**Shelldrake** Harold A. Skaarup,2012-02-22 Shelldrake is an informative and detailed synopsis of the carefully preserved and restored guns and artillery on display in Canada. The Royal Regiment of Canadian Artillery is represented by a long and distinguished line of gunners with historical ties back to the days before Canadas Confederation. The honour of defending Canada while standing ready to support operations overseas in peace and war continues to this day. In doing so, it is necessary to remember that the weapons of war are an integral part of what keeps this nation safe, although the examples that have been used to make it so are few and far between. The descriptions of Canadian artillery and the places of honour where they can be viewed highlights the importance of the equipment that brought our nation forward at key turning points in history when our guns were in use as tools of war at home and overseas. This guide book will show the interested reader where to find examples of the historical guns preserved in Canada, and perhaps serve as a window on how Canadas military contribution to security in the world has evolved.

**Capes and Clockwork 2** D. Alan Lewis,2016-07-26 Superheroes in the Age of Steam Return again to a forgotten time when steam and clockwork powered the world, and heroes rose to battle against the sinister forces that threatened the world. Some former heroes return to the fight, while new ones rise up in this fusion of fantasy, beauty, and adventure. Tease your imagination with twenty stories of good versus evil, monster versus hero, steam versus muscle.

**"Ironsides"** Harold A. Skaarup,2011-08-12 Major Hal Skaarup has woven together an informative and detailed synopsis of the carefully preserved and restored armoured fighting vehicles on display in Canada. He highlights the importance of these upon key turning points in history when these AFVs were in use as tools of war at home and overseas. We often associate the evolution of military prowess with the advancement of sophisticated technology. Major Skaarup's descriptions of Canadian armour as it evolved to the level it has today reveals that military planners have had to be continuously creative in adapting to the changes in modern combat. They had to devise many intricate techniques, tactics and procedures to overcome the insurgents and opposition forces faced in Afghanistan and future overseas missions where Canadian armour will be brought into play. This guide book will show the interested reader where to find examples of the historical armour preserved in Canada, and perhaps serve as a window on how Canada's military contribution to safety and security in the world has evolved.

Dismantlement and Destruction of Chemical, Nuclear and Conventional Weapons N. Schulte,2013-04-17 The end ofthe Cold War opened unprecedented opportunities for reductions in weapons of mass destruction. With these opportunities came new challenges, both scientific and political. Traditionally approached by different groups, the scientific, technical and political challenges are inextricably intertwined. Agreements to dismantle and destroy chemical, nuclear and conventional weapons, after having been negotiated via diplomatic channels, require the expertise of scientists associated with their development to determine the safest and most environmentally sound methods of destruction. It is in this context that representatives from sixteen countries and five international organizations were convened jointly by NATO, the Ministry of Foreign Affairs of the Federal Republic of Germany and the State Government of North Rhine Westphalia 19-21 May, 1996 in a meeting near Bonn to take stock of worldwide efforts to destroy and dismantle chemical, nuclear and conventional weapons remaining after the end ofthe Cold War. NATO support was provided under the auspices of the NATO Science Committee's Panel on Disarmament Technologies. The conference brought together the major actors involved in the dismantlement and destruction of chemical, nuclear and conventional weapons, highlighted the substantial accomplishments achieved in this area and pinpointed the remaining technical obstacles still to be overcome. It also underlined the critical importance of transparency, data exchange and verification as indispensable preconditions for disarmament and cooperative security.

**Tear Gas Epiphanies** Kirsty Robertson,2019-06-07 Museums are frequently sites of struggle and negotiation. They are key cultural institutions that occupy an oftentimes uncomfortable place at the crossroads of the arts, culture, various levels of government, corporate ventures, and the public. Because of this, museums are targeted by political action but can also provide support for contentious politics. Though protests at museums are understudied, they are far from anomalous. Tear Gas Epiphanies traces the as-yet-untold story of political action at museums in Canada from the early twentieth century to the present. The book looks at how museums do or do not archive protest ephemera, examining a range of responses to actions taking place at their thresholds, from active encouragement to belligerent dismissal. Drawing together extensive primary-

source research and analysis, Robertson questions widespread perceptions of museums, strongly arguing for a reconsideration of their role in contemporary society that takes into account political conflict and protest as key ingredients in museum life. The sheer number of protest actions Robertson uncovers is compelling. Ambitious and wide-ranging, Tear Gas Epiphanies provides a thorough and conscientious survey of key points of intersection between museums and protest – a valuable resource for university students and scholars, as well as arts professionals working at and with museums.
