China-asean Relations: Economic And Legal Dimensions Huaqun Zeng,John Wong,Keyuan Zou,2006-03-15 With China's dynamic economic growth, its relations with the Association of Southeast Asian Nations (ASEAN) states have expanded rapidly in recent years, culminating in the conclusion of the landmark China-ASEAN Comprehensive Economic Cooperation Agreement in 2002. Beyond trade and economic activities, China-ASEAN cooperation has broadened to cover the environment, science and technology, non-traditional security areas and related legal issues. China's relations with ASEAN have reached a new era where the two sides have established an economic, legal and political framework for their comprehensive cooperation. This book provides a comprehensive overview of China-ASEAN relations from economic, legal and political perspectives and examines various important topics related to non-traditional security issues, free trade zone and regional economic integration, border trade and environmental issues, and maritime security.

China-ASEAN Relations Jing Dong Yuan,2006 Dr. Yuan traces the evolution of China - ASEAN relations since the early 1990s and examines some of the key factors that have contributed to the positive developments in bilateral ties. Specifically, he describes and analyzes how China and ASEAN have managed the territorial disputes through negotiation and compromises ; looks at the expanding economic ties between China and ASEAN member states and examines the politico-strategic, as well as economic rationales for establishing a free trade area ; and evaluates the emerging yet still limited defense and security ties between the two. Next he provides detailed analyses of ASEAN's dual strategy of engagement and hedging, and looks at China's bilateral relationships with seven ASEAN member states : Indonesia, Malaysia, Myanmar, the Philippines, Singapore, Thailand, and Vietnam - and examines how each ASEAN state adopts a particular mix of policies due to its unique historical and geostrategic circumstances and its threat perceptions. Finally, Professor Yuan assesses the implications of the growing China - ASEAN ties for U.S. interests in the region and dispels some of the misperceptions and exaggeration of both Beijing's intentions and influence. Washington retains much of the influence but does need to develop and adopt creative approaches to both individual member states and ASEAN as a group. -- Foreword.

China-ASEAN Sub-regional Cooperation Mingjiang Li,Chong Guan Kwa,2011 Describes China-ASEAN relations. This book discusses and analyzes China-ASEAN cooperation in the Greater Mekong River Sub-region (GMS), the Pan-Beibu economic zone, ASEAN's growth triangles, and the hydraulic power sector, as well as China-ASEAN economic relations in the wake of the financial crisis.

China-Asian Sub-Regional Cooperation Li Mingjiang,2011 This book is an edited volume about China-ASEAN relations with contributions from experts based in China and Singapore. The book includes a few excellent papers that were presented at a conference the editor organized in October 2009 and also two other research papers. They examine China-ASEAN relations from a sub-regional cooperation perspective. The book discusses and analyzes China-ASEAN cooperation in the Greater Mekong River Sub-region (GMS), the emerging Pan-Beibu economic zone, ASEAN's growth triangles, and the hydraulic power sector, as well as China-ASEAN economic relations in the wake of the financial crisis. They carefully review the progresses that have been achieved, examine new policy proposals that have been put forth, and explore problems that exist in all these sub-regional cooperation schemes between China and ASEAN.

East Asian Economic Integration Wang Liqin,2014-12-31 This book reviews and analyses East Asian economic integration by looking at China-ASEAN economic relations and the China-ASEAN Free Trade Area (CAFTA). The book explores the economic relations between China and ASEAN after the Cold War ended, investigates China's motives to establish the CAFTA (China-ASEAN Free Trade Area) and evaluates economic integration in East Asia, in which both China and ASEAN hold key roles. Much of the research is based upon interviews which the author conducted with key policy makers in China. After providing a theoretical framework and discussing methodology the author provides a background on economic cooperation between China and ASEAN from the 1980's onwards. China's role in trade and investment cooperation before and after 2001 is also analyzed as are China's shifting motives for cooperating with ASEAN. The author also looks at the features and the future for East Asian economic integration. Much of the research is based on Chinese language sources which are not usually referred to in western works in this field.

Dynamics of ASEAN Cooperation and China - ASEAN Relations Liu Renwu,2014-07-31 A detailed examination of the hugely significant relationship between China and the ASEAN countries from a Chinese perspective. This book provides a detailed analysis of the Association of Southeast Asian Nations (ASEAN) and the deepening relationship that ASEAN has with China. As an organization for regional cooperation among developing countries, ASEAN has drawn attention from the region and even the world, and is playing an increasingly important role in international affairs. As East Asian cooperation deepened in the 21st century, ASEAN countries not only raised the idea of building a community based on the pillars of an economic community, a political-security community and a socio-cultural community, but also issued the ASEAN Charter. Gaining a good overview of ASEAN's efforts at promoting economic cooperation over the last 40 years and the resultant effects on economic development is an important starting point toward an in-depth understanding of ASEAN itself. It is also an important theoretical basis for bilateral relations to progress further in the context of deepening China-ASEAN relations. The goals and achievements of ASEAN are something that other poorer performing nations may want to emulate. This book offers important insights into successful regional cooperation and the impact of building close bi-lateral relations with China.

ASEAN-China Economic Relations Saw Swee-Hock,2007 Examines the rapidly expanding economic relations between ASEAN and China in recent years, covering trade, investments, economic challenges, competition and opportunities in the various sectors of the two economies.

This volume investigates the impacts of global changes and regional challenges confronting the contemporary developments of China-ASEAN relations.

