Colour Vision Deficiencies Gunilla Derefeldt,Carl-Erik Hedin,Klas-Olav Skoog,Tiina Swartling,1995-08 Compares current methods of testing congenital colour deficiencies with tests designed to employ colour VDUs. Seeks to develop tools for studying colour deficiencies and to formulate general guidelines regarding colour selection for work that must be performed on colour VDUs. 12 persons with congenital colour vision deficiencies were judged and matched colours presented on a full-colour VDU. 4 persons with normal colour vision participated as controls. Contains color charts and numerous graphs.

All about Color Blindness Karen Rae Levine,2013 Corey, a fourth-grader, explains how his color deficiency caused problems in kindergarten. Along the way Corey learns about the special way he sees colors. His color confusion is a physical condition that many people share. It has nothing to do with how smart he is and he doesn't let it get in his way. Corey's story is followed by a simple explanation of CVD--what it is, how many people have it, how they got it and the kind of problems it might cause. Find out about testing for CVD too. MOM'S CHOICE AWARD Next Generation Indie Book Award National Indie Excellence Book Award Endorsed by the nation's leading color vision experts: I'm happy to say that All About Color Blindness will give children and parents alike the information they need to understand the basics of color

vision. - Dr. T.L. Waggoner, author of Color Vision Testing Made Easy [A]n easy to understand and scientifically correct introduction to the color vision world of kids with a color vision deficiency. Informative and useful for the kids themselves, and their parents, teachers and friends. -Michael S. Loop, Ph.D., U of Alabama School of Optometry Corey's insights are easy to read and very informative for color vision deficient children, as well as for their friends, parents and teachers who want to help. -Color Deficiency News, All About Vision

Coping with Color-blindness Odeda Rosenthal, Robert H. Phillips, 1997 In Coping With Colorblindness, author Odeda Rosenthal explains in easy-to-understand language how colorblindness occurs, and what types of colorblindness exist. She looks at the history of color vision research; the problems related to colorblindness in women; the pros and cons of tests designed to detect colorblindness; and the unique products available to aid those with this problem. Dr. Robert Phillips includes specific techniques for coping using humor, positive thinking, relaxation techniques, support groups, and professional assistance. Ms. Rosenthal and Dr. Phillips address specific issues for concerned parents of colorblind children.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

Colour, Confusion and Concessions Melanie Yap, 1996-01-01 For more than 300 years Chinese have been part of the fascinating mix of people who make up the

inhabitants of the southern tip of Africa. One of the smallest and most identifiable minority groups in arguably the most race-conscious country in the world, they have not up to now been the focus of serious historical attention. This detailed and descriptive chronological account aims to fill a gap in available histories by providing a comprehensive record of the Chinese in South Africa from the earliest times to the mid-1990s.

Clinical Neuro-Ophthalmology Ulrich Schiefer, Helmut Wilhelm, William Hart, 2007-09-11 This book covers all relevant techniques of diagnosis as well as interpretations of clinical signs in Clinical Neuro-Ophthalmology. All information is highly structured, highlighting 'definition', 'note' and 'pearl', so that it can also be used by the physician during the patient encounter. The included flow chart posters remind the physician of the most important information. This unique and practical guide offers invaluable and practical advice for physicians treating patients with neuro-ophthalmic problems.

Light Vision Color Arne Valberg, 2007-02-03 Light Vision Color takes a well-balanced, interdisciplinary approach to our most important sensory system. The book successfully combines basics in vision sciences with recent developments from different areas such as neuroscience, biophysics, sensory

psychology and philosophy. Originally published in 1998 this edition has been extensively revised and updated to include new chapters on clinical problems and eye diseases, low vision rehabilitation and the basic molecular biology and genetics of colour vision. Takes a broad interdisciplinary approach combining basics in vision sciences with the most recent developments in the area Includes an extensive list of technical terms and explanations to encourage student understanding Successfully brings together the most important areas of the subject in to one volume

The Physics of Music and Color Leon Gunther, 2011-09-23 The Physics of Music and Color deals with two subjects, music and color - sound and light in the physically objective sense - in a single volume. The basic underlying physical principles of the two subjects overlap greatly: both music and color are manifestations of wave phenomena, and commonalities exist as to the production, transmission, and detection of sound and light. This book aids readers in studying both subjects, which involve nearly the entire gamut of the fundamental laws of classical as well as modern physics. Where traditional introductory physics and courses are styled so that the basic principles are introduced first and are then applied wherever possible, this book is based on a motivational approach: it introduces a subject by demonstrating a set of related phenomena, challenging readers by calling for a physical basis for what is observed. The Physics of Music and Color is

written at level suitable for college students without any scientific background, requiring only simple algebra and a passing familiarity with trigonometry. It contains numerous problems at the end of each chapter that help the reader to fully grasp the subject.

Image Technology Design Jean-Bernard Martens,2012-12-06 Image Technology Design: A Perceptual Approach is an essential reference for both academic and professional researchers in the fields of image technology, image processing and coding, image display, and image quality. It bridges the gap between academic research on visual perception and image quality and applications of such research in the design of imaging systems. This book has been written from the point of view of an electrical engineer interested in the display, processing and coding of images, and frequently involved in applying knowledge from visual psychophysics, experimental psychology, statistics, etc., to the design of imaging systems. It focuses on the exchange of ideas between technical disciplines in image technology design (such as image display or printer design and image processing) and visual psychophysics. This is accomplished by the consistent use of a single mathematical approach (based on linear vector spaces) throughout. Known facts from color vision, image sampling and quantization are given a new formulation and, in some instances, a new interpretation.

Color Vision Sensation and Perception Marcelo Fernandes Costa,2016-09-15
Color vision is considered a microcosm of the visual science. Special physiological and psychological processes make this scientific topic an intriguing and complex research field that can aggregates around molecular biologists, neurophysiologists, physicists, psychophysicists and cognitive neuroscientists. Our purpose is to present the frontier knowledge of this area of visual science, showing, in the end, the future prospects of application and basic studies of color perception.
