Luxury Arts of the Renaissance Marina Belozerskaya,2005-10-01 Today we associate the Renaissance with painting, sculpture, and architecture—the “major” arts. Yet contemporaries often held the “minor” arts—gem-studded goldwork, richly embellished armor, splendid tapestries and embroideries, music, and ephemeral multi-media spectacles—in much higher esteem. Isabella d’Este, Marchesa of Mantua, was typical of the Italian nobility: she bequeathed to her children precious stone vases mounted in gold, engraved gems, ivories, and antique bronzes and marbles; her favorite ladies-in-waiting, by contrast, received mere paintings. Renaissance patrons and observers extolled finely wrought luxury artifacts for their exquisite craftsmanship and the symbolic capital of their components; paintings and sculptures in modest materials, although discussed by some literati, were of lesser consequence. This book endeavors to return to the mainstream material long marginalized as a result of historical and ideological biases of the intervening centuries. The author analyzes how luxury arts went from being lofty markers of ascendancy and discernment in the Renaissance to being dismissed as “decorative” or “minor” arts—extravagant trinkets of the rich unworthy of the status of Art. Then, by re-examining the objects themselves and their uses in their day, she shows how sumptuous creations constructed the world and taste of Renaissance women and men.

Flemish Manuscript Painting in Context Elizabeth Morrison, Thomas Kren, 2007-01-08 A companion to the Getty's prize-winning exhibition catalogue *Illuminating the Renaissance: The Triumph of Flemish Manuscript Painting in Europe*, this volume contains thirteen selected papers presented at two conferences held in conjunction with that exhibition. The first was organized by the Getty Museum, and the second was held at the Courtauld Institute of Art under the sponsorship of the Courtauld Institute and the Royal Academy of Arts. Added here is an essay by Margaret Scott on the role of dress during the reign of Charles the Bold. Texts include Lorne Campbell's research into Rogier van der Weyden's work as an illuminator, Nancy Turner's investigation of materials and methods of painting in Flemish manuscripts, and trenchant commentary by Jonathan Alexander and James Marrow on the state of current research on Flemish illumination. A recurring theme is the structure of collaboration in manuscript production. The essays also reveal an important new patron of manuscript illumination and address the role of illuminated manuscripts at the Burgundian court. A series of biographies of Burgundian scribes is featured.

Sky Walking Tom Jones, 2016-12-20 A gripping first-hand account of life in space and the making of an astronaut. What is it like to fly the space shuttle and work on and in the International Space Station? Veteran NASA astronaut Tom Jones is uniquely qualified to give the details: he flew four shuttle missions and led three space walks to deliver the US Lab to the Station. . From B-52 pilot during the Cold War, to a

PhD in planetary science, to the unbelievable rigors of astronaut training, his career inevitably pointed him toward the space shuttle. Until the Challenger exploded. Jones's story is the first to candidly explain the professional and personal hardships faced by the astronauts in the aftermath of that 1986 tragedy. He certainly has 'The Right Stuff' but also found himself wondering if the risks he undertook were worth the toll on his family. Liftoffs were especially nerve-wracking (his mother, who refuses to even get on a plane, cannot watch) but his 53 days in space were unforgettable adventures. Jones uses his background as a scientist to explain the practical applications of many of the shuttle's scientific missions, and describes what it's like to work with the international crews building and living aboard the space station. Tom Jones returned from his space station voyage to assess the impact of the 2003 Columbia tragedy, and prescribes a successful course for the U.S. in space. Stunning photographs, many taken in space, illustrate his amazing journey.

Art in Genoa, 1600-1750 Jonathan Bober, Piero Boccardo, Franco Boggero, Peter Lukehart, Andrea Zanini, 2020-04-28 Genoa completed its transformation from a faded maritime power into a thriving banking center for Europe in the seventeenth century. The wealth accumulated by its leading families spurred investment in the visual arts on an enormous scale. This volume explores how artists both foreign and native created a singularly rich and extravagant expression of the baroque in works of extraordinary variety, sumptuousness, and exuberance. This art, however, has remained largely hidden behind the facades of the city's palaces, with few works, apart from those by the school's great expatriates, found beyond its borders. As a result, the Genoese baroque has been insufficiently considered or appreciated.0Lavishly illustrated, 'A Superb Baroque' is comprehensive, encompassing all the major media and participants. Presented are some 140 select works by the celebrated foreigners drawn to the city and its flourishing environment. Offering three levels of exploration-essays that frame and interpret, section introductions that characterize principal currents and stages, and texts that elucidate individual works-this volume is by far the most extensive study of the Genoese baroque in the English language.00Exhibition: National Gallery of Art, Washington, DC, USA (03.05.-16.08.2020) / Scuderie del Quirinale, Rome, Italy (03.10.2020 - 10.01.2021).

Heracles to Alexander the Great Ashmolean Museum, 2011 Excavations in the late 1970s in the modern village of Vergina revealed spectacular royal tombs. One was identified as belonging to Philip II and others to members of Alexander the Great's family. This book documents these extraordinary finds.

Magical Manuscripts in Early Modern Europe Daniel Bellingradt, Bernd-Christian Otto, 2017-08-31 This book presents the story of a unique collection of 140 manuscripts of 'learned magic' that was sold for a fantastic sum within the clandestine channels of the German book trade in the early eighteenth century. The book will interpret this collection from two angles – as an artefact of the early modern book market as well as the *longue-durée* tradition of Western learned magic –, thus taking a new stance towards scribal texts that are often regarded as eccentric, peripheral, or marginal. The study is structured by the apparent exceptionality, scarcity, and illegality of the collection, and provides chapters on clandestine activities in European book markets, questions of censorship regimes and efficiency, the use of manuscripts in an age of print, and the history of learned magic in early modern Europe. As the collection has survived till this day in Leipzig University Library, the book provides a critical edition of the 1710 selling catalogue, which includes a brief content analysis of all extant manuscripts. The study will be of interest to scholars and

students from a variety of fields, such as early modern book history, the history of magic, cultural history, the sociology of religion, or the study of Western esotericism.
