Grading Student Midwives' Practice Sam Chenery-

Morris, 2020-12-30 This book investigates the education and assessment of student midwives in clinical practice, paying particular attention to how their practice is graded. Chenery-Morris brings primary research, which explores students, mentors, and midwifery lecturers perspectives of practice learning and its assessment, together with the international literature on clinical knowledge, teaching and learning in practice and assessment of students drawn from a range of healthcare and education professions. Discussing how practice is graded, what constitutes valid practice knowledge, learning in clinical practice, evaluating practice learning and failing students, this book uses Basil Bernstein's theories to throw light on how we assess and whether we should assess performance in addition to whether a student is competent to practise. This is an important contribution to the field of midwifery education. It will also be relevant to those with an interest in practice education from a range of healthcare professions.

Education Rudolf Steiner, 2003 Rudolf Steiner, the often undervalued, multifaceted genius of modern times, contributed much to the regeneration of culture. In addition to his philosophical teachings, he provided ideas for the development of many practical activities including education--both general and special--agriculture,

medicine, economics, architecture, science, religion, and the arts. Today there are thousands of schools, clinics, farms, and many other organizations based on his ideas. Steiner's original contribution to human knowledge was based on his ability to conduct spiritual research, the investigation of metaphysical dimensions of existence. With his scientific and philosophical training, he brought a new systematic discipline to the field, allowing for conscious methods and comprehensive results. A natural seer from childhood, he cultivated his spiritual vision to a high degree, enabling him to speak with authority on previously veiled mysteries of life. Topics include: a social basis for education; the spirit of the Waldorf school; educational methods based on anthroposophy; children at play; teaching through the insights of spiritual science; adolescents after the fourteenth year; science, art, religion, and morality; the spiritual basis of education; the role of caring in education; the roots of education and the kingdom of childhood; address at a parents' evening; and education within the broader social context.

Creative Play the Steiner Waldorf Way Christopher

Clouder, Janni Nicol, 2014-09-15 Creative Play the Steiner Waldorf Way is the ideal book for parents who want their children to develop their creativity and imagination through play. It teaches you how to let your child develop according to the Steiner theory, which helps children to fulfil themselves naturally and holistically in mind, body and spirit. Each chapter covers a different element of your child's development and includes an expert summary of Steiner theory and how it relates to children and parents today. You will find instructions for how to make over 20 beautiful toys from natural materials to encourage your child to develop creativity, awareness, confidence and imagination.

*Improving Student Engagement and Development through
Assessment* Lynn Clouder, Christine Broughan, Steve Jewell, Graham
Steventon, 2013-05-20 With a unique focus on the relationship
between assessment and engagement this book explores what works
in terms of keeping students on course to succeed. Against a backdrop
of massification and the associated increase in student diversity there is
an escalating requirement for personalized, technology driven
learning in higher education. In addition, the advent of student fees
has promoted a consumer culture resulting in students having an
increasingly powerful voice in shaping curricula to their own
requirements. How does one engage and retain a group of students of
such diverse culture, ethnicity, ambition and experience? Using
examples from a variety of institutions worldwide this edited
collection provides a well-researched evidence base of current
thinking and developments in assessment practices in higher
education. The chapters discuss: Staff and student views on assessment
Engaging students through assessment feedback Assessment for
learning Assessing for employability Interdisciplinary and
transnational assessment Technology supported assessment for
retention The book draws together a wealth of expertise from a range
of contributors including academic staff, academic developers,
pedagogical researchers, National Teaching Fellows and Centres for
Excellence in Higher Education. Recognising that a pedagogy which
is embedded and taken-for-granted in one context might be
completely novel in another, the authors share best practice and
evaluate evidence of assessment strategies to enable academic
colleagues to make informed decisions about adopting new and

creative approaches to assessment. This interdisciplinary text will prove an invaluable tool for those working and studying in higher education.

