**Writing and Literacy in Chinese, Korean, and Japanese** Insup Taylor, Maurice Martin Taylor, 1995 Chinese, Japanese, South (and North) Koreans in East Asia have a long, intertwined and distinguished cultural history and have achieved, or are in the process of achieving, spectacular economic success. Together, these three peoples make up one quarter of the world population. They use a variety of unique and fascinating writing systems: logographic Chinese characters of ancient origin, as well as phonetic systems of syllabaries and alphabets. The book describes, often in comparison with English, how the Chinese, Korean and Japanese writing systems originated and developed; how each relates to its spoken language; how it is learned or taught; how it can be computerized; and how it relates to the past and present literacy, education, and culture of its users. Intimately familiar with the three East Asian cultures, Insup Taylor with the assistance of Martin Taylor, has written an accessible and highly readable book. *Writing and Literacy in Chinese, Korean and Japanese* is intended for academic readers (students in East Asian Studies, linguistics, education, psychology) as well as for the general public (parents, business, government). Readers of the book will learn about

the interrelated cultural histories of China, Korea and Japan, but mainly about the various writing systems, some exotic, some familiar, some simple, some complex, but all fascinating.

**King Sejong the Great** Young-Key Kim-Renaud, 1992  
This book is about Korea's cultural hero, King Sejong (r. 1418-1450), the inventor of the Korean alphabet. Written by internationally known scholars, it contains 14 chapters, with numerous color plates & illustrations. King Sejong is best known & loved by the Korean people for his invention of the Korean alphabet, usually considered the most scientific writing system the world has ever known. It was an extraordinary intellectual achievement but it was also an act of compassion. Sejong created the alphabet as an expression of love for his people & as part of an ideal theory of governance. For these same reasons, Sejong also ordered astronomical instruments & rain gauges assembled, rituals & music reformed, & movable metal type created. Sejong wanted his subjects to understand the natural world so they could interact efficiently, appropriately, & harmoniously with their environment. Sejong took the throne in the Choson dynasty's third decade & put it on such a strong foundation that it lasted for over five centuries, a remarkable record not just in East Asia but in world history. Through this concise & informative reader, the English-speaking public will understand why the very name Sejong evokes an image of human perfection in Koreans' minds. To order: call (202) 994-7107, FAX (202) 994-1512, or write: Young-Key Kim-Renaud, E. Asian Lang. & Lit.

**Lost Modernities** Alexander Woodside, 2006-05-30  
In *Lost Modernities* Alexander Woodside offers a probing revisionist overview of the bureaucratic politics of preindustrial China, Vietnam, and Korea. He focuses on the political and administrative theory of the three mandarinates and their long experimentation with governments recruited in part through meritocratic civil service examinations remarkable for their transparent procedures. The quest for merit-based bureaucracy stemmed from the idea that good politics could be established through the development of people--the training of people to be politically useful. Centuries before civil service examinations emerged in the Western world, these three Asian countries were basing bureaucratic advancement on examinations in addition to patronage. But the evolution of the mandarinates cannot be accommodated by our usual timetables of what is modern. The history of China, Vietnam, and Korea suggests that the rationalization processes we think of as modern may occur independently of one another and separate from such landmarks as the growth of capitalism or the industrial revolution. A sophisticated examination of Asian political traditions, both their achievements and the associated risks, this book removes modernity from a standard Eurocentric understanding and offers a unique new perspective on the transnational nature of Asian history and on global historical time.
