Facebook Nation Newton Lee,2014-10-16 Facebook's psychological experiments and Edward Snowden's NSA leaks epitomize a world of increasing information awareness in the social media ecosystem. With over a billion monthly active users, Facebook as a nation is overtaking China as the largest country in the world. President Barack Obama, in his 2011 State of the Union Address, called America "the nation of Edison and the Wright brothers" and "of Google and Facebook." U.S. Chief Information Officer Steven VanRoekel opines that America has become a "Facebook nation" that demands increased transparency and interactivity from the federal government. Ubiquitous social networks such as Facebook, Google+, Twitter, and YouTube are creating the technologies, infrastructures, and big data necessary for Total Information Awareness – a controversial surveillance program proposed by DARPA after the 9/11 attacks. NSA's secret PRISM program has reinvigorated WikiLeaks founder Julian Assange's accusation that "Facebook is the most appalling spying machine that has ever been invented." Facebook CEO Mark Zuckerberg once said, "We exist at the intersection of technology and social issues." This book offers discourse and practical advice on the privacy issue in the age of big data, business intelligence in social media, e-government and e-activism, as well as personal total information awareness. This expanded edition also includes insights from Wikipedian Emily Temple-Wood and Facebook ROI experts Dennis Yu and Alex Houg.

Mobile Technologies for Every Library Ann Whitney Gleason,2015-03-19 If you are wondering what mobile technology adoption means for your library or how to get started, Mobile Technologies for Every Library will answer your questions! This book will detail the opportunities and pitfalls in using mobile technology in libraries.

Mobile News Andrew Duffy,Rich Ling,Nuri Kim,Edson Tandoc, Jr.,Oscar Westlund,2020-12-17 The rise of the smartphone has shifted news from fixed publication to a flow of updateable information. The chapters in this book investigate the implications for audiences, industry and society as news becomes mobile. Wherever we go, news from anywhere can reach us on our smartphones. And wherever we are, we can search up information specific to that place. News is produced by mobile journalists (MoJos) as well as by citizens armed with smartphones, reporting breaking news from crisis zones where information is uncertain, or hyperlocal news from neighbourhoods where little happens. Mobile technology allows citizens to engage deeply with a cause or to skim headlines so they know a little about a lot of things. News is distributed on mobile networks and consumed by mobile audiences as they make their daily way through time and space coloured by their mobile devices. It is consumed in the niches of life. It intersects with place in new ways as geolocated news. It pursues us wherever we are through push notifications. And news has moved from fixed to fluid, a flow of updateable information rather than a regularly issued product. In this book, the contributors take varied viewpoints on mobility and news, its impact on what news is, how journalists produce it and how it fits into everybody's everyday life. The chapters in this book were originally published as a special issue of Digital Journalism.

A Career as a Mobile App Developer Jason Porterfield,2017-12-15 As smartphones and other mobile devices have become a fixture in our daily lives, more and more innovative and useful apps are developed for them. This informative book examines the steps needed to launch a career in the field of mobile app development, including the skills readers will need and education and training requirements. Readers will learn about potential careers within the programming, marketing, payment, and distribution processes behind mobile apps. A sample résumé demonstrates how readers might present their skills to land an exciting new job.

Computer Vision and Image Processing Balasubramanian Raman,Subrahmanyam Murala,Ananda Chowdhury,Abhinav Dhall,Puneet Goyal,2022-07-23 This two-volume set (CCIS 1567-1568) constitutes the refereed proceedings of the 6th International Conference on Computer Vision and Image Processing, CVIP 2021, held in Rupnagar, India, in December 2021. The papers present recent research on such topics as biometrics, forensics, content protection, image enhancement/super-resolution/restoration, motion and tracking, image or video retrieval, image, image/video processing for autonomous vehicles, video scene understanding, human-computer interaction, document image analysis, face, iris, emotion, sign language and gesture recognition, 3D image/video processing, action and event detection/recognition, medical image and video analysis, vision-based human GAIT analysis, remote sensing, and more.

Essential Mobile Interaction Design Cameron Banga,Josh Weinhold,2014-03-21 Design User-Friendly, Intuitive Smartphone and Tablet Apps for Any Platform Mobile apps should feel natural and intuitive, and users should understand them quickly and easily. This means that effective interaction and interface design is crucial.

However, few mobile app developers (or even designers) have had adequate training in these areas. Essential Mobile Interaction Design fills this gap, bringing together proven principles and techniques you can use in your next app—for any platform, target device, or user. This tutorial requires virtually no design or programming knowledge. Even if you’ve never designed a mobile app before, this guide teaches you the key skills that lead to the best results. Cameron Banga and Josh Weinhold help you master the mindset, processes, and vocabulary of mobile interaction design, so you can start making better choices right away. They guide you through the entire design process, demystifying issues that arise at every stage. The authors share hard-won lessons from years of experience developing more than one hundred mobile apps for clients and customers of every type. They cover important issues that platform-specific guides often overlook, including internationalization, accessibility, hybrid apps, sandboxing, and what to do after release. This guide shows you how to Think through your designs, instead of just throwing together UI elements Allow an intuitive design flow to emerge from your app Sketch and wireframe apps more effectively Reflect key differences among smartphones, tablets, and desktops Design for visual appeal without compromising usability Work effectively with programmers Make sure your apps are accessible to everyone Get usable feedback, and understand what it’s telling you Learn valuable lessons from today’s most successful apps Refresh your designs in new apps and future versions Discover new tools for designing more successfully Packed with iOS and Android™ examples, Essential Mobile Interaction Design offers dozens of tips and solutions that will be equally useful on today’s platforms and on whatever comes next. Extensive resources are available at cameronbanga.com/EMIDbook.

