Nonlinear Editing Basics Steven E. Browne, 1998 Nonlinear Editing Basics is an essential guide for the student or professional to understanding nonlinear editing. Not a technical manual, this easy-to-understand guide to film and video post-production incorporates the basics of nonlinear editing along with the telecine bay, three two pulldown, and simple operation of five important and powerful editing systems. The author incorporates his experience with the Editbox, Media 100, Avid Lightworks, and DVision to bring not only an overview of the nonlinear process, but to describe the basic operation of each of these powerful editors. Regardless of whether one is looking for film or video information, this text explains

the basics of both, as well as how they are interrelated. If there is a film project to be finished on video or a video project to finish in the nonlinear editor, the answer to how it is done can be found in this book. Starting with film and video basics, this book explains the integration of the nonlinear editor, as well as why some projects continue to cut workprint alongside the nonlinear editor. It addresses the use of the electronic editors to complete feature films in record time, in addition to the dangers of cutting on these quick and sometimes too powerful systems. The nonlinear editor can be mastered quickly and efficiently if the overall concept is understood. This text not only offers a clear, concise conceptual understanding, but also gives practical operation techniques using specific machines. Steven E. Browne is a Senior Editor in the Finishing Department of New Wave Entertainment in California. He is the author of two other Focal Press titles, *Video Editing*, now in its third edition, and *Film/Video Terms and Concepts*.

Cibola Burn James S. A. Corey, 2014-06-17 The fourth book in the NYT bestselling Expanse series, Cibola Burn sees the crew of the Rocinante on a new frontier, as the rush to colonize the new planets threatens to outrun law and order and give way to war and chaos. Now a Prime Original series. HUGO AWARD WINNER FOR BEST SERIES Enter a new frontier. An empty apartment, a missing family, that's creepy. But this is like finding a military base with no one on it. Fighters and tanks idling on the runway with no drivers. This is bad juju. Something wrong happened here. What you should do is tell everyone to leave. The gates have opened the way to a thousand new worlds and the rush to colonize has begun. Settlers looking for a new life stream out from humanity's home planets. Ilus, the first human colony on this vast new frontier, is being born in blood and fire. Independent settlers stand against the overwhelming power of a corporate colony ship with only their determination, courage, and the skills learned in the long wars of home. Innocent scientists are slaughtered as they try to survey a new and alien world. The struggle on Ilus threatens to spread all the way back to Earth. James Holden and the crew of his one small ship are sent to make peace in the midst of war and sense in the midst of chaos. But the more he looks at it, the more Holden thinks the mission was meant to fail. And the whispers of a dead man remind him that the great galactic civilization that once stood on this land is gone. And that something killed it. Practical Common Lisp Peter Seibel, 2006-11-01 * Treats LISP as a language for commercial applications, not a language for academic AI concerns. This could be considered to be a secondary text for the Lisp course that most schools teach. This would appeal to students who sat through a LISP course in college without quite getting it - so a nostalgia approach, as in wow-lisp can be practical... * Discusses the Lisp programming model and environment. Contains an introduction to the language and gives a thorough overview of all of Common Lisp's main features. * Designed for experienced programmers no matter what languages they may be coming from and written for a modern audience—programmers who are familiar with languages like Java, Python, and Perl. * Includes several examples of working code that actually does something useful like Web programming and database access.
