Adobe Flex 4.5 Fundamentals Michael Labriola, Jeff Tapper, 2011-07-25 Adobe Flex: Training from the Source is the best-selling and most trusted resource for learning about Adobe Flex. Written by a team of authors with practical experience as consultants, mentors and developers of courseware, this book/CD uses project-based tutorials, and is designed to teach beginning Flex developers the details of building and architecting real-world rich internet applications using Flash Builder incorporating MXML and ActionScript 3.0. The book includes a CD that contains all the files used in the lessons, plus completed projects for comparison. This latest edition includes complete coverage of new Flex 4.5 features, such as new enhancements to the Spark architecture and component set. It will also show you how to take advantage of the improvements to core Flex infrastructure for large application development.

Extreme Money Satyajit Das, 2011-11-02 A definitive cultural history of high finance from one of the industry's most astute analysts Written by internationally respected financial expert Satyajit Das, Extreme Money shows how real engineering was replaced by financial engineering in the twentieth century, enabling vast fortunes to be made not from goods produced or services performed, but from supplying and trading money. Extreme Money focuses on this eviscerated reality—the monetary shadow of real things—and what it means today. The high levels of economic growth and the wealth that inevitably follows, driven by cheap debt, financial engineering, and speculation, were never sustainable, and the last few years have borne this out. The book shows how policy makers and regulators unknowingly underwrote the risks, substantially reducing their ability to control economic outcomes. Extreme money concentrated economic power, wealth, and risk in the hands of a small community of gifted, dynamic financiers largely outside the regulatory purview and the democratic process, and there's no going back. Explains the extreme money games (via private equity, securitization, derivatives, hedge funds, and other means) invented by the elite financiers of last century Raises deeper questions about the nature of the economic structure and assumptions about ongoing financially engineered prosperity that readers, politicians, and financial figures need to be asking The book is timed to coincide with the next phase of the financial crisis, as prospects of recovery diminish and the global economy becomes mired in a Western version of Japan's Lost Decade Ambitious in scope and coverage, the book is the indispensable, in-depth guide to the age of modern money. An age defined by extremes of financial behavior.

The Financial Crisis in Perspective (Collection) Mark Zandi, Satyajit Das, John Authers, George Chacko, Carolyn L. Evans, Hans Gunawan, Anders L. Sjöman, 2012-05-04 How the financial crisis really happened, and what it really meant: 3 books packed with lessons for investors and policymakers! These three books offer unsurpassed insight into the causes and implications of the global financial crisis: information every investor and policy-maker needs to prepare for an extraordinarily uncertain future. In Financial Shock, Updated Edition, renowned economist Mark Zandi provides the most concise, lucid account of the economic, political, and regulatory causes of the collapse, plus new insights into the continuing impact of the Obama administration's policies. Zandi doesn't just illuminate the roles of mortgage lenders, investment bankers, speculators, regulators, and the Fed: he offers sensible recommendations for preventing the next collapse. In Extreme Money, best-selling author and global finance expert Satyajit Das reveals the spectacular, dangerous money games that are generating increasingly massive bubbles of fake growth, prosperity, and wealth, while endangering the jobs, possessions, and futures of everyone outside finance. Das explains how everything from home mortgages to climate change have become fully financialized... how "voodoo banking" keeps generating massive phony profits even now... and how a new generation of "Masters of the Universe" has come to own the world. Finally, in The Fearful Rise of Markets, top Financial Times global finance journalist John Authers reveals how the first truly global super bubble was inflated, and may now be inflating again. He illuminates the multiple roots of repeated financial crises, presenting a truly global view that avoids both oversimplification and ideology. Most valuable of all, Authers offers realistic solutions: for decision-makers who want to prevent disaster, and investors who want to survive it. From world-renowned leaders and experts, including Dr. Mark Zandi, Satyajit Das, and John Authers
