Scoreboard, Baby Ken Armstrong,Nick Perry,2010-01-01 Now, in Scoreboard, Baby, Armstrong and Perry go behind the scenes of the Huskies' Cinderella story to reveal a timeless morality tale about the price of obsession, the creep of fanaticism, and the ways in which a community can lose even when its team wins. The authors unearth the true story from firsthand interviews and thousands of pages of documents: the forensic report on a bloody fingerprint; the notes of a detective investigating allegations of rape; confidential memoranda of prosecutors; and the criminal records of the dozen-plus players arrested that year with scant mention in the newspapers and minimal consequences in the courts. The statement of a judge, sentencing one player to thirty days in jail, says it all: to be served after football season.

Dynasty by the Numbers Brad Edwards,2021-06-15 This book utilizes numbers and data visualization to explain how much better Alabama was than all other college football teams from 2008 through 2020. Honor on the Line Robert J. Scott,Myles A. Pocta,2012-07-27 It was the fall of 1940, and Americans turned to college football for relief from the turbulent world around them. The Depression still had its grip on the nation and, across the Atlantic, the Battle of Britain raged. As war crept closer every day, the nations first peacetime draft called Americans to the defense of the country. While the great Tom Harmon of Michigan set new standards on the gridiron, on other fields black stars struggled for the right to play. At Stanford, coaching genius Clark Shaughnessy reinvented the game and in the process engineered the greatest turnaround in the history of college football. But the team everybody was talking about was Cornell. Fueled by the most powerful offense in the country, the Big Red dominated the national rankings until, on a snowy field at Dartmouth, they eked out a win with a touchdown on the last play of the gameor did they? When it came to light that the touchdown had been scored on a grievous error by the officials, Cornell, undefeated and in the race for the national championship, faced a wrenching decision. The 1940 season was one of the most exciting on recordand one that taught America about the values that really matter.

Transactions on Large-Scale Data- and Knowledge-Centered Systems XVIII Abdelkader Hameurlain,Josef Küng,Roland Wagner,Hendrik Decker,Lenka Lhotska,Sebastian Link,2015-02-21 The LNCS journal Transactions on Large-Scale Data-

and Knowledge-Centered Systems focuses on data management, knowledge discovery, and knowledge processing, which are core and hot topics in computer science. Since the 1990s, the Internet has become the main driving force behind application development in all domains. An increase in the demand for resource sharing across different sites connected through networks has led to an evolution of data- and knowledge-management systems from centralized systems to decentralized systems enabling large-scale distributed applications providing high scalability. Current decentralized systems still focus on data and knowledge as their main resource. Feasibility of these systems relies basically on P2P (peer-to-peer) techniques and the support of agent systems with scaling and decentralized control. Synergy between grids, P2P systems, and agent technologies is the key to data- and knowledge-centered systems in large-scale environments. This, the 18th issue of Transactions on Large-Scale Data- and Knowledge-Centered Systems, contains extended and revised versions of seven papers presented at the 24th International Conference on Database and Expert Systems Applications, DEXA 2013, held in Prague, in the Czech Republic, in August 2013. Following the conference, and two further rounds of reviewing and selection, five extended papers and two invited keynote papers were chosen for inclusion in this special issue. The subject areas covered include argumentation, e-government, business processes, predictive traffic estimation, semantic model integration, top-k query processing, uncertainty handling, graph comparison, community detection, genetic programming, and web services.

College Football 2011: The Year of the Scandal Jim Weber, 2012-04-04 ABOUT THE BOOK The college football and men's basketball fan site and former player database, LostLettermen.com, was launched in March 2009 to answer one question: Where Are They Now? Complete with an IMDB-like database of over 150,000 former players detailing their current whereabouts and college accomplishments, Lost Lettermen has expanded to create its own content, such as player interviews with past legends and features and Top 10 lists on both sports. LostLettermen.com receives nearly 900,000 unique visitors a month as of October 2011 and has a content partnership with Yahoo.com, Bleacher Report and AOL Fanhouse, regularly appearing on the home page of the world's fourth-most trafficked web site. Lost Lettermen has also been featured in USA Today, ESPN.com, SI.com, and Mashable.com, as well as dozens of sports talk radio shows around the country, such as ESPN Radio's Doug Gottlieb Show and The Michele Tafoya Show. MEET THE AUTHOR With previous experience at ESPN The Magazine, NBC Sports and CBS Sports, Weber launched Lost Lettermen with one question as his premise: Where Are They Now? Weber oversees the site's business endeavors and content. He is a graduate of the University of Michigan and currently resides in New York City. EXCERPT FROM THE BOOK Of course the Penn State scandal had to involve two very well-known institutions of popular culture: Saturday Night Live and Ashton Kutcher. In response to the news that the school's board of trustees fired legendary coach Joe Paterno on Wednesday night, Kutcher tweeted: How do you fire Jo Pa? #insult #noclass as a hawkeye fan I find it in poor taste. The tweet was later deleted, and Kutcher's following tweets read: As an advocate in the fight against child sexual exploitation, I could not be more remorseful for all involved in the Penn St. case. And: As of immediately I will stop tweeting until I find a way to properly manage this feed. I feel awful about this error. Won't happen again. The Hollywood star apparently didn't know about the whole circus in Happy Valley. He was just tweeting as an Iowa fan who respected Paterno without knowledge of the coach's role in the mess. It was an unfortunate tweet -- even if he meant no malice. CHAPTER OUTLINE Introduction + Beyond the Blog: The Lost Lettermen Chapter 1. Determining the College Football Playoff Ray D. Theis,Mark G. Terwilliger,2021-08-12 In this book, we explore
the history of college football, and in particular the mythical college championship, from 1869 to the present
day. For several years, different media outlets took it upon themselves to declare a national championship, which
led to nothing short of confusion. In one year, four different teams were named champion! This chaotic situation
and accompanying controversy ultimately led to the creation of the Bowl Championship Series, or BCS. Initially,
the BCS selection was based on a formula that incorporated several polls and computer models. However, the
proprietary nature of the computer models and the complexity of the mathematics used to combine the data sources
to arrive at the final selection did very little to quiet the controversy. This led to the creation of a selection
committee to choose the four best teams to compete in a four-team playoff. Again, controversy has ensued, with
many questioning the politics and nebulous, capricious nature of the criteria. We have created an alternate model,
which we have dubbed the weighted wins system, that defines a simple, unbiased, and consistent mechanism for
evaluating and comparing the records of the teams in the NCAA's Bowl Subdivision. We have compared the results of
the weighted wins model against forty years of actual game results and found that it generates very similar
outcomes. The primary difference is that it completely removes politics from the selection process and offers a
clear path to the playoffs for all members of the Bowl Subdivision.
