L'Internet des objets et la data Frédéric Scibetta,Yvon Moysan,Eric Dosquet,Frédéric Dosquet,2018-04-18 Des dizaines de milliers d'objets connectés seront déployés d'ici quelques années. Les entreprises étudient et utilisent de plus en plus ces technologies dans le cadre de leur transformation digitale. Des partenariats se créent, de nouveaux acteurs émergent, et permettent aux entreprises d'avoir une vision 360° de leurs clients et d'optimiser l'utilisation de leurs données. Ce livre analyse l'impact réel des objets connectés sur la stratégie marketing de l'entreprise. Grâce à une étude menée sur des acteurs qui ont choisi d'intégrer les objets connectés dans leur stratégie, les auteurs montrent comment, grâce à cette technologie, les opportunités se multiplient pour atteindre le graal du marketing : comprendre et connaître chacun de ses clients. De nombreux exemples de tous secteurs (agriculture, assurance, automobile, santé, énergie...) ainsi que des cas d'entreprises (Darty, la Poste, Allianz, Club Med, Top Shop, Audi, Chronodrive...) illustrent et enrichissent le propos.

Business Model Vert Maximilien Brabec, 2010-10-06 Bien des entreprises sont à l'image du réverbère qui ne voit que ce qu'il éclaire et qui ignore ce qui se situe dans l'ombre. Rares sont celles qui se positionnent en plaçant les enjeux de l'économie durable au cœur de leur stratégie et qui créent de nouveaux Business Models en rupture avec ceux du passé. Dans ce livre concret, et illustré de nombreux exemples d'entreprises, l'auteur nous explique que la clé de la performance future des entreprises tient à leur capacité à innover mieux que les autres, plus vite que les autres. Les innovations actuelles, car il y en a, sont plus d'ordre technologique et ne se traduisent pas par une innovation Business. Il y développe toutes les étapes qui aboutissent à une différenciation totale par rapport à la concurrence.

Retail Marketing Strategy Constant Berkhout, 2015-11-03 Basing shopper marketing strategy on customer insights is what differentiates market leading retail brands from weaker competitors. Many retail organizations lack business development and strategic departments that collect experiences, set benchmarks and create models and manuals. Retail Marketing Strategy makes the information available to drive new ways of thinking and make retail practice more agile for everyone. Outlining the five key capabilities required for retail excellence, namely in-store execution; organizational development; fact-driven decision making; multi-channel operations, and understanding customers, Retail Marketing Strategy answers some of the most difficult questions in retail including how to innovate to develop new ways to interact with customers across multiple channels, and how to replicate online success stories from other sectors. Practical steps are put forward for collating and interpreting the data generated in shopper activity, helping to make sense of trends and build effective strategy. Guidance is based throughout on neuromarketing research, providing a clear framework for building in experiential elements such as scent or music into the retail environment to really engage with consumers on an emotional level. If you are a marketing, branding or supply chain professional working in retail seeking straightforward and research-driven techniques for building lasting customer loyalty, or you are responsible for driving retail strategy in your organization, let Retail Marketing Strategy be your guide.

New Perspectives on 20th Century European Retailing Peter Scott, Patrick Fridenson, 2021-05-13 Despite the publication of several studies examining European retailing in relation to the USA, there is still a dearth of recent research, in English, that explores the development of retailing in specific European countries (with the obvious exception of Britain), over the twentieth century. Even for the UK, more research is needed to challenge claims such as the alleged backwardness of British

retailing relative to North America, or the presence of formidable environmental barriers to the industrialisation of retailing in Britain. New Perspectives on 20th Century European Retailing showcases new research on various aspects of twentieth century European retailing, that challenges the traditional view that Europe was a follower of America in retail innovation. It brings together work by several - mainly early career - scholars, who are doing innovative, archival-based, research on various aspects of European retail history. Following a general review of European retailing by the editors (discussing key debates and new approaches) seven thematic chapters present work that either sheds new light on old debates and/or explores hitherto neglected topics. Collectively, they show that whereas retailers are often regarded as ‘intermediaries’, in fact they are actors in their own right and they challenge the traditional view that Europe was a follower of America in retail innovation. The chapters in this book were originally published as a special issue of the Business History journal.