Global Perspectives on Teaching Excellence Christine

Broughan, Graham Steventon, Lynn Clouder, 2018-02-02 Teaching excellence in higher education needs to be promoted and celebrated. However, a universal definition of excellent teaching remains elusive, and robust evidence about how it affects student learning appears to be lacking. This timely book explores the notion of teaching excellence from the viewpoint of a variety of international authors; guiding the reader to understand the complex terrain in which teaching excellence is foregrounded, and highlighting a number of key issues facing the future of global higher education. *Global Perspectives on Teaching Excellence* explores: what is meant by teaching excellence, whether it can be measured and if so, how? the impact of teaching excellence frameworks, initiatives and awards. the new challenges for delivering global teaching excellence fit for the 21st century. With a mix of political, theoretical and applied research foci, each chapter also includes a short critical commentary from international experts in the field to further the debate and situate the topics in a wider context. *Global Perspectives on Teaching Excellence* is essential reading for academic and education policymakers, researchers, and undergraduate and postgraduate students in education.

Chiller Anthony Ogunware, 2007-02 *Chiller-Hell, Coming to a High School Near You* by Anthony T. Ogunware There have been many high school shooting incidents in the past decade. In a few days, St. Joseph's County, Virginia will blast into the national and international spotlight. Two students at United High will make a point about judging others superficially in an excruciatingly painful

way. Do the names Justin and Chris read danger? It should. Come along as two best friends attempt to complete their high school senior year . There's one problem. Many students get in their way-jocks, athletes, and self-proclaimed cool students. Will their forceful discriminating antics toward Justin and Chris have the boys prepared to show their true emotions? How much torture, punishment, and bullying can they take before they go over the edge? Exactly how much is too much? Find out in this crazy chiller. You better sit still-you're in for a thrill Chiller Also available now: Chiller-Relationships Can Be Murder Coming soon from Anthony T. Ogunware: Chiller-Friend at Day, Killer by Midnight (A mystery novel)

Germanna John W. Wayland,2009-03-01 Germanna was a German settlement in the Colony of Virginia, settled in two waves, first in 1714 and then in 1717. Virginia Lieutenant Governor Alexander Spotswood encouraged the immigration by advertising in Germany for miners to move to Virginia and establish a mining industry in the colony.

A History of Orange County, Virginia William Wallace Scott,1974 Excerpt from A History of Orange County, Virginia: From Its Formation in 1734 (O. S.) To the End of Reconstruction in 1870; Compiled Mainly From Original Records; With a Brief Sketch of the Beginnings of Virginia, a Summary of Local Evets to 1907, and a Map I have undertaken to write this book because I thought that the history of Orange was notable enough to deserve preservation. It is much to be regretted that some competent person did not do this work long ago; for in the lapse of time and the neglect of opportunity many things that ought to have been preserved can not now be narrated with confidence as history, hardly as tradition. Though much has perished, much remains. I have read with diligence the minute

books of the county court from its organization in 1734 down to 1870; and can assert with complete candor that no known resource which I thought might afford information as to the past has been neglected. Name after name of places and people once locally historic has passed into oblivion and beyond the reach of the investigator. Regret is vain, and can not restore what is lost; my effort has been to save what is left, and to perpetuate it for posterity. Fortunately the county records are in excellent preservation, and the order books of the county court contain the history of the county, in the main, so far as it may now be written. I have been advised by judicious and well meaning friends to omit some of the more shocking details, such as the burning of Eve at the stake, the beheading of Peter, the cutting off. Of ears, burning in the hands, etc. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. The History of the City of Fredericksburg, Virginia Silvanus Jackson Quinn, 1908

A History of Orange County, Virginia William Wallace Scott, 1907

Leadless decorative tiles, faience, and mosaic W.J. Furnival,

Fredericksburg, Virginia 1608-1908 Author: Sylvanius Jackson

Quinn, 2021-04-11 This book covers the history of a city called Fredericksburg, located in the state of Virginia, United States. Located

near where the Rappahannock River crosses the Atlantic Seaboard fall line, Fredericksburg was a prominent port in Virginia during the colonial era. During the Civil War, Fredericksburg, located halfway between the capitals of the opposing forces, was the site of the Battle of Fredericksburg and Second Battle of Fredericksburg. These battles are preserved, in part, as the Fredericksburg and Spotsylvania National Military Park. More than 10,000 African-Americans in the region left slavery for freedom in 1862 alone, getting behind Union lines.

