Color Sudoku Philip Riley,Laura Taalman,2007-06 Sudoku fans will welcome this bright new twist to the popular puzzles! Every one of these ingenious creations--from Bold X to Rainbow Up--makes colors and patterns part of the solving fun. And although each puzzle maintains the normal 9x9 grid and follows the basic rules of the game, every style adds an additional restriction to intensify the challenge. In Worms, for example, swirly, squirmy shapes fill the grids; the numbers increase as you work your way from head to tail. Even/Odd features squares in two colors, depending on whether the number to fill it is even or odd. And in Positional Board, no two of the red squares can be the same number. They're all lots of fun!

How to Connect & Color: • Use pens or pencils that match the colors of the dots you are joining, changing color when the dots and numbers change color. • Start at number 1, marked with a hollow dot, and draw a straight line to dot 2, marked with a solid dot. • Keep joining dots in increasing numerical order until you reach a hollow dot. • Then lift your pen off the paper and move to the next dot, which will also be hollow, before then joining dots again until you reach another hollow dot. • Continue in this way, joining all dots except pairs of hollow dots, until you’ve joined every dot.
