Sergey Dorichenko

The Eighth Circle Stanley Ellin, 2014-07-08 Edgar Award winner: Investigating a crooked cop, a private detective gets too close to the case. The investigators of the Conmy-Kirk detective agency don't work in trench coats, drink on the job, or carry pistols. They are researchers who comb newspapers and government records in search of the tiny details that could make or break their clients' fortunes. It is painstaking and unromantic, but as co-owner Murray Kirk is about to learn, those details can mean the difference between life and death. The district attorney is cracking down on corruption in the NYPD, and the search is spreading like wildfire, forcing hundreds of policemen to resign in disgrace. When Conmy-Kirk is hired to clear the name of one of the accused, Kirk finds himself falling for his client's daughter, a moral infraction that draws him deeper into the city's underworld than he ever wanted to slip. This work isn't like it is in the movies—if Murray Kirk catches a bullet, he'll stay dead.

**Circle of Treason** Sandra V Grimes, Estate of Jeanne Vertefeuille, 2013-11-15 While there have been other books about Aldrich Ames, Circle of Treason is the first account written by CIA agents who were key members of the CIA team that conducted the intense "Ames Mole Hunt." Sandra Grimes and Jeanne Vertefeuille were two of the five principals of the CIA team tasked with hunting one of their own and were directly responsible for identifying Ames as the mole, leading to his arrest and conviction. One of the most destructive traitors in American history, CIA officer Aldrich Ames provided information to the Soviet Union that contributed to the deaths of at least ten Soviet intelligence officers who spied for the United States. In this book, the two CIA

officers directly responsible for tracking down Ames chronicle their involvement in the hunt for a mole. Considering it their personal mission, Grimes and Vertefeuille dedicated themselves to identifying the traitor responsible for the execution or imprisonment of the Soviet agents with whom they worked. Their efforts eventually led them to a long-time acquaintance and coworker in the CIA's Soviet-East European division and Counterintelligence Center, Aldrich Ames. Not only is this the first book to be written by the CIA principals involved, but it is also the first to provide details of the operational contact with the agents Ames betrayed. The book covers the political aftermath of Ames's arrest, including the Congressional wrath for not identifying him sooner, the FBI/CIA debriefings following Ames's plea bargain, and a retrospective of Ames the person and Ames the spy. It is also the compelling story of two female agents, who overcame gender barriers and succeeded in bringing Ames to justice in a historically male-oriented organization. Now retired from the CIA, Grimes and Vertefeuille are finally able to tell this inside story of the CIA's most notorious traitor and the men he betrayed.

*Little Book of Circle Processes* Kay

Pranis, 2015-01-27 Our ancestors gathered around a fire in a circle, families gather around their kitchen tables in circles, and now we are gathering in circles as communities to solve problems. The practice draws on the ancient Native American tradition of a talking piece. Peacemaking Circles are used in neighborhoods to provide support for those harmed by crime and to decide sentences for those who commit crime, in schools to create positive classroom climates and resolve behavior problems, in the workplace to deal with conflict, and in social services to develop more organic support systems for people struggling to

get their lives together. A title in The Little Books of Justice and Peacebuilding Series.

Matthew Emma Lang, 2012 Taking control of the Circle Eight after his parents' murder, Matthew Graham has 30 days to find a wife, or lose everything, and sets his sights on plain and practical Hannah Foley, who he believes is the perfect bride, until their explosive wedding night changes everything.

### **Shadows of the Circle** Vagn Lundsgaard

Hansen, 1998-04-04 The aim of this book is to throw light on various facets of geometry through development of four geometrical themes. The first theme is about the ellipse, the shape of the shadow cast by a circle. The next, a natural continuation of the first, is a study of all three types of conic sections, the ellipse, the parabola and the hyperbola. The third theme is about certain properties of geometrical figures related to the problem of finding the largest area that can be enclosed by a curve of given length. This problem is called the isoperimetric problem. In itself, this topic contains motivation for major parts of the curriculum in mathematics at college level and sets the stage for more advanced mathematical subjects such as functions of several variables and the calculus of variations. The emergence of non-Euclidean geometries in the beginning of the nineteenth century represents one of the dramatic episodes in the history of mathematics. In the last theme the non-Euclidean geometry in the Poincaré disc model of the hyperbolic plane is developed. Contents: An Ellipse in the Shadow With Conic Sections in the Light Optimal Plane Figures The Poincaré Disc Model of Non-Euclidean Geometry Exercises Readership: Pure mathematicians, professionals, high school and undergraduate students. Keywords: Conic Sections; Conics; Dandelin Spheres; Isoperimetric Problems; Variational Problems; Optimization; Non-

Euclidean Geometry; Hyperbolic Plane; Poincaré Disc Model; Hyperbolic Tilings

Reviews: "This lively written book shows that even "old fashioned" geometry such as conic sections can be presented in a very attractive form ... The text under review maintains a nice balance between informal presentation of mathematical problems, their connections and history on one hand and concrete mathematics on the other." Mathematical Reviews

"The book can be recommended to persons – also non-scientists – who are interested in geometrical aspects and its historical background."

**The Circle** Dave Eggers, 2013-10-08 INTERNATIONAL BESTSELLER • A bestselling dystopian novel that tackles surveillance, privacy and the frightening intrusions of technology in our lives—a "compulsively readable parable for the 21st century" (Vanity Fair). When Mae Holland is hired to work for the Circle, the world's most powerful internet company, she feels she's been given the opportunity of a lifetime. The Circle, run out of a sprawling California campus, links users' personal emails, social media, banking, and purchasing with their universal operating system, resulting in one online identity and a new age of civility and transparency. As Mae tours the open-plan office spaces, the towering glass dining facilities, the cozy dorms for those who spend nights at work, she is thrilled with the company's modernity and activity. There are parties that last through the night, there are famous musicians playing on the lawn, there are athletic activities and clubs and brunches, and even an aquarium of rare fish retrieved from the Marianas Trench by the CEO. Mae can't believe her luck, her great fortune to work for the most influential company in the world—even as life beyond the campus grows distant, even as a strange encounter with a colleague leaves her shaken, even as her role at

the Circle becomes increasingly public. What begins as the captivating story of one woman's ambition and idealism soon becomes a heart-racing novel of suspense, raising questions about memory, history, privacy, democracy, and the limits of human knowledge.

#### **A Moscow Math Circle** Sergey

Dorichenko, 2011-12-29 Moscow has a rich tradition of successful math circles, to the extent that many other circles are modeled on them. This book presents materials used during the course of one year in a math circle organized by mathematics faculty at Moscow State University, and also used at the mathematics magnet school known as Moscow School Number 57. Each problem set has a similar structure: it combines review material with a new topic, offering problems in a range of difficulty levels. This time-tested pattern has proved its effectiveness in engaging all students and helping them master new material while building on earlier knowledge. The introduction describes in detail how the math circles at Moscow State University are run. Dorichenko describes how the early sessions differ from later sessions, how to choose problems, and what sorts of difficulties may arise when running a circle. The book also includes a selection of problems used in the competition known as the Mathematical Maze, a mathematical story based on actual lessons with students, and

an addendum on the San Jose Mathematical Circle, which is run in the Russian style. In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life, MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people, their parents and teachers, and the mathematics profession.
