*Colour Films in Britain* Sarah Street, Keith M. Johnston, Paul Frith, Carolyn Rickards, 2021-11-18 The story of Eastmancolor's arrival on the British filmmaking scene is one of intermittent trial and error, intense debate and speculation before gradual acceptance. This book traces the journey of its adoption in British Film and considers its lasting significance as one of the most important technical innovations in film history. Through original archival research and interviews with key figures within the industry, the authors examine the role of Eastmancolor in relation to key areas of British cinema since the 1950s; including its economic and structural histories, different studio and industrial strategies, and the wider aesthetic changes that took place with the mass adoption of colour. Their analysis of British cinema through the lens of colour produces new interpretations of key British film genres including social realism, historical and costume drama, science fiction, horror, crime, documentary and even sex films. They explore how colour communicated meaning in films ranging from the Carry On series to Monty Python's Life of Brian (1979), from Lawrence of Arabia (1962) to A Passage to India (1984), and from Goldfinger (1964) to 1984 (1984), and in the work of key directors and cinematographers of both popular and art cinema including Nicolas Roeg, Ken Russell, Ridley Scott, Peter Greenaway and Chris Menges.

**Androids** Chet Haase, 2022-07-19 The fascinating inside story of how the Android operating system came to be. In 2004, Android was two people who wanted to build camera software but couldn't get investors interested. Today, Android is a large team at Google, delivering an operating system (including camera software) to over 3 billion devices worldwide. This is the inside story, told by the people who made it happen. Androids: The Team that Built the Android Operating System is a first-hand chronological account of how the startup began, how the team came together, and how they all built an operating system from the kernel level to its applications and everything in between. It describes the tenuous beginnings of this ambitious project as a tiny startup, then as a small acquisition by Google that took on an industry with strong, entrenched competition. Author Chet Haase joined the Android team at Google in May 2010 and later recorded conversations with team members to preserve the early days of Android's history leading to the launch of 1.0. This engaging and accessible book captures the developers' stories in their own voices to answer the question: How did Android succeed?

**Processing for Android** Andrés Colubri, 2017-11-02 Learn how to use the Processing programming language and environment to create Android applications with ease. This book covers the basics of the Processing language, allowing users to effectively program interactive graphics in 2D and 3D. It also details the application of these techniques to different types of Android devices (smartphones, tablets, wearables and smartwatches). Processing for Android walks you through the steps of taking an initial idea to a final app. With this book, you will be able to write engaging apps with interactive visuals driven by motion and location information obtained from the device's sensors; including health data from the wearer, like step count and heart rate. It also covers important aspects such as exporting your Processing projects as signed apps are ready to upload to the Google Play store and be share with the world! *What Color Is Your Wallpaper?* Steven C. Mac, 2015-03-26 Look around you. See beyond your noses What color is your wallpaper? Yes, that's right, what color is your wallpaper? If I was to ask you right now, without looking, could you tell me what color your wallpaper is? What kind of design it has on it? Wait a minute, you say that's not fair You might shout back, Who cares what color my wallpaper is? That's precisely the point. Nobody really cares but you. After all, you or your spouse picked it out. You might have remembered what it looked like the day you picked it out. But what about now, one month later, or perhaps ten years later? How well do you see your surroundings?

A Time For Color Thomas Penisten, 2022-05 A beautifully illustrated and stirring story that reminds us to never lose wonder and gratitude for the simple joys in life. A joyous young boy lives life with zest and vibrance until he gets older and forgets the simple marvels that make each day special. In this timeless story, a cheerful boy's colors shine bright as he enjoys each day's splendor. His gratitude, curiosity, and joie de vivre was shown through his colors who joined him on every adventure, every exploit, and with each emotion. His colors were always there for him, awaiting the next day's successes and challenges. But as the years passed and the boy became an older man, his colors were dimming, and he became too busy with responsibilities and commitments to give them a second thought. Before he knows it, his colors become gray and his life, colorless. He soon realizes that vibrance for life is a choice you make, no matter the challenges or troubles life serves up, and that the beauty in life is in the everyday.
