CDT 2021 American Dental Association, 2020-09-08 To find the most current and correct codes, dentists and their dental teams can trust CDT 2021: Current Dental Terminology, developed by the ADA, the official source for CDT codes. 2021 code changes include 28 new codes, 7 revised codes, and 4 deleted codes. CDT 2021 contains new codes for counseling for the control and prevention of adverse oral, behavioral, and systemic health effects associated with high-risk substance use, including vaping; medicament application for the prevention of caries; image captures done through teledentistry by a licensed practitioner to forward to another dentist for interpretation; testing to identify patients who may be infected with SARS-CoV-2 (aka COVID-19). CDT codes are developed by the ADA and are the only HIPAA-recognized code set for dentistry. CDT 2021 codes go into effect on January 1, 2021. -- American Dental Association

Cdt 2022 American Dental Association, 2021-09-15 Dentistry goes beyond providing excellent oral care to patients. CDT 2022 contains new codes for: Previsit patient screenings; Fabricating, adjusting and repairing sleep apnea appliances; Intracoronal and extracoronal splints;

Immediate partial dentures; Rebasing hybrid prostheses; Removal of temporary anchorage devices. Also includes alphabetic and numeric indices and ICD 10 CM codes related to dental procedures. **General and Oral Pathology for the Dental**

**Hygienist** Leslie DeLong, Nancy Burkhart, 2013-02-25  
General and Oral Pathology for the Dental Hygienist, 2nd Edition, is a comprehensive study of the general concepts of pathophysiology as they relate to systemic and oral conditions. The only dental hygiene book on the market to address both oral and general pathology, General and Oral Pathology for the Dental Hygienist is the ideal solution for programs that cover oral and general pathology in one course, and provides an easily accessible review of general pathology for programs that cover oral pathology separately. The Oral Pathology section is uniquely organized by distinct recognizable characteristics of lesions (for example, “white” lesions or “radiolucent” lesions), a uniquely practical and highly effective way of presenting this information since dental hygienists have to evaluate pathology based on what they see. This allows the student to easily identify what he or she might be looking at and to differentiate between lesions with similar appearances.
