Snow All Over the Globe Shelley Harwayne, 2023-10-13 Young and old alike find snow globes irresistible. It's so tempting to hold these glass domes in your hands, to shake them gently or turn them upside down. They call to mind winter wonderland scenes, favorite childhood toys and most of all, the places we have visited around the world. In *Snow All Over the Globe*, Shelley Harwayne and her grandson Ben Harwayne pay tribute to these treasured collectibles. By sharing the history and science connected to snow globes, they have enriched the role snow globes play in our lives. Readers will discover what snow globe makers have done to prevent the water in the globe from freezing, how they experimented with different materials to make realistic fake snowflakes, and how they managed to make those snowflakes fall slowly. Additionally, readers will learn about the very first snow globe and the changes in the production of snow globes over the years. Along the way, readers will delight in learning which presidents collected snow globes, when snow globes have popped up in movies and television shows and some of the more surprising uses of snow globes. Salt and pepper shakers, pencil sharpeners, and music boxes are among the many novelty snow globes that have been manufactured. Whether you own dozens of snow globes, just a few or even long to purchase your very first one, this book will make you proud to be an admirer of snow globes.

Us and Them John Robert Arnone,2023-08-01 Us and Them chronicles the depth to which Canada and Canadians were part of The Beatles' story—their formation, growth and break up. Entertaining and well researched, Us and Them places John, Paul, George and Ringo as a band and as solo artists in a uniquely Canadian setting; it blends rich stories, facts, analysis, and even dabbles in several plausible but little known accounts that create a new ripple in The Beatles' history. After consuming Us and Them, readers will never again listen to albums Sgt. Pepper's Lonely Hearts Club Band and the White Album, or singles "Come Together", "Give Peace a Chance", "All Things Must Pass", "Imagine" and "Mull of Kintyre" without thinking about these masterworks in a Canadian context. Us and Them is a thorough account of the Fab Four's relationship with Canada, filling an important gap in their narrative and discography.

Making Virtual Worlds Thomas Malaby,2011-01-15 The past decade has seen phenomenal growth in the development and use of virtual worlds. In one of the most notable, Second Life, millions of people have created online avatars in order to play games, take classes, socialize, and conduct business transactions. Second Life offers a gathering point and the tools for people to create a new world online. Too often neglected in popular and scholarly accounts of such groundbreaking new environments is the simple truth that, of necessity, such virtual worlds emerge from physical workplaces marked by negotiation, creation, and constant change. Thomas Malaby spent a year at Linden Lab, the real-world home of Second Life, observing those who develop and profit from the sprawling, self-generating system they have created. Some of the challenges created by Second Life for its developers were of a very traditional nature, such as how to cope with a business that is growing more quickly than existing staff can handle. Others are seemingly new: How, for instance, does one regulate something that is supposed to run on its own? Is it possible simply to create a space for people to use and then not govern its use? Can one apply these same free-range/free-

market principles to the office environment in which the game is produced? Lindens—as the Linden Lab employees call themselves—found that their efforts to prompt user behavior of one sort or another were fraught with complexities, as a number of ongoing processes collided with their own interventions. Malaby thoughtfully describes the world of Linden Lab and the challenges faced while he was conducting his in-depth ethnographic research there. He shows how the workers of a very young but quickly growing company were themselves caught up in ideas about technology, games, and organizations, and struggled to manage not only their virtual world but also themselves in a nonhierarchical fashion. In exploring the practices the Lindens employed, he questions what was at stake in their virtual world, what a game really is (and how people participate), and the role of the unexpected in a product like Second Life and an organization like Linden Lab.

Se han definido nuevas estrategias, nuevas tipologías de apps, nuevos formatos interactivos y no interactivos; y se han encontrado grandes posibilidades para los anunciantes. Este libro pretende mostrar algunas de las estrategias publicitarias más comunes entre el anunciante, así como casos de éxito en el mundo de las tabletas digitales que los ejemplifiquen. El storytelling, el advergaming, el advertainment, la publicidad para revistas, la prensa diaria o las

aplicaciones de anunciantes más descargadas configuran el Tabvertising, la denominada por el Interactive Advertising Bureau como publicidad creada para tabletas digitales.
