**Image of China** Susan Sloman, William Alexander, 1980

*China in Pictures* Alison Behnke, 2003-01-01 Text and illustrations present detailed information on the geography, history and government, economy, people, cultural life and society of traditional and modern China, home to over one-fifth of the earth's population.

*Pictures and Visuality in Early Modern China* Craig Clunas, 2006-03-01 Pictures and Visuality in Early Modern China is not simply a survey of sixteenth-century images, but rather, a thorough and thoughtful examination of visual culture in China's Ming Dynasty, one that considers images wherever they appeared—not only paintings, but also illustrated books, maps, ceramic bowls, lacquered boxes, painted fans, and even clothing and tomb pictures. Clunas's theory of visuality incorporates not only the image and the object upon which it is placed but also the culture which produced and purchased it. Economic changes in sixteenth-century China—the rapid expansion of trade routes and a growing class of consumers—are thus intricately bound up with the evolution of the image itself. *Pictures and Visuality in Early Modern China* will be a touchstone for students of Chinese history, art, and culture.

□□□□ Tina Pang, 2003 Features China trade paintings and export art works dating from the late 18th and 19th centuries. It focuses on the importance of maritime trade in encouraging cultural contact between East and West, and in the development of Chinese export art. The works include early paintings and drawings that were intended to document China and portraits of the people and vessels that were involved in the China trade. The majority of the paintings are port scenes of Canton and other later treaty ports; others depict the Chinese and their way of life. A number of export items including ceramics and carvings are also included. The catalogue contains essays by William Shang, Patrick Conner, and William Sargent on the historical importance of Chinese export art, the artist George Chinnery, and China trade paintings for the American market.

**Illustrations of China and its People** J. Thomson, 2023-09-23 Reprint of the original, first published in 1873.

*Historic Photos of the Chinese in California*, 2009-04-01 The Chinese were a visible current in the tidal wave of humanity that rushed through San Francisco's Golden Gate in the mid-nineteenth century. Known to their countrymen as Gam Saan Haak (guests of Gold Mountain), Chinese immigrants sought great fortune. Most found only hostility and hard work, often braving the most dangerous and loathsome jobs. They endured violence and injustice, yet clung to this land with tenacity and patience and made it their own. With nearly 200 historic photographs gathered from notable collections, this book explores a century of Chinese progress in California. Retracing the immigrants' steps—from the gold fields to the high Sierra railroad camps, to lettuce fields and olive groves, and to the Monterey coast—we visit Chinese enclaves throughout the state. We linger in San Francisco's old Chinatown, home to cherished children and notorious tong gangs, where new arrivals first found refuge and familiar goods, and tourists later found exotic merchandise spilling from aging storefronts. These historic images recall a time when the Chinese community in California was still a world apart.

**Telling Images of China** Shane McCausland, Lizhong Ling, Shanghai bo wu guan, 2010 Each of the 35 narrative and figure paintings selected from the Shanghai Museum and featured in this exquisite book, retell a story from Chinese legend, folklore or history. Album leaf, fan, handscroll and hanging-scroll paintings demonstrate the dynamic

**Empire** James Whitlow Delano, Orville Schell, Colin Jacobs, 2004 The people of China are changing the face of their country with tremendous tenacity, often with their own bare hands. The changes are so rapid and prolific that the photographer finds himself constantly a step behind, chasing memories. These images are a strong photographic exploration of what lies beneath the surface of this country.

Zooming In Wu Hung, 2016-06-15 From the first sets of photographic records made by Western travelers to doctored portraits of Chairman Mao and the avant-garde photographic performances of the post-Cultural Revolution era, photography in China has followed divergent paths. In this book, Wu Hung explores the multiple histories of photographic production in China, using them to tell a larger story about China's shifting sociopolitical contexts and the different agendas, technologies, and aesthetics that have helped define its arts. At the center of the book is a large question: how has photography represented China and its people, its collective history and memory as well as the diversity of Chinese artists who have striven for creative expression? To address this question, the author offers an in-depth study of selected photographers, themes, and movements in Chinese photography from 1860 to the present, covering a wide range of genres, including portraiture, photojournalism, architectural and landscape photography, and conceptual photography. Beautifully illustrated, this book offers a multifaceted and in-depth analysis of an important photographic history.

*Images of the Canton Factories 1760–1822* Paul A. Van Dyke, Maria Kar-wing Mok, 2015-09-01 Hundreds of Chinese export paintings of Canton trading houses and shopping streets are in museums and private collections throughout the world, and scholars of art and history have often questioned the reliability of these historical paintings. In this illustrated volume, Paul Van Dyke and Maria Mok examine these Chinese export paintings by matching the changes in the images with new historical data collected from various archives. Many factory paintings are reliable historical records in their own right and can be dated to a single year. Dating images with such precision was not possible in the past owing to insufficient information on the scenes. The new findings in this volume provide unprecedented opportunities to re-date many art works and prove that images of the Canton factories painted on canvas by Chinese artists are far more trustworthy than what scholars have believed in the past.

