Close Engagements with Artificial Companions Yorick Wilks,2010-03-24 What will it be like to admit Artificial Companions into our society? How will they change our relations with each other? How important will they be in the emotional and practical lives of their owners – since we know that people became emotionally dependent even on simple devices like the Tamagotchi? How much social life might they have in contacting each other? The contributors to this book discuss the possibility and desirability of some form of long-term computer Companions now being a certainty in the coming years. It is a good moment to consider, from a set of wide interdisciplinary perspectives, both how we shall construct them technically as well as their personal philosophical and social consequences. By Companions we mean conversationalists or confidants – not robots – but rather computer software agents whose function will be to get to know their owners over a long period. Those may well be elderly or lonely, and the contributions in the book focus not only on assistance via the internet (contacts, travel, doctors etc.) but also on providing company and Companionship, by offering aspects of

real personalization.

World Literature, Cosmopolitanism, Globality Gesine Müller,Mariano Siskind,2019-10-21 From today's vantage point it can be denied that the confidence in the abilities of globalism, mobility, and cosmopolitanism to illuminate cultural signification processes of our time has been severely shaken. In the face of this crisis, a key concept of this globalizing optimism as World Literature has been for the past twenty years necessarily is in the need of a comprehensive revision. World Literature, Cosmopolitanism, Globality: Beyond, Against, Post, Otherwise offers a wide range of contributions approaching the blind spots of the globally oriented Humanities for phenomena that in one way or another have gone beyond the discourses, aesthetics, and political positions of liberal cosmopolitanism and neoliberal globalization. Departing basically (but not exclusively) from different examples of Latin American literatures and cultures in globalized contexts, this volume provides innovative insights into critical readings of World Literature and its related conceptualizations. A timely book that embraces highly innovative perspectives, it will be a mustread for all scholars involved in the field of the global dimensions of literature.

Norwegian Wood Haruki Murakami,2010-08-11 From the bestselling author of Kafka on the Shore: A magnificent coming-of-age story steeped in nostalgia, “a masterly novel” (The New York Times Book Review) blending the music, the mood, and the ethos that were the sixties with a young man’s hopeless and heroic first love. Now with a new introduction by the author. Toru, a serious young college student in Tokyo, is devoted to Naoko, a beautiful and introspective young woman, but their mutual passion is marked by the tragic death of their best friend years before. As Naoko retreats further into her own world, Toru finds himself drawn to a fiercely independent and sexually liberated young woman. Stunning and elegiac, Norwegian Wood first propelled Haruki Murakami into the forefront of the literary scene.

Creating Personalities for Synthetic Actors Robert Trappl,Paolo Petta,1997-03-20 Progress in computer animation has gained such a speed that, before long, computer-generated human faces and figures on screen will be indistinguishable from those of real humans. The potential both for scripted films and real-time interaction with users is enormous. However, in order to cope with this potential, these faces and figures must be guided by autonomous personality agents. This carefully arranged volume presents the state of the art in research and development in making synthetic actors more autonomous. The papers describe the different approaches and solutions developed by computer animation specialists, computer scientists, experts in AI, psychologists and philosophers, from leading laboratories world-wide. Finally, a bibliography comprising more than 200 entries enable further study.

Decolonizing Diasporas Yomaira C Figueroa-Vásquez,2020-10-15 Mapping literature from Spanish-speaking sub-Saharan African and Afro-Latinx Caribbean diasporas, Decolonizing Diasporas argues that the works of diasporic writers and artists from Equatorial Guinea, Puerto Rico, the Dominican Republic, and Cuba offer new worldviews that unsettle and dismantle the logics of colonial modernity. With women of color feminisms and decolonial theory as frameworks, Yomaira C. Figueroa-Vásquez juxtaposes Afro-Latinx and Afro-Hispanic diasporic artists, analyzing work by Nelly Rosario, Juan Tomás Ávila Laurel, Trifonia Melibea Obono, Donato Ndongo, Junot Díaz, Aracelis Girmay, Loida Maritza Pérez, Ernesto Quiñonez, Christina Olivares, Joaquín Mbomio Bacheng, Ibeyi, Daniel José Older, and María Magdalena Campos-Pons. Figueroa-Vásquez's study reveals the thematic, conceptual, and liberatory tools these artists offer when read in relation to one another. Decolonizing Diasporas examines how themes of intimacy, witnessing, dispossession, reparations, and futurities are remapped in these works by tracing interlocking structures of oppression, including public and intimate forms of domination, sexual and structural violence, sociopolitical and racial exclusion, and the haunting remnants of colonial intervention. Figueroa-Vásquez contends that these diasporic literatures reveal violence but also forms of resistance and the radical potential of Afro-futurities. This study centers the cultural productions of peoples of African descent as Afro-diasporic imaginaries that subvert coloniality and offer new ways to approach questions of home, location, belonging, and justice.

Our Final Invention James Barrat,2013-10-01 Elon Musk named Our Final Invention one of 5 books everyone should read about the future A Huffington Post Definitive Tech Book of 2013 Artificial Intelligence helps choose what books you buy, what movies you see, and even who you date. It puts the smart in your smartphone and soon it will drive your car. It makes most of the trades on Wall Street, and controls vital energy, water, and transportation infrastructure. But Artificial Intelligence can also threaten our existence. In as little as a decade, AI could match

and then surpass human intelligence. Corporations and government agencies are pouring billions into achieving AI's Holy Grail—human-level intelligence. Once AI has attained it, scientists argue, it will have survival drives much like our own. We may be forced to compete with a rival more cunning, more powerful, and more alien than we can imagine. Through profiles of tech visionaries, industry watchdogs, and groundbreaking AI systems, Our Final Invention explores the perils of the heedless pursuit of advanced AI. Until now, human intelligence has had no rival. Can we coexist with beings whose intelligence dwarfs our own? And will they allow us to?

Eager to Learn National Research Council,Commission on Behavioral and Social Sciences and Education,Committee on Early Childhood Pedagogy,2001-01-22 Clearly babies come into the world remarkably receptive to its wonders. Their alertness to sights, sounds, and even abstract concepts makes them inquisitive explorersâ€and learnersâ€every waking minute. Well before formal schooling begins, children's early experiences lay the foundations for their later social behavior, emotional regulation, and literacy. Yet, for a variety of reasons, far too little attention is given to the quality of these crucial years. Outmoded theories, outdated facts, and undersized budgets all play a part in the uneven quality of early childhood programs throughout our country. What will it take to provide better early education and care for our children between the ages of two and five? Eager to Learn explores this crucial question, synthesizing the newest research findings on how young children learn and the impact of early learning. Key discoveries in how young children learn are reviewed in language accessible to parents as well as educators: findings about the interplay of biology and environment, variations in learning among individuals and children from different social and economic groups, and the importance of health, safety, nutrition and interpersonal warmth to early learning. Perhaps most significant, the book documents how very

early in life learning really begins. Valuable conclusions and recommendations are presented in the areas of the teacher-child relationship, the organization and content of curriculum, meeting the needs of those children most at risk of school failure, teacher preparation, assessment of teaching and learning, and more. The book discusses: Evidence for competing theories, models, and approaches in the field and a hard look at some day-to-day practices and activities generally used in preschool. The role of the teacher, the importance of peer interactions, and other relationships in the child's life. Learning needs of minority children, children with disabilities, and other special groups. Approaches to assessing young children's learning for the purposes of policy decisions, diagnosis of educational difficulties, and instructional planning. Preparation and continuing development of teachers. Eager to Learn presents a comprehensive, coherent picture of early childhood learning, along with a clear path toward improving this important stage of life for all children.
