The Art of College Teaching Marilyn Kallet, April L. Morgan, 2005 Teachers everywhere are confronted with a problem. Whether at a small liberal arts college, major research university, or some other institute of learning, instructors are continually challenged to create smart, effective pedagogical techniques in order to be efficient in the classroom. *The Art of College Teaching* is a first: twenty-eight insider essays about this process by distinguished and highly acclaimed teachers of note from across the curriculum—including eleven Carnegie national award winners—grouped here to uncover common values, approaches, and even debates among today's educators. Rather than a "rulebook" for good teaching, Professors Marilyn Kallet and April Morgan have assembled a wide variety of practitioner lore—what successful teachers have learned to do well and what they're still seeking to master. From the embarrassing to the inspirational, contributors take us inside their classrooms to explain the "light-bulb moments" that form the bases of their teaching philosophies, making this collection reader-friendly, often humorous, and very real. Contributors take up a broad range of subjects: setting boundaries with students; teaching as performance; the pros and cons of lecture versus "active" learning; gaining students' respect and keeping it; creativity in the classroom; encouraging diversity; and many others. The interdisciplinary approach allows for a stimulating mix of voices and kinds of expertise, from "takes on teaching" by Nobel Prize Laureate James Buchanan to coaching strategies from champion ice-skating instructor Robert Unger. Theories about the "right" way to teach abound, but like any art, teaching isn't easily defined by guidelines or prevailing wisdom. A narrative, experiential approach to one of our most rewarding and demanding disciplines, *The Art of College Teaching* is a book to be of use. It is a handbook of ideas that will empower new teachers and refresh those who have been in the trenches for years.

Radiation-induced Cancer from Low-dose Exposure John W. Gofman, 1990 Reviewed in New England Journal of Medicine, February 14, 1991: Strongly recommended ... excellent. This book provides proof that even at the lowest possible doses & dose-rates, exposure to ionizing radiation is carcinogenic, contrary to speculation that repair may provide a threshold. Additionally, in an open, checkable, step-by-step analysis from raw data to conclusion, Gofman shows that risk per dose-unit is much higher than the radiation community's 1990 estimates, & that ionizing radiation may be the most important single carcinogen to which vast numbers of humans are actually exposed -- medically, environmentally, occupationally. Gofman also includes chapters on Chernobyl-induced cancers, radio-iodine-induced thyroid cancer, latency & hormesis. Gofman is a Ph.D. nuclear chemist (1943), & a physician with an illustrious track-record of discovery, careful analysis, & correct forecasting in health research. His new findings in *Radiation-Induced Cancer* are essential input for policies toward cancer prevention, radioactive waste handling, nuclear power revival, safe-dose assumptions regarding radiation or other mutagens, conflict of interest in research, & the problem of retroactively altered databases. Reviewed in Choice, January 1991: Thought-provoking...an important addition to the debate on the health effects of low-dose radiation.

Singing Reconciliation: Inhabiting the Moral Life According to Colossians 3:16 Amy Whisenand Krall, 2023-10-30 The letter to the Colossians contains a series of moral instructions in Colossians 3:12-17 and includes the admonition to sing among them. This study considers how music-making (specifically singing) supports moral formation according to the letter to the Colossians. Studies in ethnomusicology, anthropology of the voice, and music psychology offer useful frameworks for conceptualizing how a social practice like music-making forms participants into a community and shapes how they know themselves, their community, and the world. With

the aid of these frameworks, we find that the singing in Colossians 3:16, as a corporate, vocal practice of music-making, enables the members of the church community to inhabit the story of reconciliation found in the Christ Hymn (Col 1:15-20).

College Admissions Trade Secrets Andrew Allen, 2001 True or False: Princeton's Director of Admissions hacked into Yale's secured admissions website to find out who Yale had accepted and rejected. Boston College's average SAT score is up to 1370 and Boston University's average SAT score is up to 1320. Carnegie Mellon offers spots on a priority wait-list to students who send in cash and most of these students get admitted. Well, it's all true. An FBI investigation traced Yale's hacked website back to the computer of Princeton's Director of Admissions, Stephen LeMenager. Boston College's average SAT score is the same as Cornell's and close to Penn's (both Ivies). Carnegie Mellon does have a priority wait-list-it costs \$400 to be on it and the admissions rate is 95%. Welcome to the circus. Dazed and Confused. Students see the college list published by their high school's guidance department listing every acceptance and rejection from the prior year. Next to each entry is a GPA, a SAT score and the number of AP classes taken. The list is usually ordered from highest to lowest GPA. The first entry: 4.19 (unweighted), 1430 SAT, 7 AP classes, Princeton-rejected, Yale-rejected, Harvard-rejected, Stanford-rejected, Columbia-rejected, Vassar-accepted. Ouch. Scan down the list looking for Yale. Did anyone get into Yale last year? Down at the ninth entry: 3.93, 1450 SAT, 6 AP classes, Brown-accepted, Yale-accepted, Georgetown-accepted. Okay, anyone else? Scan down to the twenty-second entry: 3.88, 1560 SAT, 7 AP classes, Yale-accepted, Duke-accepted, William and Mary-rejected. This doesn't make any sense, thinks the student. Many of the students with the best grades didn't get into any top colleges and still others were rejected at colleges ranked lower than the colleges to which they were accepted. Welcome to the world of college admissions. Ever wondered what a private counselor tells an Upper East Side family for \$10,000? The secrets are in *College Admissions Trade Secrets*. *College Admissions Trade Secrets* is a straight forward guide to: Top 7 Lies Colleges Tell The Real Scoop Behind Acceptance Rates Things That Really Matter When Comparing Colleges How to Write a Great Essay and Prep for a Great Interview Common Mistakes that Result in Rejection Last Minute Tips for Seniors A Scandalous Examination of Harvard's Course Catalogue, Penn's View Book, and NYU's Faculty How Anyone Can Avoid Being in the Pool of Applicants with the Lowest Acceptance Rate

«*Eighth Sister No More*» Paul P. Marthers, 2010 When founded in 1911, Connecticut College for Women was a pioneering women's college that sought to prepare the progressive era's «new woman» to be self-sufficient. Despite a path-breaking emphasis on preparation for work in the new fields opening to women, Connecticut College and its peers have been overlooked by historians of women's higher education. This book makes the case for the significance of Connecticut College's birth and evolution, and contextualizes the college in the history of women's education. «*Eighth Sister No More*» examines Connecticut College for Women's founding mission and vision, revealing how its grassroots founding to provide educational opportunity for women was altered by coeducation; how the college has been shaped by changes in thinking about women's roles and alterations in curricular emphasis; and the role local community ties played at the college's point of origin and during the recent presidency of Claire Gaudiani, the only alumna to lead the college. Examining Connecticut College's founding in the context of its evolution illustrates how founding mission and vision inform the way colleges describe what they are and do, and whether there are essential elements of founding mission and vision that must be remembered or preserved. Drawing on archival research, oral history interviews, and seminal works on higher education history and women's history, «*Eighth Sister No More*» provides an illuminating view into the liberal arts segment of American higher education.
