Social Responsibility in the Global Apparel Industry combines an introduction to social and environmental issues in apparel manufacturing with an analysis of how corporate strategy and decisions made throughout the global supply chain can increase social responsibility. Readers learn how leading apparel and footwear brands and retailers attempt to solve complex problems including child labor, harassment and abuse, discrimination, excessive hours of work, low wages, poor factory health and safety, and negative impacts on the environment. Rissanen,2012-06-25 The production, use and eventual disposal of most clothing is environmentally damaging, and many fashion and textile designers are becoming keen to employ more sustainable strategies in their work. This book provides a practical guide to the ways in which designers are creating fashion with less waste and greater durability. Based on the results of extensive research into lifecycle approaches to sustainable fashion, the book is divided into four sections: source: explores the motivations for the selection of materials for fashion garments and suggests that garments can be made from materials that also assist in the management of textile waste make: discusses the differing approaches to the design and manufacture of sustainable fashion garments that can also provide the opportunity for waste control and minimization use: explores schemes that encourage the consumer to engage in slow fashion consumption last: examines alternative solutions to the predictable fate of most garments - landfill. Illustrated throughout with case studies of best practice from international designers and fashion labels and written in a practical, accessible style, this is a must-have guide for fashion and textile designers and students in their areas.

Bias Cut Blueprints Julianne Bramson, Susan

Lenahan, 2014-06-13 A novel approach to bias-cut garment design and construction. You've probably heard a lot of hearsay about the bias-cut. It's tricky. It's hard to sew. It uses too much fabric. The seams sag or ripple. It needs tons of basting. What if you could stop trying to control the bias and instead start using its unique properties in your favor? What if that enabled you to make fabulous clothes that fit and flatter? Our method: \* eliminates bias-cut sewing almost completely; \* simplifies textbooks' worth of pattern drafting with a simple math formula, no scientific calculator required! \* produces complicated-looking designs with a streamlined process; \* is efficient in both time and fabric, with only tiny slivers of material left over. The projects in this book are modular and have many options to create various garments. There are five blouses, three neckline variations, three sleeves, and eight skirt variations. Over 200 unique combinations are possible! Embrace bias-cut garment design with ease and flair!

### **The Personal Protective Technology Program at NIOSH**

National Research Council, Institute of Medicine, Board on Health Sciences Policy, Committee to Review the NIOSH Personal Protective Technology Program, 2008-10-25 Maintaining the health and safety of workers in the United States and globally is accomplished in part by reducing hazardous exposures through the use of personal protective equipment. Personal protective technologies (PPT) include respirators worn by construction workers and miners; protective clothing, respirators, and gloves worn by firefighters and mine rescue workers; and respirators and protective clothing worn by healthcare workers. An estimated 5 million workers are required to wear respirators in 1.3 million U.S. workplaces. For some occupations, such as firefighting, the worker's protective equipment is the only form of protection against life-threatening hazards; for other workers, the PPT is a supplement to ventilation and other environmental, engineering, or administrative hazard controls. In the United States, federal responsibility for civilian worker PPT is integral to the mission of the National Institute for Occupational Safety and Health (NIOSH). This book examines the NIOSH Personal Protective Technology Program (PPT Program) and specifically focuses on the relevance and impact of this program in reducing hazardous exposures and improving worker health and safety.

*Arnie: Pearls and Luggers in the Torres Strait* Arnie Duffield, Lee Duffield,2021-06-07 This is the story of Arnie Duffield, who arrived at Thursday Island, in Torres Strait, the Northern tip of

Australia, aged ten, in 1936 - beginning a life-time of adventure. His father worked on the famous sailing luggers, diving boats that harvested pearl shells and pearls for over 100 years up to 1980. Arnie with his father and brother, with their own hands would build their own flotilla of luggers, to operate as a family company over eventful decades: seeing the Great Depression, war and the immediate threat of invasion, a post-war boom in the region, the loss of divers and constant striving for safety at sea, failures of an industry, mounting threats to the environment. For ten years he managed an innovative project cultivating pearls for jewellery, a change from selling shells, the 'mother of pearl' used for buttons and ornamentation. The tropical life provided excitement, stimulus, dangers; material for yarns, about crocodiles or sharks, drunks, bad weather at sea, a near-drowning, a mercy dash in a fast boat to save a downed pilot, and a few close shaves on bush air-strips. Arnie became a leading personality in this world, a humourist and practitioner of the wisecrack, always quick with a come-back. From childhood days observing the hectic life of the far-away little port at Thursday Island, Waiben under its traditional name; then working as a young man, repairing warships, and operating the family-owned boats, he became, he would proudly state, a master mariner and proficient ship engineer. He would revel in the island life, enjoying great freedom, getting successes and hard blows; in private life, marrying, starting a family, experiencing the stresses and joys. At 95 he is known as the "last man standing" from days when the fleet would depart under sail.

### **Community Governance and Citizen-Driven Initiatives in Climate Change Mitigation** Jens Hoff, Quentin

Gausset, 2015-08-20 One of the most heartening developments in climate change mitigation in recent years has been the increasing attention paid to the principle of 'thinking globally and acting locally'. The failure of the international community to reach significant global agreements on the reduction of greenhouse gas emissions has led local governments, environmental organisations

and citizens themselves to focus increasingly on the local possibilities for action on climate change. This book analyses the strengths and weaknesses of the co-production of climate policies that take place where citizen engagement and local initiatives converge with public agencies. Case studies from Northern Europe, Australia/New Zealand and the USA reveal that traditional individualist approaches to promoting environmental behaviour epitomised by information campaigns and economic incentives cannot trigger the deep behavioural changes required to materially improve our response to climate change. Only by marshalling the forces of thousands, and eventually millions of citizens, can we manage to reach environmental sceptics, reinforce political action and create the new social norms that are sorely needed in our local, and global, response to climate change. This book will be of great relevance to scholars and policy makers with an interest in climate change politics and governance, community engagement and sustainable development.