The Twenty-First-Century Media Industry John Allen Hendricks,2010-06-22 The Twenty-First-Century Media Industry: Economic and Managerial Implications in the Age of New Media examines the role that new media technologies are having on the traditional media industry from a media management perspective. Consumer behaviors and consumer expectations are being shaped by new media technologies. They now expect information on-demand and on-the-go as well as at their finger-tips via the Internet. In order to stay relevant, traditional media managers and practitioners are adapting to these consumer demands and expectations by developing new business models and new business philosophies to stay competitive. The contributors to this volume explore the business strategies being implemented by some media industries such as newspapers and the recording industry who are struggling to not only remain competitive and profitable, but also to survive. The Twenty-First-Century Media Industry provides an intriguing examination of how traditional media industries are adapting to new media technologies and evolving in the twenty-first century.

Deep Learning Networks Jayakumar Singaram,S. S. Iyengar,Azad M. Madni,2023-12-03 This textbook presents multiple facets of design, development and deployment of deep learning networks for both students and industry practitioners. It introduces a deep learning tool set with deep learning concepts interwoven to enhance understanding. It also presents the design and technical aspects of programming along with a practical way to understand the relationships between programming and technology for a variety of applications. It offers a tutorial for the reader to learn wide-ranging conceptual modeling and programming tools that animate deep learning applications. The book is especially directed to students taking senior level undergraduate courses and to industry practitioners interested in learning about and applying deep learning methods to practical real-world problems.

Multimedia and Network Information Systems Kazimierz Choroś,Marek Kopel,Elżbieta Kukła,Andrzej Siemiński,2018-09-04 These proceedings collect papers presented at the 11th International Conference on Multimedia & Network Information Systems (MISSI 2018), held from 12 to 14 September 2018 in Wrocław, Poland. The keynote lectures, given by four outstanding scientists, are also included here. The Conference attracted a great number of scientists from across Europe and beyond, and hosted the 6th International Workshop on Computational Intelligence for Multimedia Understanding as well as four special sessions. The majority of the papers describe various artificial intelligence (AI) methods applied to multimedia and natural language (NL) processing; they address hot topics such as virtual and augmented reality, identity recognition, video summarization, intelligent audio processing, accessing multilingual information and opinions, video games, and innovations in Web technologies. Accordingly, the proceedings provide a cutting-edge update on work being pursued in the rapidly evolving field of Multimedia and Internet Information Systems.

Mobile Phone Behavior Zheng Yan,2017-11-30 This survey introduces the science of mobile phone behavior - how mobile phones are used and how their use influences humans.

Smart Technologies, Systems and Applications Fabián R. Narváez,Fernando Urgilés,Teodiano Freire Bastos-Filho,Juan Pablo Salgado-Guerrero,2023-05-20 This book constitutes the refereed proceedings of the 3rd International Conference on Smart Technologies, Systems and Applications, SmartTech-IC 2022, held in Cuenca, Ecuador, in November 16–18, 2022. The 37 full papers included in this book were carefully reviewed and selected from 121 submissions. They were organized in topical sections as follows: Smart Technologies, Smart Systems, Smart Trends and Applications.

Second International Conference on Computer Networks and Communication Technologies S. Smys, Tomonobu Senjyu, Pavel Lafata, 2020-01-21 This book presents new communication and networking technologies, an area that has gained significant research attention from both academia and industry in recent years. It also discusses the development of more intelligent and efficient communication technologies, which are an essential part of current day-to-day life, and reports on recent innovations in technologies, architectures, and standards relating to these technologies. The book includes research that spans a wide range of communication and networking technologies, including wireless sensor networks, big data, Internet of Things, optical and telecommunication networks, artificial intelligence, cryptography, next-generation networks, cloud computing, and natural language processing. Moreover, it focuses on novel solutions in the context of communication and networking challenges, such as optimization algorithms, network interoperability, scalable network clustering, multicasting and fault-tolerant techniques, network authentication mechanisms, and predictive analytics.

Selfie Biometrics Ajita Rattani, Reza Derakhshani, Arun Ross, 2019-09-21 This book highlights the field of selfie biometrics, providing a clear overview and presenting recent advances and challenges. It also discusses numerous selfie authentication techniques on mobile devices. Biometric authentication using mobile devices is becoming a convenient and important means of verifying identity for secured access and services such as telebanking and electronic transactions. In this context, face and ocular biometrics in the visible spectrum has gained increased attention from the research community. However, device mobility and operation in uncontrolled environments mean that facial and ocular images captured with mobile devices exhibit substantial degradation as a result of adverse lighting conditions, specular reflections and motion and defocus blur. In addition, low spatial resolution and the small sensor of front-facing mobile cameras further degrade the sample quality, reducing the recognition accuracy of face and ocular recognition technology when integrated into smartphones. Presenting the state of the art in mobile biometric research and technology, and offering an overview of the potential problems in real-time integration of biometrics in mobile devices, this book is a valuable resource for final-year undergraduate students, postgraduate students, engineers, researchers and academics in various fields of computer engineering.

High Performance Android Apps Doug Sillars, 2015-09-09 Annotation In a virtual sea of Android apps, the key to survival in the form of user engagement, referrals and purchases is simple: performance and perceived speed. But building a high performance app isn't easy in a fast-paced and rapidly changing environment where new devices, platforms and development tools are announced almost daily. This practical guide provides tools and tips that will help you take app performance to a new level.
