Samuel Shuckford

Manifest Brutality: Chronus & Ecliptus Alexander A. Dahl,2013-02-28 With the stabilized fracture of the Kalifrost nebula, tempers have flared to claim rights to the newly forged dimensions of the mirror. King Domus races against his new born reflection Dito Savat to develop esoteric means to take over the two kingdoms. After learning that conventional means of slaying an enemy will not be useful in this conflict, new methods must be harnessed in order to bring this ethereal war to an end. This collection of poetic tales and lyrical fables details how King Domus and King Savat imbue stellar powers to further wage their desire to fully harness the celestial power of the fracture's core.

Autonomic Network Management Principles Nazim Agoulmine,2010-12-03 Autonomic networking aims to solve the mounting problems created by increasingly complex networks, by enabling devices and service-providers to decide, preferably without human intervention, what to do at any given moment, and ultimately to create self-managing networks that can interface with each other, adapting their behavior to provide the best service to the end-user in all situations. This book gives both an understanding and an assessment of the principles, methods and architectures in autonomous network management, as well as lessons learned from, the ongoing initiatives in the field. It includes contributions from industry groups at Orange Labs, Motorola, Ericsson, the ANA EU Project and leading universities. These groups all provide chapters examining the international research projects to which they are contributing, such as the EU Autonomic Network Architecture Project and Ambient Networks EU Project, reviewing current developments and demonstrating how autonomic management principles are used to define new architectures, models, protocols, and mechanisms for future network equipment. Provides reviews of cutting-edge approaches to the management of complex telecommunications, sensors, etc. networks based on new autonomic approaches. This enables engineers to use new autonomic techniques to solve complex distributed problems that are not possible or easy to solve with existing techniques. Discussion of FOCAL, a semantically rich network architecture for coordinating the behavior of heterogeneous and distributed computing resources. This provides vital information, since the data model holds much of the power in an autonomic system, giving the theory behind the practice, which will enable engineers to create their own solutions to network management problems. Real case studies from the groups in industry and academia who work with this technology. These allow engineers to see how autonomic networking is implemented in a variety of scenarios, giving them a solid grounding in applications and helping them generate their own solutions to real-world problems.

Gnomon of the New Testament, Volume 5 John A. Bengel,2016-03-01 Bengel's work on the New Testament is a valuable resource for modern students of the Scriptures. In 1734, he published a carefully prepared Greek text of the New Testament with an Apparatus criticus, which formed the point of departure for modern New Testament textual criticism. His famous canon was: The more difficult reading is to be preferred. This critical work was followed by an exegetical one, Gnomon Novi Testamenti (Tubingen, 1742). As a brief and suggestive commentary on the New Testament, the Gnomon is still of considerable use today. Bengel's chief principle of interpretation, briefly stated, is to read nothing into the Scriptures, but to draw everything from them, and suffer nothing to remain hidden that is really in them. His Gnomon exerted considerable influence on exegesis in Germany, and John Wesley translated most of its notes and incorporated them into his Annotatory Notes upon the New Testament (London, 1755). A. Hauck, Schaff-Herzog Encyclopedia of Religious Knowledge. This volume is 5 of a 5 volume set. Each volume is sold separately.
