Making a Great Exhibition Doro Globus,2021-12-21 “It never occurred to me while growing up that art is an industry involving countless jobs, so if this book helps shed light to just one kid that it is a viable career option, then it has done its job, as art is indescribably important!” –Oliver Jeffers, Artist and Illustrator “This book so beautifully explains to kids what goes into making an art exhibition. It’s not just about an artist hanging something on a wall for people to see: it’s so much more lively, layered, and community-driven. Even I learned a ton about what truly goes into a fantastic art show!” –Joy Cho, Author and Founder of Oh Joy! “I wish I’d had this book when I was a kid! I always wanted my art to be in a big museum one day but, growing up in a small town, that just seemed impossible. Making a Great Exhibition is a beautifully illustrated behind-the-scenes peek at exactly how art makes its way from an artist’s mind to the big white walls of a fancy gallery. Turns out, there are a lot of people, with some very cool jobs, who make the magic happen—and any book that shows kids (and parents!) they can grow up to have a career in the arts is okay by me!” –Danielle Krysa, The Jealous Curator An exciting insight into the workings of artists and museums, Making a Great Exhibition is a colorful and playful introduction geared to children ages 3-7 How does an artist make a sculpture or a painting? What tools do they use? What happens to the artwork next? This fun, inside look at the life of an artwork shows the journey of two artists’ work from studio to exhibition. Stopping along the way we meet colorful characters—curators, photographers, shippers, museum visitors, and more! Both illustrator and author were raised in the art world, spending their time in studios, doing homework in museum offices, and going to special openings. They have teamed up to share their experiences and love for this often mysterious world to a young audience. London-based illustrator Rose Blake is best known for her work in A History of Pictures for Children, by David Hockney and Martin Gayford, which has been a worldwide success. Author Doro Globus brings her love for the arts and kids together with this fun journey.

Expo 67 and Its World Craig Moyes,Steven Palmer,2022-06-17 In 1967, Montreal hosted Man and His World/Terre des hommes. By far the most successful cultural event ever produced in Canada, it was embraced by the public at the same time as intellectuals from Marshall McLuhan to Umberto Eco hailed it as a new type of exhibition for a new global age. Because it was held where and when it was – on a man-made archipelago in the St Lawrence River seven years into Quebec’s Quiet Revolution – Expo 67 also provided a prism through which the idea of the nation could be refracted and recast in original ways. Misunderstood by some scholars as an expensive exercise in official patriotism, while maligned by Quebec intellectuals as a crypto-federalist distraction from the real business of national independence, the fair nevertheless showcased Montreal as the de facto capital of a suddenly modern Quebec engaging with a late-modern world. Expo 67 and Its World proposes a reappraisal of the 1967 Montreal International and Universal Exhibition across a range of political, social, and cultural spaces: from the

dispossession of Indigenous Peoples and what was then known as the Third World, through the aspirations of Montreal, Quebec, and Canada, to the increasingly global ambit of youth culture, medicine, film, and finance. A new approach to understanding Expo 67, the collection challenges assumptions about the significance of the event to Canadian, Québécois, and First Nations history.

Somesthesia and the Neurobiology of the Somatosensory Cortex O. Franzen,R. Johansson,L. Terenius,2012-12-06 This volume is a compilation of current research on somatosensation and its underlying mechanisms written by international experts from a broad range of disciplines. It is divided into six sections:· structural basis of information processing and neocortical neurotransmitters · psychophysics of somatosensation · cortical representation of somatosensation · sensory-motor interface · neuronal population behavior · cortical neurocomputation and modelling. It highlights not only important new findings but also novel methods and technologies applied to major unresolved issues in the field of neuroscience. The number of methods for investigating the neural mechanisms of soma-tosensory perception has grown substantially in the last decade. The book encompasses levels of inquiry from ionic channels, single unit recordings of neural activity, and functional brain imaging of the coordinated activity of large neuronal ensembles to human psychophysics of controlled somatic stimulation. This work is of great value for researchers and students interested in the dynamic neuronal mechanisms involved in the complex processes of sensory perception and provides a picture of our present understanding of the neural representation of the external world relayed through the somatosensory system.

Electro-Fenton Process Minghua Zhou,Mehmet A. Oturan,Ignasi Sirés,2017-11-25 This volume discusses the theoretical fundamentals and potential applications of the original electro-Fenton (EF) process and its most innovative and promising versions, all of which are classified as electrochemical advanced oxidation processes. It consists of 15 chapters that review the latest advances and trends, material selection, reaction and reactor modeling and EF scale-up. It particularly focuses on the applications of EF process in the treatment of toxic and persistent organic pollutants in water and soil, showing highly efficient removal for both lab-scale and pre-pilot setups. Indeed, the EF technology is now mature enough to be brought to market, and this collection of contributions from leading experts in the field constitutes a timely milestone for scientists and engineers.

Education in Singapore Yew-Jin Lee,2022-04-06 This edited book is a comprehensive resource for understanding the history as well as the current status of educational practices in Singapore. It is a one-stop reference guide to

education and educational issues/concerns here. There are three sections: Part 1 provides a sectorial overview of how education has been organized in this country such as preschool, special needs, primary and secondary, and adult education divisions. In Part 2, contributors critically delve into issues and policies that are pertinent to understanding education here such as underachievement, leadership, language education, assessment, and meritocracy to question what Part 1 might have taken for granted. Part 3 contains the largest number of contributors because it offers a scholarly examination into specific subject histories. This section stands out because of the comparative rarity of its subject matter (history of Physical Education, Art, Music, Geography Education, etc.) in Singapore.
