia. From resuscitation, broken bones, choking and drowning to allergies, breathing problems and everything in between, this essential guide equips parents with skills to help your

precious little ones safely and effectively in the event of a medical emergency. Easy-to-follow step-by-step advice, nurse- and parent-tested methods and clear illustrations will show you how to: assess a situation and stay calm, treat an injury in a child-friendly way, recognise warning signs that show your child has a serious illness, know when to get help, and make your home child-safe. The information in this book is a trusted compilation of best practices from Australia's peak clinical bodies-including the Australian Resuscitation Council, ASICA, Australian Venom Research Unit - and valuable case studies from Australian parents. Raising or bringing up children is a very tough job for the parents.

Every parent would do anything to keep their children away from all

harms and injuries. You might try to be like a protective shield for

your child all the time, but sometimes it becomes impossible for

you to guard your kids against the odds. Your little champions

cannot afford to stay in one place. Children are naturally intrigued

by every object they come across. It's their intrinsic ability to explore everything. The curiosity that dwells inside them makes them kind of restless (we've all been kids so it's understandable). No matter how many times you forbid your kids from doing dangerous activities or touching harmful things, they simply won't stop doing it. You can't keep an eye on your kids all day, can you? Once they're out of your sight, they might up end up in some danger. What would you do if your baby (God forbid) or someone else's baby starts choking after having ingested a coin? What would you do to save that baby? Do you think you're prepared to cope with that emergency? If not, then you need not worry. This book is all you need to keep your baby safe in any emergency. This book is a complete guide for you that can help you manage any emergency situation that you and your baby might face. Calling for emergency help is certainly the first thing to do, but you can't wait for help and stand there and do nothing. After reading this book, you'll be equipped with different techniques and maneuvers that are simple, yet effective, and can prove to be the difference between your baby's safety and danger. We don't mean to startle you, but being prepared is always better than being sorry. So take a deep breath here and start with us on your journey to become an

even better mother/father to your children.

Paediatric Life Support is the internationally renowned manual on emergency paediatric care, written to support the course run by the Advanced Life Support Group. This edition has been adapted specifically for use in Australia and New Zealand, with the latest procedures, medications and clinical best practice to match the guidelines of the Australia and New Zealand Resuscitation Councils. Using their structured approach, a tried and tested practical method of treating children during the crucial first few hours of a life threatening illness or injury, Advanced Paediatric Life Support is used by doctors, nurses and allied health professionals dealing with emergencies in children. Its clear layout and straightforward style make it a highly practical tool both for training and in the event of an emergency. The sixth edition includes major new features bringing it right up to date, including: Fully adapted for use in Australia and New Zealand, with updates to chapters on shock, the choking child, basic life support and cardiac arrest The latest International Liaison Committee on Resuscitation (ILCOR)

2015 Guidelines The latest consensus guidelines on paediatric trauma Enhanced discussions on the importance of human factors A new and improved design including full colour photographs and diagrams Free access to the Wiley E-Text With this book at hand, all those providing care during paediatric emergencies can be confident in having comprehensive and authoritative guidance on the recognition and management of life threatening conditions necessary to save a child's life.

Pediatric First Aid for Caregivers and Teachers American Academy of Pediatrics, 2013 Caregivers and teachers need to know what to do when a child is injured or becomes suddenly ill. Most injuries that require first aid care are not life-threatening. However, first aid can sometimes mean the difference between life and death. This course is designed to give caregivers and teachers the education they need to effectively care for children.
