Extremism, Free Speech and Counter-Terrorism Law and Policy Ian Cram,2019-03-25 This edited collection addresses a number of free speech vs security concerns that are engaged by counter-terrorism law and policy makers across a number of liberal democracies, and explores the delicate balance between free speech and the censoring of views that promote hatred or clash with fundamental democratic values. It does this by looking at the perspectives and level of disagreement between those who consider today’s counter-terrorism and extremism strategies to be a soft and liberal approach, and those who believe these strategies disproportionately impact freedom of expression and association and non-violent political dissent. The contributors include academics, practicing lawyers, and think-tank analysts who examine whether universities and schools incubators of violent radicalism and debate, and whether the views of ‘extremist’ speakers and hate preachers need to be censored. Outside the UK, critical discussion of the regulation of counter-terrorism, extremism, and free speech in other liberal democracies is also offered. This book will be of great interest to researchers and practitioners with interests in extremism, terrorism, civil rights, and freedom of speech.

Advances in Information Retrieval Paul Clough,Colum Foley,Cathal Gurrin,Gareth Jones,Wessel Kraaij,Hyowon Lee,Vanessa Murdock,2011-04-12 This book constitutes the refereed proceedings of the 33rd annual European Conference on Information Retrieval Research, ECIR 2011, held in Dublin, Ireland, in April 2010. The 45 revised full papers presented together with 24 poster papers, 17 short papers, and 6 tool demonstrations were carefully reviewed and selected from 223 full research paper submissions and 64 poster/demo submissions. The papers are organized in topical sections on text categorization, recommender systems, Web IR, IR evaluation, IR for Social Networks, cross-language IR, IR theory, multimedia IR, IR applications, interactive IR, and question answering /NLP.

On Counter-Enlightenment, Existential Irony, and Sanctification Judah Matras,2021-12-14 This book introduces the topics of Enlightenment, Counter-Enlightenment, and social demography in Western art musics and demonstrates their historical and sociological importance. The essays in this book explore the concepts of “existential irony” and “sanctification,” which have been mentioned or discussed by music scholars, historians, and musicologists only either in connection with specific composers’ works (Shostakovich’s, in the case of “existential irony”) or very parenthetically, merely in passing in the biographies of composers of “classical” musics. This groundbreaking work illustrates their generality and sociological sources and correlates in contemporary Western art musics.

Make Each Click Count Using Google Shopping Andy Splichal,2020-05-20 Winner of The Official 2020 Best of Los Angeles AwardWhen done well, Google Shopping provides e-commerce retailers with the most profitable marketing channel available today. However, advertising with Google Shopping has many moving parts including creating and uploading products to Google Merchant Center, managing products inside the Google Ads interface, and optimizing your account results based on historical data. The complexity of Google Shopping creates many poorly managed and underperforming accounts leaving vast opportunities for those that can create well-run and optimized Google Shopping campaigns.Packed with strategies and step-by-step instructions, Make Each Click Count Using Google Shopping delivers the knowledge needed for those wanting to properly setup, optimize and profit using Google Shopping to advertise for years to come.What's included?This book has been divided into 5 main sections.- Laying The Groundwork - Here Google Shopping is explained including the history, what it has now become and what it looks like.- Optimizing Google Merchant Center - Properly optimizing Merchant Center with complete data is essential for success using Google Shopping campaigns. This section focuses on the importance of Merchant Center as well as best-practices and common techniques for creating a fully optimized Merchant Center account.- Optimizations Inside Google Ads - This section covers in detail the strategies and best-practices for optimizing Shopping campaigns inside the Google Ads interface. Discover how to best optimize your campaigns using historical data to predict future success in relations to keywords, adjusting product bids, adjusting mobile bids, adjusting location bids and more.- Automating Google - The fourth section goes into detail on automated features of Google Shopping including the new Google Smart Shopping campaigns, different automated bid strategies and merchant participating in Google Shopping Actions.- Advanced Techniques - Written for those wishing to dive even deeper into Google Shopping, this section looks at advanced techniques such as using the Google Ads editor, using supplemental feeds and using positive keywords to control search terms.How Should You Read This Book?How to read this book is going to depend on you and what you want to take from the book. Reading the book in order, cover-to-cover, will lead to some great insights in a perspective you have never thought about - even for the most experienced advertiser - and provide a full look at advanced techniques and strategies.For the advertiser just starting with Google Shopping, this book will lead them through a journey from inception to completion with a step-by-step guide to create and maintain successful Google Shopping campaigns.If you are pressed for time, start reading the chapter that details where you currently need help in your account. However, make sure you return to read the full book!Won't This Book Become Outdated?The short answer is YES. It is hard to believe that it has been almost five years since I published my first book - Make Each Click Count - T.O.P. Guide To Success Using Google Ads.In the five years since that book was published, the Google interface has changed multiple times. Some of the terminology has changed. Heck, even the name has changed (Google AdWords is now Google Ads). However, the strategies and underlying fundamentals for my original book have not changed.Likewise, with this book, I can promise with absolute certainty that in a year or less (maybe even by the time this book is published) some of the Google Ads interface will have changed.That is just the nature of Google AdWords (excuse me, I meant to say Google Ads).However, what won't change are the advanced strategies on how to segment your account and how to use the historical data to optimize your account to predict future success.

The Free Animal Lee MacLean,2013-03-13 Free will is a key but contested concept in the work of Jean-Jacques Rousseau: while the famed philosopher is known to have asserted that free will distinguishes human beings from animals, several interpreters have argued that he merely pretends to have this belief for the sake of healthy politics and to avoid persecution by religious authorities. Through careful readings of key texts and letters, The Free Animal offers a new and original exploration of Rousseau’s views on free will, just in time for the 200th anniversary of his birth. Lee MacLean shows that Rousseau needs and uses the idea of human consciousness of free will to explain the development of morality, convention, and vice. MacLean bases her argument on a broad range of texts, from canonical works to Rousseau’s untranslated letters and drafts. Featuring careful analyses and an extensive engagement with the secondary literature, The Free Animal offers a novel interpretation of the changing nature and complexity of Rousseau’s intention.

Austrian Economics: Tensions and New Directions Bruce J. Caldwell,Stephan Böhm,2012-12-06 When we first invited the group of distinguished scholars represented here to contribute to a new volume on Austrian economics, four themes were stressed: tensions, new directions, selectivity, and criticism. In this brief introduction we will explain why those themes were emphasized and thereby shed light on our intentions and aspirations for the volume. The subtitle Tensions and New Directions indicates clearly the intent of the volume desired. If we take the 1871 publication of Carl Menger's Principles of Economics (Grundsiitze der Volkswirtschaftslehre) as mark ing its birth, the Austrian tradition is now well over one hundred years old. The origins of the so-called Austrian Revival are more difficult to pinpoint precisely, but many would accept two decades as a reasonable estimate of its lifespan. In any case, since the mid-1970s several collections of articles written by Austrians have been published. The intent of these collections appeared to be to educate, persuade, and inspire various audiences. Uninformed readers needed to be told about the specifics of the Austrian position, to be shown how it differed from and improved upon its rivals. The initiated needed to be reassured that their commitment to a novel program was justified. As such, much of the recent Austrian literature has consisted either of exegetical accounts of the views of past figures, or of critical assessments of the positions of alternative research programs in economics from an Austrian perspective.

Austrian Economics in Debate Willem Keizer,Bert Tieben,Rudy van Zijp,1997 This volume demonstrates how the Austrian challenge, and the debates it inspires, can continue to benefit contemporary developments in micro- and macroeconomic theory, and can offer insights into other schools of thought.
