Implementing ETSI standardised RTCP-based Interdestination Media Synchronization Torsten Löbner,2011-09-14 Inhaltsangabe:Introduction: This thesis represents the results of my research in synchronization of television during my graduation project. I will describe a solution, which is actually standardized and give a solution on how to implement it in this document. It is a pleasure to thank the people who made this thesis possible. First of all these are my supervisors Oskar van Deventer and Michael Maruschke, who supported me by reviewing my work and discussion on content. I also would like to thank Ray van Brandenburg and Hans Stokking, who were always open for discussion. This work was done at TNO Information and communication technology. The part of TNO this thesis is placed has its main research topic in media technologies and content delivery systems. Research is done in cooperation with Dutch and international companies as well, as with international research groups. TNO is also a member in the NGNLab project, which main purpose is Next Generation Networks and topics related to that. The purpose of this thesis is to create a proof of concept of the synchronization system for IPTV described by ETSI TS 182 027 [2] and ETSI TS 183 063 [1] by using the protocol extension to RTCP from ETSI TS 183 063 Annex W. During planing, implementation and evaluation specifications have to be proofed and requirements, for a sufficient work have to be generated, if the standardized environment is not clear defined on some part of the implementation or not sufficient. This document should give the reader an overview of the necessary requirements and the way of development of the proof of concept. This thesis is divided into seven chapters. The first chapters are the theoretical base, followed by the planing and evaluation of the prototyped IDMS system. In chapter two an overview of the thesis background and necessary protocols needed for communication is given. This is completed by a description of the network framework, which will be the platform for the synchronization approach. The extension for television usage of the network described in chapter two is explained in chapter three. The Software analyzed for the usage in the prototyped implementation is described in chapter four. The necessary modifications and extensions to this software and structure of the applications used to build the environment for the described implementation completes the theoretical part of the thesis. Chapter five shows these software planing. Chapter six gives and overview of [...]

Customer Success Nick Mehta,Dan Steinman,Lincoln Murphy,2016-02-29 Your business success is now forever linked to the success of your customers Customer Success is the groundbreaking guide to the exciting new model of customer management. Business relationships are fundamentally changing. In the world B.C. (Before Cloud), companies could focus totally on sales and marketing because customers were often 'stuck' after purchasing. Therefore, all of the 'post-sale' experience was a cost

center in most companies. In the world A.B. (After Benioff), with granular per-year, per-month or per-use pricing models, cloud deployments and many competitive options, customers now have the power. As such, B2B vendors must deliver success for their clients to achieve success for their own businesses. Customer success teams are being created in companies to quarterback the customer lifecycle and drive adoption, renewals, up-sell and advocacy. The Customer Success philosophy is invading the boardroom and impacting the way CEOs think about their business. Today, Customer Success is the hottest B2B movement since the advent of the subscription business model, and this book is the one-of-a-kind guide that shows you how to make it work in your company. From the initial planning stages through execution, you'll have expert guidance to help you: Understand the context that led to the start of the Customer Success movement Build a Customer Success strategy proven by the most competitive companies in the world Implement an action plan for structuring the Customer Success organization, tiering your customers, and developing the right cross-functional playbooks Customers want products that help them achieve their own business outcomes. By enabling your customers to realize value in your products, you're protecting recurring revenue and creating a customer for life. Customer Success shows you how to kick start your customer-centric revolution, and make it stick for the long term.

Marketing in the Round Gini Dietrich,Geoff Livingston,2012-04-24 Drive more value from all your marketing and communications channels--together! Demolish your silos and sync all your messaging, strategies, and tactics (really!). Optimize every medium and platform, from iPad and Facebook to TV and direct. This book is a must-read for every senior marketing, communications, and PR decision-maker. It's not about social media. Or new (or old) media. It's about results--and there's only one way to get results. You must finally bite the bullet, tear down your silos, and integrate all your marketing and communications. That's how you choose the best platforms and messages for each customer. That's how you make research and metrics work. That's how you overcome today's insane levels of complexity and clutter. You're thinking: Oh, that's all I need to do? "Just" integrate my whole organization? Are you nuts? No. We're not. It can be done. This book's authors have done it. They've shown others how to do it. And now they're going to show you. Step by step. Strategy. Tactics. Research. Metrics. Culture. Social. Mobile. Direct. Broadcast. Print. All of it. With you, the marketing/communications decision-maker, right at the center...right where you belong! Even now, organizational silos prevent most companies from conversing coherently with customers, delivering the right targeted messages, and building real synergies across all their marketing and communications programs. Now, Gini Dietrich and Geoff Livingston show how to finally break down those silos, bridging traditional and newer disciplines to drive more value from all of them. You'll learn how to create a flexible marketing hub with integrated spokes including sales, PR, advertising, customer service, HR, social media, and the executive team. Then, you'll learn how to use your hub to speak cohesively with each customer through the tools and platforms that deliver the best results at the lowest cost. Dietrich and Livingston guide you through hands-on strategic planning, illustrating key points with real case studies and offering practical exercises for applying their principles. You'll learn how to perform baseline analyses of media from iPad apps to radio, optimize resource allocation, change culture to overcome siloed behavior, use measurement to clear away obstacles, and gain more value from every marketing investment you make. Pull it all together--finally! How to successfully integrate your tactics, tools, messages, and teams Better goals, better results: beyond "SMART" to "SMARTER" Specific, measurable, attainable, relevant, time-bound, evaluate, and reevaluate Better listening: stakeholders, customers, and research that works How to make sure you hear what really matters Four powerful ways to market in the round When to go direct, come from above, use the groundswell, or execute flanking maneuvers

Apprentice in Death J. D. Robb,2016 Lieutenant Eve Dallas returns in a fast-paced new novel from #1 New York Times bestselling author J. D. Robb. Nature versus nurture... The shots came quickly, silently, and with deadly accuracy. Within seconds, three people were dead at Central Park's ice-skating rink. The victims: a talented young skater, a doctor, and a teacher. As random as random can be. Eve Dallas has seen a lot of killers during her time with the NYPSD but never one like this. A review of the security videos reveals that the victims were killed with a tactical laser rifle fired by a sniper, who could have been miles away when the trigger was pulled. And though the list of locations where the shooter could have set up seems endless, the number of people with that particular skill set is finite: police, military, professional killer. Eve's husband, Roarke, has unlimited resources--and genius--at his disposal. And when his computer program leads Eve to the location of the sniper, she learns a shocking fact: There were two--one older, one younger. Someone is being trained by an expert in the science of killing, and they have an agenda. Central Park was just a warm-up. And as another sniper attack shakes the city to its core, Eve realizes that though we're all shaped by the people around us, there are those who are just born evil...
