Astonishment and Science Paul Tyson, 2022-12-27 Science can reveal or conceal the breathtaking wonders of creation. On one hand, knowledge of the natural world can open us up to greater love for the Creator, give us the means of more neighborly care, and fill us with ever-deepening astonishment. On the other hand, knowledge feeding an insatiable hunger for epistemic mastery can become a means of idolatry, hubris, and damage. Crucial to world-respecting science is the role of wonder: curiosity, perplexity, and astonishment. In this volume, philosopher William Desmond explores the relation of the different modes of wonder to modern science. Responding to his thought are twelve thinkers across the domains of science, theology, philosophy, law, poetry,

medicine, sociology, and art restoration.
