It's a Match! Sandu Publications,2019-04 Color plays a significant role in design due to its visual impact and psychological influence on the viewer. Combining two or more colors effectively in a single layout or design can be difficult to achieve without a working knowledge of color theory. As a result, companies will often invest in specialists to aid in color selection for their products or campaigns, letting the experts do what they do best. Each section includes a variety of

preselected color combinations to use along with a multitude of cohesive examples from branding, packaging, product and promotion design.
