**The Datafication of Education** Juliane Jarke,Andreas Breiter,2020-05-21 This book attends to the transformation of processes and practices in education, relating to its increasing digitisation and datafication. The introduction of new means to measure, capture, describe and represent social life in numbers has not only transformed the ways in which teaching and learning are organised, but also the ways in which future generations (will) construct reality with and through data. Contributions consider data practices that span across different countries, educational fields and governance levels, ranging from early childhood education, to schools, universities, educational technology providers, to educational policy making and governance. The book demonstrates how digital data not only support decision making, but also fundamentally change the organisation of learning and teaching, and how these transformation processes can have partly ambivalent consequences, such as new possibilities for participation, but also the monitoring and emergence/manifestation of inequalities. Focusing on how data can drive decision making in education and learning, this book will be of interest to those studying both educational technology and educational policy making. The chapters in this book were originally published in Learning, Media and Technology. Chapter 4 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

**You've Been Played** Adrian Hon,2022-09-20 How games are being harnessed as instruments of exploitation—and what we can do about it Warehouse workers pack boxes while a virtual dragon races across their screen. If they beat their colleagues, they get an award. If not, they can be fired. Uber presents exhausted drivers with challenges to keep them driving. China scores its citizens so they behave well, and games with in-app purchases use achievements to empty your wallet. Points, badges, and leaderboards are creeping into every aspect of modern life. In *You've Been Played*, game designer Adrian Hon delivers a blistering takedown of how corporations, schools, and governments use games and gamification as tools for profit and coercion. These are games that we often have no choice but to play, where losing has heavy penalties. *You've Been Played* is a scathing indictment of a tech-driven world that wants to convince us that misery is fun, and a call to arms for anyone who hopes to preserve their dignity and autonomy.

Amid the buzz from news outlets, websites and social media peddling 'this works' approaches and 'quick fix' solutions, this book provides educators with a practical tool to help answer important questions such as: what does this trend actually involve? Is it worth the investment of time and resources? Does it work – what does research say? Do the claimed benefits to students outweigh any downsides? In this timely book, David Armstrong and Gill Armstrong cast a critical, expert eye over these trends, referencing the latest research and offering a framework for considering educational trends, empowering readers as informed critical consumers. They argue that trends disclose deeper truths about the state and direction of contemporary public education in Australia, England and the US and provide original, thought-provoking analysis. This book demonstrates that a greater understanding of trends can teach some important lessons, including how parents, teachers and educational decisions makers can agitate and collaborate for a modernised and more socially equitable education system. *Educational Trends Exposed* is essential reading for pre- and in-service teachers, and all educational decision makers who are faced with a choice of which trend, if any, to follow.