Waldorf Education Christopher Clouder, Martyn Rawson, 1998

This basic introduction to the Waldorf School describes the philosophy and ideals behind the movement that aims to help children become freethinking, socially responsible adults with initiative. There are over 700 Steiner Waldorf Schools in 40 countries, including 127 in the United States, making it the largest independent educational movement in the world. Rudolf Steiner is most widely known as the founder of the Waldorf Schools and for his innovative ideas on children's mental, physical and emotional development. What these ideas were and how they have been put into practice are clearly described and vividly illustrated by pertinent examples from the classroom and the curriculum.

Student visas Great Britain: Parliament: House of Commons: Home Affairs Committee, 2011-03-25 This report from the Home Affairs Select Committee cautions the Government against introducing measures which could damage the UK's thriving educational export sector. The Committee remains concerned that a number of the Government proposals could have serious unintended consequences. International students make up 10% of first degree students and over 40% of postgraduate students at UK universities. The international

student market, estimated to be worth £40 billion to the UK economy is a significant growth market and the UK is the second most popular destination in the world for international students. The Committee's findings include: the importance of the Post-Study Work route in attracting students to the UK and disagrees with the Government proposal to close it; it suggests alternatives to the Government's proposals on language requirements, specifically a permanent change to the parameters of the student visitor visa so that it can be used as a viable route for all of those attending pre-degree programmes; it supports the Government's proposals to tighten the accreditation of language schools but is concerned that Government approval of the current accreditation bodies has lapsed. The Committee calls for a single streamlined accreditation system and agrees that any cap on student visas is unnecessary and undesirable; the Committee also notes that progress has been made on closing down bogus language schools and supports the Government's intention to crack down on bogus colleges and bogus students but it is not persuaded that students are migrants, as defined by the UN and suggests that students ought to be excluded from net migration numbers. The Committee also raises concerns that the data used in assessing migration figures are not fit for purpose and could inhibit effective policy making.

Student Attainment in Higher Education Graham

Steventon, Debra Cureton, Lynn Clouder, 2016-02-05 Student

Attainment in Higher Education: Issues, controversies and debates is a timely exploration of student attainment in a rapidly changing higher education context and a rapidly changing world. The effects of neoliberalism and the commercialization of everyday life on education have been well documented, but with a focus on pedagogy, whilst student success is measured through grades, statistics and metrics. By

exploring attainment in a broader context, this book provides a unique contribution to the critical literature on contemporary higher education. Within the themes of understanding attainment and challenging practice, the book sets out to explore student attainment as complex and multifaceted. It achieves this by looking at different conceptualizations of what attainment means and to whom; how attainment is shaped by different and often competing agendas and vested interests. The book highlights these wider issues, controversies and debates that underpin student attainment, whilst at the same time engaging with strategic and local interventions, which set out to improve aspects of the higher education system and increase individual and social agency within it. Sharing a range of pedagogical approaches and interventions, some of the key topics include: addressing attainment gaps engaging mature learners nurturing the intellectual identity the impact of activity choices. Creating a dialogue amongst different audiences about national and international controversies and debates around the topic of student attainment, this contribution will be beneficial to teaching professionals, policymakers and strategists. As an edited collection with contextualisation in the wider research arena, the book has both national and international applicability and transferability.

The Register of Marriages, Christenings and Burials in the Church of Saint Mary, Lewisham, Kent (being Such Portions of the Registers as Were Saved from the Fire of 1830) from 1558 to 1750

Leland Lewis Duncan, 1891

Critical Perspectives on Health Peter Duncan, 2017-09-16 This is a unique exploration of the nature of health, and the various ways in which it can be understood and interpreted. Readers are encouraged to challenge arguments and extend their thinking, helping to connect

the key skills of critical analysis/reflection with the central conceptual and practical issues related to health and health care.
