**Art of the Classic Car** Peter Bodensteiner, 2013-09-16 DIV The rarity and historical significance of prewar classic and antique cars make them hot commodities on the collector car market. These are the automobiles that populate the fairways and manicured lawns of the world's greatest car shows in alluring locales like Pebble Beach, California, and Amelia Island, Florida. These are the cars that bring a hush to the hall when they roll across the blocks at auctions around the world. These are the cars that fill the world's greatest collections, like those of Ralph Lauren, Mark Knopfler, and various members of royal families. These are the cars from history's premiere automakers: hallowed names like Packard, Duesenberg, Stutz, Bugatti, Mercedes-Benz, Cord, and others's six-figure and million-dollar machines that thrill Barrett-Jackson audiences and drive bidders to frenzy. Art of the Classic Car features the stunning studio photography of Peter Harholdt (Art of the Hot Rod, Art of the Muscle Car), lavished on the most significant automobiles from the classic era: the 1910s to early 1940s. Every page contains framable-quality portraits of some of the most important cars ever made, with each car accompanied by a short essay from automotive expert Peter Bodensteiner that places the model contextually within automotive history. Complete with period ads and promotional art, Art of the Classic Car is the most beautiful pictorial history of classic cars ever produced./div

Classic American Cars Charlie Morgan,2016 As the 19th century morphed into the 20th, the automobile was still in its infancy, yet more and more manufacturers were entering the burgeoning market. The first National Automobile Show was held in New York City's Madison Square in 1900, with 51 exhibitors showing off their wares to almost 50,000 visitors. But many of these manufacturers dropped by the wayside or were merged into other companies so that by the end of the 1920s the industry was dominated by the Big Three of Chrysler, Ford, and General Motors. The vehicle that had the biggest impact was the Ford Model T (which arrived in 1908 and more than 15 million had been sold by the time production ceased in 1927), but many other American classics are covered in this publication: legends such as the Ford Mustang and Thunderbird, the Chevrolet Bel Air and Corvette, Cadillac's De Ville and Eldorado, along with names of a bygone era such as Packard, Studebaker, and the unrivaled opulence of Duesenberg.

**Configuring the Networked Self** Julie E. Cohen, 2012-01-24 The legal and technical rules governing flows of information are out of balance, argues Julie E. Cohen in this original analysis of information law and policy. Flows of cultural and technical information are overly restricted, while flows of personal information often are not restricted at all. The author investigates the institutional forces shaping the emerging information society and the contradictions between those forces and the ways that people use information and information technologies in their everyday lives. She then proposes legal principles to ensure that people have ample room for cultural and material participation as well as greater control over the boundary conditions that govern flows of information

to, from, and about them.

Resurrecting Bertha Rob Siegel,2019-09-15 To most people, cars are just appliances to be disposed of when they rust, become unreliable, or are outgrown. But to car people, it's different. Cars are like photographs that occupy physical space. They hold aromas that trigger memories, and remind us of who we once were. In addition, to some people, the relationship with the car itself is a real thing. Many enthusiasts pine for the cars of their youth, regret that they ever let them go, and yearn and search for them the way people do with old lovers, hoping to find them and rekindle that old spark. In *Resurrecting Bertha*, Rob Siegel assures you that this is normal (well, as normal as anything is with car people), and embarks on this journey himself. Writing in his trademark Hack Mechanic voice that's enthralled readers for 35 years, Rob describes his original eight-year relationship with his highly-modified 1975 BMW 2002 Bertha, selling the car to a dear friend, its 26 years of storage, and buying it back in a weak whisky-soaked moment only to experience the oh dear God what did I just do regret when he raises the long-closed garage door and comes face-to-face with the badly deteriorated car. The book details the steps Rob went through to get the car running, then driving, then sufficiently sorted to make a 2000-mile drive, and how the reconnection with the car was so much deeper than he expected. *Resurrecting Bertha* is about more than just the nuts and bolts; it's about deciding what's important, the joy of doing good, and how, if you do it right, not only can you go home again, but you can do so in the same car.

**Porsche 914** Richard Gooding,2016-07-15 The Porsche 914 was born into consistently confusing

and troubled times at Porsche and Volkswagen, not least with the idea of a non-911 Porsche horrifying many at the time. A Porsche with an engine that wasn't in the back was simply unthinkable. Richard Gooding examines the story of a car of mixed parentage, which against the odds became a success in its relatively short, six-and-a half year lifespan. Around 119,000 cars were sold from 1969 to 1975, outselling contemporary rivals such as the Opel GT, and meaning it was the first mid-engined car to achieve six-digit sales. As a present-day classic, although challenging to some, low-slung looks and bright colours make the 1970s 914 period-perfect. Combined with near-ideal weight distribution and a low centre of gravity, its mid-engine layout means the 914 can achieve cornering G-forces comparable to the contemporary 911. The 914 was seen as a car that could inject a shot of glamour into VW's slightly worthy and dependable range of air-cooled cars. This book covers the history, development and manufacture of the 914 through troubled times at Porsche and Volkswagen and studies the impact of its design upon its successors. Buying and owning a 914 today is covered, and the book is illustrated with 218 colour photographs.
