Cas explains how to exploit the contrast between the hands-on textural quality of working with fabrics and threads and the spontaneity and movement of brush marks to lend a painterly quality to your work. She begins with the basics – keeping a sketchbook to generate ideas, painting and stitching on cloth and on paper and working digitally; Inspiring Landscapes looks at natural and urban space, the changing seasons and great landscapes as well as intimate spaces and travel diaries; Painting and Marking with Cloth explains the practical aspects of painting and dyeing cloth and how to make connections between paint, print, dye, stencil and stitch; Stitch-scapes looks at the different forms of landscape, experimenting with photographs and prints and how to translate those images using ink, stitch, abstract and collage techniques and then at how to transform the image using digital techniques; On Closer Inspection covers using elements and details from landscape and the environment as found objects and for research; finally People and Place explores the relationship we have with the outdoors and the built environment, as well as personal interpretations of place. The book includes artworks by the author that explore the UK, USA, Europe and Australia, as well as works by other internationally renowned textile artists. A creative guide ideal for textile artists of all levels – students, teachers and practising artists and makers – to make unique and beautiful work inspired by the world around us.

Paper, Metal and Stitch Maggie Grey, Jane Wild, 2007-08-14 Stunning bestseller now in paperback! This is an essential book on using paper and metal in textile art and embroidery. Interest in new and exciting surfaces in textile art continues unabated and this is still the best book on the subject by two leading textile artists. Paper is very popular choice; and handmade and purchased papers can be manipulated, cut, torn, stitched and

moulded into any shape or form. You can add colour, texture and metallic effects. New forms of metal can be used in textiles, such as metal shim (very thin stitch-friendly slices of real metal), glittering metal meshes, wires and coils, beads and foils, and recycled domestic metals. And stitch is the ultimate enhancer. The book has great suggestions for combining elements of paper, metal and stitch to produce finished stitched pieces - books, panels, icons and frames. With step by step instructions, all you need is this book, your enthusiasm and a swing-needle sewing machine.
