Integrating Psychodrama and Systemic Constellation Work Ronald Anderson,Karen Carnabucci,2011-10-15 Systemic Constellation Work is a rapidly growing experiential healing process that is being embraced by a variety of helping professionals, both traditional and alternative, worldwide. This book explores the history, principles and methodology of this approach, and offers a detailed comparison with psychodrama - the original mind-body therapy - explaining how each method can enhance the other. Constellation work is based on the notion that people are connected by unseen energetic forces and suggests that the psychological, traumatic and survival experiences of our ancestors are genetically passed forward to the next generation and may live within us. Using insightful case studies from a variety of client groups, this book shows how Systemic Constellation Work can expand the possibilities of psychodrama techniques, and can be successfully integrated with psychodramatic enactment, guided imagery, ritual, concretization and other methods of healing and personal growth. This book will be essential reading for students and practitioners of psychodrama and Constellation work, as well as counselors, mental health professionals, experiential therapists, creative and expressive arts therapists and alternative practitioners looking to widen their knowledge of mind-body therapies.

Desire, Pain and Thought Marilia Aisenstein,2023-06-02 Desire, Pain and Thought presents a new perspective on primal erotogenic masochism, which Marilia Aisenstein regards as the core of psychoanalytic theory. Aisenstein distinguishes between pathological masochism – the active search for pain – and primal erotogenic masochism, which she believes develops in early childhood. Desire, Pain and Thought explains that the formation of this response in a child is essential to the survival of the individual and the development of resilience. Aisenstein skilfully and convincingly uses her deep understanding of metapsychology and her mastery of Freud’s seminal papers to demonstrate that thought is one of the manifestations of desire which implies a painful renunciation of the object of desire. By moving away from its pathological, negative connotation to a more positive one, the book presents an understanding of masochism as “the guardian of life”. Desire, Pain and Thought will be essential reading for psychoanalysts in practice and in training.