ASEAN-China Economic Relations in the Context of Pacific Economic Development and Co-operation Siow Yue Chia,Bifan Cheng,1992 Volume I of the series on ASEAN-China Relations focused on trends and

patterns in bilateral economic relations between ASEAN countries on the one hand, and China on the other. Volume II focused on macroeconomic and institutional developments in China and in selected sectors in ASEAN and China, and their implications for bilateral economic relations. This third volume focuses on developments in the global arena and in the Pacific and their impact on bilateral economic relations between ASEAN and China. The papers cover the following - economic developments in the Pacific region, the economic role of Japan and the United States, industrial restructuring in the Asian Newly Industrializing Economies, the special role of Hong Kong, prospects for Pacific economic cooperation, and China's membership in GATT.

Asia's Free Trade Agreements Masahiro Kawai,Ganeshan Wignaraja,2011 East Asia is the region of the world that is changing fastest in terms of trade arrangements. Dozens of free-trade agreements are signed every year, turning a complex situation into the East Asian noodle bowl of FTAs. This book addresses the crucial question posed by these new agreements how do they affect business? While many studies have focused on government-to-government issues, this book gets to the heart of the matter, studying what it means for the firms actually doing the trade and investment. I recommend this book to any serious student of trade, particularly those interested in understanding the rapidly evolving landscape in this most dynamic part of the world. Richard Baldwin, Professor of International Economics, Graduate Institute, Geneva, Switzerland The pursuit of more than one hundred Free Trade Agreements in East Asia is quietly producing a fundamental change in the global economic architecture. This path-breaking new volume provides an indispensable guide to the practical effect of such agreements on commercial transactions in the region. It is a must-read for businessmen and policymakers who seek to both understand the impact of FTAs in the real world and expand their contributions to economic growth and development. C. Fred Bergsten, Director, Peterson Institute for International Economics, US [East Asia] needs to think about appropriate measures to overcome the Asian FTA noodle bowl in the future. In this vein, the study suggests several practical measures including encouraging rationalization and flexibility of rules of origin, upgrading origin administration, improving business participation in FTA consultations, and strengthening institutional support systems for SMEs. . . It is hoped that this study will contribute to strengthening regional trade policies in Asia and compatibilities with global trade rules. Haruhiko Kuroda, President, Asian Development Bank This is a valuable contribution in a crowded field. Kawai and Wignaraja have gone beyond familiar arguments about the relative merits of regionalism and multilateralism to ask businesses what it all means to them. Policymakers should take note. Patrick Low, Chief Economist, WTO For policymakers in the region, the debate is no longer between regionalism and multilateralism. The real question is how we should create the model for regionalism that will become the building blocks to a multilateral trading system and avoid raising costs of doing business from the noodle bowl effect. Therefore the comparative and micro-level research found in this book provides valuable insights on the impact of FTAs on businesses. These insights will be relevant input as policymakers forge ahead in implementing regional FTAs, thinking of ways to amend and improve on them and, most importantly, harmonize or consolidate between existing regional FTAs in East Asia. Mari Pangestu, Minister of Trade, Indonesia The spread of Asia s free trade agreements (FTAs) has sparked an important debate on the impact of such agreements on business activity. This pioneering study uses new evidence from surveys of East Asian exporters including Japan, the People s Republic of China, the Republic of Korea and three ASEAN economies of the Philippines, Singapore and Thailand to shed light on the FTA debate. Critics are concerned that FTAs erode the multilateral trading process and foster an alarming noodle bowl of overlapping regulations and rules of origin requirements which may be costly to business. Asia s Free Trade Agreements makes key recommendations for improving business use of FTA preferences, reducing costs of FTAs and creating a region-wide FTA. This well-researched and documented book will appeal to undergraduate and postgraduate students in international business, international economics, economic development, public administration and public policy. Academics, researchers and members of think-tanks around the world will also benefit from this book as will trad

ASEAN-China Free Trade Area Aslam Mohamed,2012 In November 2002 ASEAN and China signed an agreement to form an FTA by 2010. It is anticipated that both parties will gain from the FTA. However, the rapid growth of China since the early 1990s is now seen as a threat to the future of ASEAN's economic growth. The trade sector is the backbone of ASEAN's economic growth, and China's impressive economic growth and development, coupled with its low cost of production have created trade and investment diversions for most members of ASEAN. The strong competition between the regions is attributed to the factor of homogeneity in production and exports: what ASEAN produces and exports, China produces and exports as well. Thus, countries which have the lowest cost of production will gain in trading. Investment diversion happens in two forms: (1) new investments or foreign firms preferring China to ASEAN; and (2) re-location of foreign firms from ASEAN countries to China (Singapore and Malaysia have experienced this phenomenon). We believes that the ACFTA does not promise total gains to members of ASEAN.

ASEAN and Regional Free Trade Agreements Christopher Findlay,2015-07-16 Efforts to use existing trade agreements to build a larger regional agreement face many challenges. This book considers this problem with reference to ASEAN's current agreements with key partners and the interest to build the Regional Comprehensive Economic Partnership (RCEP). The analysis of the options is framed by a focus on the use of supply chains in international business. Issues considered include those related to reductions in tariffs, trade facilitation, the treatment of investment and of services and the definition of rules of origin. The work is informed by case studies of supply chains in automobile and electronics, and in a professional service sector. The book provides a set of priority actions for better progress in taking a bottom-up approach to building RCEP.
