Hands-On Computer Vision with Julia Dmitrijs Cudihiņs,2018-06-29 Explore the various packages in Julia that support image processing and build neural networks for video processing and object tracking. Key Features Build a full-fledged image processing application using JuliaImages Perform basic to advanced image and video stream processing with Julia's APIs Understand and optimize various features of OpenCV with easy examples Book Description Hands-On Computer Vision with Julia is a thorough guide for developers who want to get started with building computer vision applications using Julia. Julia is well suited to image processing because it's easy to use and lets you write easy-to-compile and efficient machine code. . This book begins by introducing you to Julia's image processing libraries such as Images.jl and ImageCore.jl. You'll get to grips with analyzing and transforming images using JuliaImages; some of the techniques discussed include enhancing and adjusting images. As you make your way through the chapters, you'll learn how to classify images, cluster them, and apply neural networks to solve computer vision problems. In the concluding chapters, you will explore OpenCV applications to perform real-time computer vision analysis, for example, face detection and object tracking. You will also understand Julia's interaction with Tesseract to perform optical character recognition and build an application that brings together all the techniques we introduced previously to consolidate the concepts learned. By end of the book, you will have understood how to utilize various Julia packages and a few open source libraries such as Tesseract and OpenCV to solve computer vision problems with ease. What you will learn Analyze image metadata and identify critical data using JuliaImages Apply filters and improve image quality and color schemes Extract 2D features for image comparison using JuliaFeatures Cluster and classify images with KNN/SVM machine learning algorithms Recognize text in an image using the Tesseract library Use OpenCV to recognize specific objects or faces in images and videos Build neural network and classify images with MXNet Who this book is for Hands-On Computer Vision with Julia is for Julia developers who are interested in learning how to perform image processing and want to explore the field of computer vision. Basic knowledge of Julia will help you understand the concepts more effectively.

Examinations and Analysis of Sequels and Serials in the Film Industry Seçmen, Emre Ahmet,2023-04-25 There are many elements in the concept of visual continuity, and they are all interrelated. In films or film series

that are described as sequels, establishing a visual integrity relationship between films comes to the fore. The concept of the sequel appears in two ways. Sometimes, while the ideas are scripted, the story is divided into more than one part. Sometimes the story is planned as a single movie, and after a certain time, it can be realized as a follow-up movie/film for different reasons. In both systems of expression, it is necessary to seek harmony between all elements of visual design. Examinations and Analysis of Sequels and Serials in the Film Industry examines certain contents through the concepts of cinematography and narrative, focusing more on the practical side of cinema and partially on the theoretical side. It examines samples, sequels, serials, and trilogy universes on the axis of cinematography and narration. Covering topics such as film landscape, repeated narrative elements, and storytelling, this premier reference source is an excellent resource for film industry workers, film students and educators, sociologists, librarians, academicians, and researchers.

*Beginning Flutter* Marco L. Napoli,2019-10-08 Build your first app in Flutter—no experience necessary! Beginning Flutter: A Hands-On Guide to App Development is the essential resource for both experienced and novice developers interested in getting started with Flutter—the powerful new mobile software development kit. With Flutter, you can quickly and easily develop beautiful, powerful apps for both Android and iOS, without the need to learn multiple programming languages or juggle more than one code base. *Hau Pei Jen* Julie Holding,2010-03 Hau Pei Jen is an accomplished Chinese watercolor artist. Art historians and critics in China called him inspirational and credit him with providing a new direction for Chinese art. In 1984 people lined up in rain to see his exhibit in Beijing. His subsequent exhibits in China including the 2008 Beijing, Nanjing, Shanghai, and Shenzhen multi-city show garnered him critical acclaims. A 2009 Silicon Valley exhibit caused great excitement among art collectors. In order to understand the magic of Hau's art and why it is so well received by scholars, critics, collectors, and general public alike, Holding traces the use of color in Chinese art and the historical development of splash ink-and-color method, a key element of Hau's style. Examining the evolution of color usage and splash painting in Chinese art, one sees that Hau's art is deeply rooted in traditional techniques. The book proceeds then to illustrate and analyze the unique characteristics of Hau's art using multiple views of artists, both professional and amateur, as well as scholars to establish Hau's innovative approach. Finally, the book presents a step-by-step demonstration of Hau's method, giving a blue print to those inspired to follow his path.