Old Hong Kong Photos and The Tales They Tell, Volume 2 David Bellis, 2018-12-01 David puts more of his favourite old Hong Kong photos under the magnifying glass, revealing the photos' secrets, and uncovering their hidden

stories. Flying Italian miners (p. 107), disembodied feet (p. 13), and the most beautiful woman you'll never see (p. 17) are just a few of the surprises in store for you.

**The Scholar as Collector** David Ake Sensabaugh, 2004 Yale University continues its tradition of distinguished art research as it explores their Art Gallery's holdings of Chinese art from the perspective of the traditional Chinese scholar-collector. The two most esteemed arts were calligraphy and painting, and they are beautifully illustrated in this publication. Selections range from 11th century images to early 20th century writing in the ancient seal script. Bronze and ceramic vessels and the scholars' accoutrements also are featured.

China Edward Burtynsky, Marc Daniel Mayer, Ted C. Fishman, Mark Kingwell, 2005 In this book, Edward Burtynsky presents photographs of the remnant and newly established zones of Chinese industrialization - those places created while realizing the glory of wealth for a powerful civilization yearning to move forward and join the ranks of modern nations. Using diplomatic channels, Burtynsky has gained rare access to these sites, creating images that are at once arresting and unsettling. These photographs afford us privileged glimpses of the vast social and economic transformation currently underway in China. Burtynsky casts a watchful eye over the extreme expressions of Chinese industry. His subjects include the Three Gorges Dam, at present the world's largest engineering project and Bao Steel, China's biggest steel producer. He explores the vanishing dinosaurs of old industrial complexes in the north eastern rust belt and shipyards at Qiligang, the single most concentrated area of shipbuilding in the country.--BOOK JACKET.

Chinese Art Patricia Bjaaland Welch, 2013-02-19 With over 630 striking color photos and illustrations this Chinese art guide focuses on the rich tapestry of symbolism which makes up the basis of traditional Chinese art. Chinese Art: A Guide to Motifs and Visual Imagery includes detailed commentary and historical background information for the images that continuously reappear in the arts of China, including specific plants and animals, religious beings, mortals and inanimate objects. The book thoroughly illuminates the origins, common usages and diverse applications of popular Chinese symbols in a tone that is both engaging and authoritative. Chinese Art: A Guide to Motifs and Visual Imagery is an essential reference for collectors, museum-goers, guides, students and anyone else with a serious interest in the culture and history of China.

*Brush & Shutter* Jeffrey W. Cody, Frances Terpak, 2011 Accompanies an exhibition held at the J. Paul Getty Museum, 8 February-1 May 2011.

*Inside/out* Asia Society. Galleries, San Francisco Museum of Modern Art, 1998-01-01 The late twentieth century has been marked by momentous political, economic, and social change throughout the Chinese world. Deeply rooted cultural assumptions and ancient visual traditions have been challenged by rapid modernization and conflicting global, ethnic, and local identities. Inside/Out: New Chinese Art was the first major international exhibition to explore the impact of these challenges on artists in the People's Republic of China, Hong Kong, Taiwan, and those of the 1980s Diaspora. The multifaceted exhibition and accompanying catalog encompass an extensive range of artistic forms, including installation, video, and performance art as well as more traditional media such as oils

and ink. The art is grouped according to themes, some specific to regions and others that reflect widespread and overlapping trends. With the inclusion of ambiguous territories like Hong Kong and Taiwan, the exhibition opens up a perspective of modern Chinese art from the outside as well as a looking-out from the inside. The catalog features essays by eminent Chinese art scholars and curators along with leading curators and historians of Western art. Together they promote Chinese art's rightful place in the contemporary global cultural arena and at the same time acknowledge the influence of its rich heritage. The diversity and freshness of the exhibition reflects the explosion of creativity among Chinese artists during the past decade. The ironic social commentary of Li Shan's The Rouge Series, no. 24, the apartment art of artists reacting against the traditional patronage of large museums and corporations, and Wang Jin's sly humor in portraying consumer fetishes in today's China are a few examples of the spirited artistry awaiting the viewers of Inside/Out.

Performance Art in China Thomas J. Berghuis,2006 Performance Art in China takes as its subject one of the most dynamic and controversial areas of experimental art practice in China. In his comprehensive study, Sydney-based theorist and art historian Thomas J. Berghuis introduces and investigates the idea of the role of the mediated subject of the acting body in art, a notion grounded in the realization that the body is always present in art practice, as well as its subsequent, secondary representations. Through a series of in-depth case studies, Berghuis reveals how, during the past 25 years, Chinese performance artists have acted out their art, often in opposition to the principles governing correct behavior in the public domain. In addition to a 25-year chronology of events, a systematic index of places, names and key terms, as well as a bibliography and a glossary in English and Chinese, this study also offers the reader numerous previously unpublished photos and documents.
